"Trip Identification Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 5(4)).

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"week" means a calendar week, beginning at 00:01 h Sunday and ending at 23:59 h the following Saturday.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian. Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in in the manner set out in section 26 of the Fishery (General) Regulations.

(b) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, this licence authorizes the licensed vessel to retain the following species to the maximum amount set out: (i) Chinook Salmon.....0.4184 percent of the 2016 Area F Total Allowable Catch (TAC); (ii) Chum Salmon.....no limit; (iii) Coho Salmon.....no limit; (iv) Pink Salmon.....no limit; and (v) Sockeye Salmon.....no limit.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(b) The 2016 Area F TAC for Chinook Salmon will be posted at:

http://notices.dfo-mpo.gc.ca

and at any DFO office in the form of a fishery notice. The Area F TAC may be modified in-season by subsequent fishery notices.

(c) Fishing for Chinook shall cease when the maximum set out in subsection 2(1)(a)(i) is reached.

(d) Subsection 2(1)(a)(i) may be amended in season to reflect the transfer of share to or from another licence holder. This transfer of share shall be assigned a Chinook Quota Reallocation Confirmation Number certifying completion of a Chinook quota reallocation. At all times while at sea, the vessel master shall have onboard the licensed vessel a record of all 2016 Chinook Quota Reallocation Confirmation Numbers provided. The vessel master shall immediately provide these numbers upon demand to a fishery officer, fishery guardian or representative of the Department.

(e) The maximum total uncaught quota that can be held by this licence is equal to three Individual Transferable Quotas which equates to 1.2605 percent of the 2016 Area F TAC. The amount of uncaught quota shall be determined by fisher-supplied catch reports, dockside validations or a combination of the two.

(f) All rockfish (Sebastes sp.), except Yelloweye, Quillback, China, Tiger and Copper, to a maximum of twenty fish per day (of which a maximum of 5 may be Bocaccio) may be retained as by-catch to salmon fishing authorized by this licence (i.e. during salmon troll open times and when salmon are retained on board the vessel).

(g) The quantity of Yelloweye, Quillback, China, Tiger and Copper rockfish permitted to be taken is zero.

(h) The retention of Pacific Mackerel or Jack Mackerel is permitted as by-catch during openings for a type of vessel licensed for Salmon Area F.

(2) Catch prohibited on board the licensed vessel while fishing: (a) Subject to subsection 2(2)(d), no salmon of species that are not permitted to be retained under the authority of this licence at the time and area

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

being fished shall be on board the licensed vessel. (b) No Chinook caught under the authority of another salmon licence shall be on board the licensed vessel. For clarity, all Chinook on board the vessel shall be counted against the vessel's Area F Chinook quota. (c) Any fish that have been landed and validated. (d) Subsection 2(2)(a), does not apply to fish being held temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted:

Salmon Area F: waters of Areas 1 to 11, 101 to 111, 130 and 142, for a species of salmon by troll gear, in those areas and during those times when persons fishing under authority of a Category F licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area F, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) Salmon troll gear with single barbless hooks only during all salmon troll fisheries.

(2) The vessel licensed for Salmon Area F shall not have more than six gurdies installed or more than six lines in the aggregate, that are used or installed.

(3) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured or stressed fish which the vessel is prohibited from retaining. Those salmon and steelhead that are lethargic or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then shall be released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall: (a) be constructed of non-transparent material; (b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm; (c) have a separate tight fitting lid for each compartment, made of non-transparent material; (d) have a separate inlet and outlet for each compartment; (e)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

have a separate release mechanism for each compartment that will allow revived fish to be released without being handled; (f) be in operation while hooks are in the water and at all times when fish are being held in the tank; (g) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; (h) be kept clean and in operable condition; and (i) shall not be used for any purpose other than that outlined above.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 5(4)(c)(iii) shall be onboard the fishing vessel and shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 5(4)(c).

(3) Failure to provide all required information will be considered a failure to report and will be treated as a failure to comply with these conditions. (4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip and not earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space in the paper harvest log.

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing and Daily Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) a valid paper harvest log page number; (iii) Salmon Licence Area; (iv)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel master's name and vessel master's Fisher Identification Number; and (v) intended date, time and Area fishing will begin.

(d) The vessel master with electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Daily Catch Report Confirmation Number for each Daily Catch Record; and (ii) record the Daily Catch Report Confirmation Number in the appropriate space of the Daily Catch Record in the paper harvest log.

(b) The vessel master shall record the Daily Catch Report Confirmation Numbers in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (iv) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) the Trip Identification Number obtained when the Start-Fishing Report was made; and (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) Subarea(s)fished; (E) whether retained catch is frozen or iced; (F) number of fish caught and retained by species or type as indicated in the harvest log; (G) number of fish caught and released by species or type as indicated in the harvest log; and (H) number of non-fish (i.e. turtles, birds and mammals) encountered by species or type.

(d) The vessel master with electronic harvest logs shall submit this

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(6) Pause Fishing Report: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Pause Fishing Report Confirmation Number for each day of a fishing trip on which no fishing occurred; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) The vessel master shall record the Pause Fishing Report Confirmation Numbers in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (iv) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(c) To obtain a Pause Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Management Area in which the vessel master had intended to fish on that date.

(d) The vessel master with electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(7) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained the vessel master shall: (i) obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation number in the appropriate space in the harvest log.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log within 72 hours of the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; and (iv) intended date, time and Area where fishing was to have begun.

(d) The vessel master with electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Interim Reports: Upon request by a fishery officer, fishery guardian or a representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (a) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (b) information concerning the location of catch, rate of catch and method of transporting of the catch; and (c) the name and location of the person or company buying the catch.

(9) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make an End Fishing Report and obtain a unique End-Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End-Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) To obtain an End Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number from the most recent completed fishing trip; and (v) last date, time and Area fished.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(c) The vessel master with electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(10) Nil Reports (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by April 30, 2017.

(b) Submitting a nil report: (i) If a harvest log was issued, complete the Nil Report form that was included in the harvest log, and return it with the harvest log to your logbook Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and the licence number(s), and it shall be signed by the licence holder; or (ii) If no logbook service arrangements were made, a letter shall be sent to the Department stating that the licence(s) were not fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder.

(iii) Nil reports shall be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

Note: transferring quota from a licence does not constitute fishing; thus, if quota was transferred from a licence, but no fishing occurred under that licence, a Nil Report is required.

6. Harvest Log

Unless otherwise specified below, this section applies to both the paper harvest log and electronic harvest log. (1) The vessel master shall maintain a harvest log of all harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of the paper harvest log page can be found in the current Northern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master shall print and sign their name and FIN besides each record made in the paper harvest log. (7) Separate Daily Catch Records shall be recorded in the harvest log for each day and Management Area fished, by no later than 08:00 h of the following day, and before any fish are landed.

(8) Recording of harvest log data: (a) Daily Catch Records: (i) In all Areas, Daily catch information shall be recorded on the Daily Catch Record page in the log before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(v) For each date and Area fished, the vessel master shall ensure the following information is recorded in the harvest log: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of the net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species or type as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species or type as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species or type.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(vi) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (b) Pause Fishing Records: (i) The vessel master shall ensure that the Pause Fishing Reports are recorded in the harvest log not later than: (A) not later than 24 hours following the completion of a fishery opening; (B) if a fishery is extended, not later than 24 hours following the completion of the extension; (C) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (D) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(ii) For each day of a fishing trip on which no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; (B) Trip Identification Number obtained when the Start Fishing Report was made; (C) date on which no fishing occurred; and (D) Area in which the vessel master had intended to fish on that date.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(d) Cancel Trip Records: (i) The vessel master shall ensure that the Cancel Fishing Record is recorded in the harvest log not later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(ii) For each fishing trip where no fishing occurred, the vessel master shall ensure the following information is recorded in the harvest log: (A) Salmon Licence Area; and (B) intended date, time and Area where fishing was to have begun.

(iii) The vessel master using electronic harvest logs shall submit this information by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) End Fishing Records: (i) the vessel master shall ensure that the End Fishing Record is recorded in the harvest log not later than 24 hours

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

following the end of a fishing trip and prior to commencing a subsequent fishing trip. (9) The harvest log shall be kept on board the licensed vessel when the vessel is participating in a fishery opening and when travelling to or from a fishery opening.

(10) The harvest log shall contain data pertaining to a single vessel only.

(11) The harvest log shall be produced for examination on demand of a fishery officer or a fishery guardian.

(12) All recording in the paper harvest log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and shall be initialled by the vessel master.

(13) Erasure of an entry in the log is not permitted.

(14)(a) If a harvest log in which harvest information has been recorded is lost or destroyed and no complete records of that harvest information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the Catch Reporting Service Provider. (b) The carbon copies of all pages from the paper harvest log with harvest information would represent a complete record of harvest information. The harvest log shall be replaced prior to any subsequent fishing trips.

(15)(a) Subject to subsection 6(16), the licence holder shall ensure that all paper harvest logs issued, whether used to record fishing or not, are delivered to the issuing Catch Reporting Service Provider by April 30, 2017 and that all records recorded in those paper harvest logs are entered into the Salmon Catch Database by December 31, 2017. Returned harvest logs shall contain the original copies of all pages issued.

(b) Carbon copies from the completed paper harvest log(s) shall be retained by the licence holder until December 31, 2017. In cases where the harvest log(s) is (are) lost during delivery to the Catch Reporting Service Provider, images of these carbon copies (either fax or photocopy images) shall be delivered forthwith to the Catch Reporting Service Provider as a backup.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(16) Where a licensed fishing vessel has been leased to a fisher who is different from the named licence holder, the lessee shall be responsible for the submission of the harvest log.

7. Catch Monitoring

All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

Note: The phone number and office hours for the "At-Sea Observer Service Provider" will be posted via Fishery Notice.

Fishery Notices can be viewed on the DFO website at http://notices.dfo-mpo.gc.ca.

8. Landing of catch

(1) Reporting of Chinook Salmon landings: On the day prior to landing of Chinook Salmon, between 0700 and 1700 hours, the vessel master shall phone J.O. Thomas and Associates at 1-888-624-2646 (1-888-624-COHO) and provide the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number of the vessel master; (d) contact phone number; (e) date, time, port and location of landing of the fish; (f) name of fish buying station where fish are to be landed; (g) Management Area (s) and Subarea(s) that were fished; (h) species; (i) product type; and (j) number of pieces.

(2) Verification by an observer of the number of Chinook Salmon landed:

(a) An observer shall be present during any landing of Chinook Salmon catch to record the number of Chinook Salmon landed. (b) The transhipping of Chinook Salmon vessel to vessel is not permitted. (c) An observer shall verify the number of Chinook Salmon on board caught under this Area F licence within 5 days of a Chinook Salmon closure. (d) All Chinook Salmon landings shall occur at one of the following locations: (i) Prince Rupert/Port Edward; (ii) Masset; (iii) Queen Charlotte; (iv) Port Hardy; (v) Campbell River; (vi) Nanaimo; (vii) Victoria; or (viii) Vancouver.

9. Fish Slips

(1) The vessel master shall provide records, in the form commonly known

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

as a fish slip or sales slip, of all fish caught and retained under authority of this licence.

(2) A fish slip shall be completed for each landing.

(3) The vessel master shall ensure that each fish slip contains the following information: (i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales; (vi) date of landing; (vii) time of landing; (viii) number of days fished in each Area; (ix) landed weight of each species by grade and method of dressing reported separately in pounds; (x) number of pieces landed for each species by grade and method of dressing of fish; (xi) price paid per pound, by species; and (xii) total catch value of all species.

(4) The vessel master, or the person delivering the fish, shall print their name and sign the fish slip once completed. (5) The vessel master shall submit slips not later than seven days after landing. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit

200-401 Burrard Street Vancouver BC V6C 3S4

(6) Where the vessel is licensed for more than one Salmon Area, catch from each Salmon Area shall be reported on separate fish slips.

Fish slips may be downloaded and printed at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Fish slip books may also be ordered from the printer at user cost at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Phone (604) 666-2716 for more information.

10. Seabird Avoidance

(1) Fishers shall take precautions to avoid fishing among seabirds.

Note: Fishers are requested to retain all dead birds which are entangled and to release live and unharmed birds by placing them in the water.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Please check all birds for metal bird bands (rings) on the leg. If a bird is banded please contact Laurie Wilson with the band number and capture date and location at 1-866-431-2473 (BIRD) or by the email below. Handle birds with gloves, double bag dead birds and label each bird with date, time, and location and store them on ice. Please call your local charter patrol to organize pick-up or drop them off at a local DFO office. Alternatively, please send photographs of birds with a reference object such as a coin, and the date, time and location to laurie.wilson@canada.ca. Your names and vessel names do not need to be identified or included.

11. Species At Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

12. Fisheries specifics

(1) Retention and delivery of Chinook and Coho Salmon heads.

(a) Subject to subsection 11(1)(b), the vessel master shall ensure that: (i) all heads of Chinook and Coho Salmon that are removed prior to landing are retained. The retained portion of each head shall include the upper portion of the head extending from the tip of the snout to a cut travelling from the top of the head, passing 1 cm behind the eye, and ending at the back corner of the mouth; (ii) all retained Chinook and Coho heads shall be stored in yellow plastic bags provided for this purpose by the Department ("Chinook/Coho head bags"); (iii) each head bag shall

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

contain only the heads from a single week (Sunday to Saturday) of fishing; (iv) each head bag containing heads shall be sealed and labelled with a label provided for this purpose by the Department; (v) all labels shall be accurately completed, including: (A) the Vessel Name; (B)Vessel Registration Number; (C)Trip ID number; (D) the dates between which the enclosed heads were caught; and (E) the Management Area(s) in which the enclosed heads were caught; (vi) all retained heads shall be frozen within 12 hours and kept frozen until delivery; and (vii) all retained heads shall be delivered as follows: A) If delivering Chinook and/or Coho catch at a fish landing station, all heads on board shall be delivered to the same fish landing station. J.O. Thomas and Associates shall be notified of the head delivery 24 hours prior to landing, by calling 1-800-663-3344, between 0800 and 1600 hours Monday to Friday, or on the first business day following a week-end landing, giving the name and location of the fish landing station at which the heads have been delivered, and the number of head bags that have been delivered; or (B) If Chinook or Coho Salmon are not delivered to a fish landing station, heads shall be delivered directly and in person to a J.O. Thomas representative. Arrangements for such deliveries shall be made by calling 1-800-663-3344, between 0800 and 1600 hours Monday to Friday. Such deliveries can only be made in Masset, Queen Charlotte City, Prince Rupert or Port Edward.

(b) Subsection 11(1)(a) does not apply to fishing under this licence where DFO issues a Fishery Notice stating that this licence is exempt from subsection (1) for the 2016 salmon fishing season.

Note: Chinook/Coho Head bags and labels will be provided at no cost by the Department, and can be picked up at the following DFO offices between 0800 hours and 1600 hours:

Commissionaire, 2nd floor reception, 200 - 401 Burrard St, Vancouver Commissionaire, main entrance, 3190 Hammond Bay Rd., Nanaimo Front counter, 12551 No. 1 Rd., Steveston Front counter, main entrance,150-1260 Shoppers Row, Campbell River Front counter, main entrance,4706 Tebo Ave., Port Alberni Front counter, main entrance, 8585 Wollason Rd., Port Hardy Front counter, 417 2nd Ave W, Prince Rupert Front counter, 137 Bay St, Queen Charlotte City; and Front counter, 4250 Commerce Circle, Victoria

SHRIMP BY TRAWL Licence 2016

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FS 11 2016

SHRIMP BY TRAWL Licence 2016 Date Issued: 10 Mar 2016

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2017

Licence Holder:
FIN: 103451
KITSELAS INDIAN BAND
2225 GITAUS RD
TERRACE BC
V8G 0A9

Designated Vessel:
VRN 26850
DOT 372636
Vessel P E 232
Vessel OAL 10.05 Meters
Gross Tonnage 22.95 Cubic Meters
Net Tonnage 15.45 Cubic Meters

Reported Vessel Owner:
FIN: [redacted] s.19(1)
WILFRED PETER BENNETT
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: SHRIMP

Gear: TRAWL

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 10 Mar 2016

Licence Serial No.: 407169

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Version Date: 10-Mar-2017

CONDITIONS OF COMMUNAL SHRIMP BY TRAWL LICENCE Licence Period: April 1, 2016 to May 31, 2017 AMENDED March 7, 2017

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the shrimp-by-trawl fishery obtain a copy of the current Integrated Fisheries Management Plan for Shrimp by Trawl. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act and regulations or these conditions, the Fisheries Act and regulations and these conditions prevail.

PART 1

Application

This Part applies to fishing for shrimp, by means of trawl gear. Sections 3, 4 and 5 of Part 1 also apply to fisheries activities permitted in Part 2.

Definitions

"Area" and "Subarea" have the same meanings as in section 2 of the Pacific Fishery Management Area Regulations, 2007.

"beam trawl" means a bag shaped net that is dragged through the water by a vessel for the purpose of catching shrimp, in which the mouth of the net is held open by a single rigid beam of wood or metal.

"Department" means the Department of Fisheries and Oceans.

"fishing trip" means a voyage that commences at the time a fishing vessel leaves a port, dock or other permanent anchorage to engage in fishing and terminates at the time any fish caught during that period are offloaded.

"landed" or "landing" means the transfer of any quantity of shrimp from a vessel to land including docks and wharves at the end of a fishing trip.

"observer" means a person who has been designated as an observer by the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"offloading" means the landing or removal of catch from the vessel.

"otter trawl" means a bag shaped net dragged through the water by a vessel for the purpose of catching shrimp, in which the mouth of the net is held open by "otter" boards (or commonly known as "doors") of wood and/or metal.

"Shrimp Management Areas" are described in the current "Integrated Fisheries Management Plan for Shrimp by Trawl".

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, quantity, and size of fish permitted to be taken:

(1) The following shrimp species may be caught and retained: (a) Northern Pink Shrimp (Pandalus borealis); (b) Pink Shrimp (Pandalus jordani); (c) Sidestripe Shrimp (Pandalopsis dispar); (d) Flexed Shrimp (Pandalus goniurus); (e) Coonstripe Shrimp (Pandalus danae); and (f) Humpback Shrimp (Pandalus hypsinotus).

(2) Prawn Shrimp (Pandalus platyceros) caught incidentally while fishing for those species of shrimp set out in subsection 1(1) may be retained in a quantity that does not exceed 100 individual whole, in the shell, Prawn Shrimp, provided that the area is open for fishing for Prawn Shrimp by means of trawl gear.

(3) The minimum size limit for prawns is 33 mm carapace length, measured from the posterior-most part of the eye orbit to the posterior mid-dorsal margin of the carapace.

(4) Opal Squid (Loligo opalescens) caught incidentally while fishing for those species of shrimp set out in subsection 1(1) may be retained in a quantity that does not exceed 2% of the total weight of shrimp on board the vessel.

(5) Octopus (Octopus dofleini) caught incidentally while fishing for those species of shrimp set out in subsection 1(1) may be retained.

2. Waters in which fishing is permitted and the period during which fishing is permitted to be carried out:

(1)Subject to subsection 2(2), fishing is permitted for those species of shrimp and prawn by means of trawl gear, in those areas and during those times when persons fishing under authority of a Category S licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species of shrimp and prawn, in that area and during that time.

(2) Subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, fishing under the authority of this licence is permitted in all Areas and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Subareas, except Areas 2, 107 to 111 and 130 and Subareas 7-1, 7-25, 7-26, 7-31, 8-1, 10-1, 10-2, 11-1 and 11-2.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fishers:

(a) individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer; and (b) designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in with the manner set out in section 26 of the Fishery (General) Regulations.

(2) Fishing gear shall be identified in with the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Fishing gear permitted to be used:

(1) An otter trawl net or beam trawl net modified to reduce by-catch of species other than shrimp in the manner described in subsections 6(2) and 6(3). Refer to the current Integrated Fisheries Management Plan for Shrimp by Trawl for further information.

(2)(a) Each trawl net used under this licence shall have a rigid grid (e.g. aluminum, PVC), sometimes called a Nordmore grate, inserted into the forward end of the cod end of the trawl net at an angle so that it entirely blocks access to the cod end, except for the spaces between the bars. (b) The bars of the grid shall be no greater than 31.75 mm (1.25 inches) apart. (c) The netting directly above the grid shall have a triangular opening ("escape hole") the full width of the grate. The sides of the opening shall be reinforced so that the opening remains unobstructed and maintains its shape while the net is being towed through the water.

(3) In addition, the top (hood or upper belly) of each otter trawl net used under this licence shall contain a minimum 4.4 m2 panel of plastic lattice with minimum 4 cm square openings, such as is found in snow-fencing or large mesh netting hung on the square.

(4) Mechanized devices that automatically separate by-catch from shrimp (e.g. "smelt belts") shall not be used.

(5) On-board shrimp sorting devices to separate shrimp by size are allowed. ,

7. The segregation of species on board the vessel:

(1) All Prawn Shrimp shall be segregated on board the vessel from all other species

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties.

of shrimp.

(2) Subject to subsections (3) and (4), discarding of shrimp is not allowed. All shrimp (other than prawns and other species when areas are closed) that are caught shall be retained and reported in logbooks and hailed as landed catch.

(3) Undersize prawn, shrimp that the vessel is not permitted to retain and other by-catch for which the vessel does not have a licence shall be returned to the water immediately and in the manner that causes the least harm.

(4) Any prawn carrying more than 200 eggs externally on the underside of the tail shall be returned to the water immediately and in the manner that causes the least harm. Eggs shall not be removed from prawns carrying eggs.

8. If vessel is licensed for fishing for shrimp by means of trap gear:

Where this licensed vessel holds a shrimp-by-trap commercial fishing licence, any shrimp caught under authority of that licence shall be offloaded prior to the vessel fishing under authority of this licence.

9. Catch prohibited on board the licensed vessel while fishing:

(1) No prawns or shrimp that are not permitted to be retained under the authority of this licence shall be on board the licensed vessel.

10. Fishing Activity Reports:

(1) Prior to commencing fishing: (a)Prior to commencing fishing and at least 24 hours prior to leaving port, the vessel master shall: (i) obtain a Fishing Hail Number; and (ii) record the Fishing Hail Number in the Shrimp Trawl Fishing Log. The person identified as the vessel master in subsection 10(1)(b)(i) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(b) To obtain a Fishing Hail Number, the vessel master shall contact the service provider at 1-866-377-1400 (08:00 h to 17:00 h, Monday to Friday only) and the following information shall be provided: (i) vessel name, vessel registration number, vessel master's name and contact telephone number, autotel or cellular phone number of vessel, and gear type (beam or otter trawl); or a shrimp fish harvester identification number assigned by the service provider; (ii) Subarea(s) or Shrimp Management Area to be fished; (iii) anticipated date and time fishing will begin; (iv) anticipated number of fishing days for the fishing trip; (v) target shrimp species, i.e. which species the vessel master will direct the fishing effort towards; (vi) type of product to be produced, i.e. fresh, live, frozen at sea, etc.; (vii) anticipated date and time of offloading at the end of the fishing trip; and (viii) anticipated port and location of offloading at the end of the fishing trip.

(2) Prior to changing area: (a) In the event of a change in the Subarea or Shrimp Management Area to be fished as reported under subsection 10(1), the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

master shall notify the service provider at 1-866-377-1400 (08:00 h to 17:00 h, Monday to Friday only) and provide the following information: (i) Fishing Hail Number which applies to the current fishing trip; (ii) new Subarea or Shrimp Management Area to be fished; (iii) the total weight of each species of shrimp as set out in subsection 1(1), on board the vessel from each Shrimp Management Area fished; (iv) anticipated number of fishing days in the new Subarea or Shrimp Management Area; (v) target shrimp species, i.e. which species the vessel master will direct the fishing effort towards; (vi) type of product to be produced,i.e. fresh, live, frozen at sea, etc; and (vii) anticipated port of landing at the end of the fishing trip.

(3) Fishing trips longer than seven days (a) Every seven days, the vessel master shall contact the service provider at 1-866-377-1400 (08:00 h to 17:00 h, Monday to Friday only) and provide the following information: (i) Fishing Hail Number which applies to the current fishing trip; (ii) the Shrimp Management Area or Subarea in which fishing occurred; and (iii) the total weight of each species of shrimp as set out in subsection 1(1), on board the vessel from each Shrimp Management Area fished.

(For example, if the Fishing Hail Report is made on Monday, then an update of catch information is required every Monday for the duration of the fishing trip.)

(4) Prior to landing catch: (a) Prior to landing catch at the end of a fishing trip, the vessel master shall: (i) obtain a Landing Hail Number; and (ii) record the Landing Hail Number in the Shrimp Trawl Fishing Log.

(b) To obtain a Landing Hail Number, the service provider shall be contacted at 1-866-377-1200 (24 hours per day) or at 1-866-377-1400 (08:00 h to 17:00 h, Monday to Friday only) and the following information shall be provided: (i) Fishing Hail Number which applies to the current fishing trip; (ii) vessel name, vessel registration number, vessel master's name, or shrimp fish harvester identification number; (iii) date fishing began; (iv) date of offloading; (v) time of offloading; (vi) port and location of offloading; (vii) buyer; (viii) the Shrimp Management Area(s) or Subarea(s) in which fishing occurred; (ix) the total hours towed for each Shrimp Management Area fished; and (x) the total weight of each species of shrimp, as set out in subsection 1(1), on board the vessel from each Shrimp Management Area fished.

*Northern Pink Shrimp (Pandalus borealis) and Pink Shrimp (Pandalus jordani), may be reported as "Pink Shrimp".

(5) Should the vessel master decide not to fish after obtaining a Fishing Hail Number, the vessel master shall obtain a Landing Hail Number by contacting the service provider at 1-866-377-1200 (24 hours per day) or at 1-866-377-1400 (08:00 h to 17:00 h Monday to Friday only) and indicating that no fishing occurred.

11. Transporting shrimp:

A copy of the fish slip (see section 15) shall be given to any person transporting

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

shrimp or incidental catch caught under the authority of this licence and shall accompany the shrimp or incidental catch in transit, including shrimp or incidental catch for personal use. This provision allows persons to transport shrimp caught under the authority of their own licence and provides a record of licensed catch.

12. Records - Harvest Logs and fishing location information: (see explanatory note after section 16)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department. The content and format of this log (paper and electronic) shall meet the requirements as defined by the Fisheries and Oceans Canada Shellfish Data Unit, Stock Assessment Division for this licence period.

(2) The harvest and fishing information recorded in the log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the log no later than midnight of that day.

(4) The log shall be kept on board the licensed vessel.

(5) The log shall be produced for examination on demand of a fishery officer.

(6) The vessel master shall enter latitude and longitude co-ordinates in the appropriate location in the log for each catch location.

(7) The completed log pages (original copy) and an electronic copy of the log including latitude and longitude co-ordinates shall be forwarded no later than 28 days, and sooner if possible, following the end of each month in which fishing occurred to:

Fisheries and Oceans Canada Shellfish Data Unit Marine Ecosystem and Aquaculture Division Pacific Biological Station 3190 Hammond Bay Road Nanaimo BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

13. Requirement to take an Observer

All vessels are required to take on board an observer when requested to do so by the Regional Director-General for the Pacific Region.

14. Requirement for Dockside Observers

(1) The vessel master shall arrange for a minimum of 2 days of observer coverage from April 1, 2016 to May 31, 2017 at the time of offloading.

(2) When the observer is present at the offload: (a) The weight of all fish shall be verified by the observer. (b) When any fish taken under the authority of this licence are landed, all fish on board the vessel shall be landed at the same time. (c) The vessel master shall provide to the observer, or fishery officer attending the landing,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

access to the vessel's fish holds, freezers and other fish storage locations at any time during the landing or at the conclusion of the landing.

15. Reporting catch on fish slips

(1) An accurate written report shall be provided on a fish slip of all fish and shellfish caught under the authority of this licence.

(2) A report shall be made even if the fish or shellfish landed are used for bait, personal consumption or disposed of otherwise.

(3) The report shall be mailed not later than seven days after the offloading and sent to:

Fisheries and Aquaculture Management Branch FM Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slips may be downloaded and printed at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Fish slip books may also be ordered from the printer at user cost at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Phone (604) 666-2716 for more information.

16. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

(a) are conducted under licences issued under the Fisheries Act, and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure:

(a) that while the fishing activities are conducted, every measure will be taken to avoid the incidental capture of Basking Shark. (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface. (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

Explanatory Note - Fishing Activity Reports, Harvest Log Data, and Dockside Observations: The Pacific Coast Shrimpers' Cooperative Association has contracted a service provider to provide, for a fee, the activity reports, harvest log coding and keypunching and validation services meeting the requirements of Fisheries and Oceans Canada.

Fish harvesters who do not use the Harvest Log, coding and keypunch services

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

provided by a service company shall contact the Shellfish Data Unit at (250) 756-7306 or (250) 756-7022 in order to obtain the information necessary to fulfill these requirements.

COMMUNAL PART 2 [AMENDED March 7,2017]

Application

This Part applies to fishing for those species listed in s.1.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to subsection 39(1) of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 9 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department of Fisheries and Oceans database into which all catch data must be entered.

"Fisher Identification Number (FIN)" means a unique identification number issued by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 10)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 6)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department of Fisheries and Oceans and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"vessel registration number (VRN)" means the number assigned to a vessel by the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties.

Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 1 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Release of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 6(1). The person identified as the vessel master in subsection 6(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master, who must be the caller making the report; (d) name of the directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 18, will occur. If that is the case, the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate shall be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsection 6(1).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 7(2), when fishing under authority of this licence at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

a functioning electronic monitoring (EM) system onboard the vessel, as described in section 9.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 8(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea. (c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip. (d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 9.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 10(1)). (1) Subject to subsection 10(2) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

taken; and (e) if conducting a dual fishing trip as set out in section 18, an estimate in poundage by species of fish that was caught under the authority of the Communal Fishing Licence.

(2) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 11(2), 11(3) and 11(4), all fish caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 11(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 11(4), no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" Fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log no later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) The vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a fishery officer, a DFO employee or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) The completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) The licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall submit the fish slips not later than seven (7) days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"towed buoy" means a buoy towed abaft of the stern of the vessel .

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 17(2) and 17(3), the vessel master fishing:

(a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear;

(c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and

(d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 17(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

23. Dual Fishing for all species

The following definitions apply to this section:

"Communal Fishing Licence" means a licence issued under the Aboriginal Communal Fishing Licences Regulations that authorizes an aboriginal organization to fish groundfish for food, social and ceremonial purposes.

"dual fishing" means fishing for and retaining groundfish under the authority of this licence and a Communal Fishing Licence during the same fishing trip.

"dual fishing designation" means designation by an aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an aboriginal organization confirming designation to fish under a Communal Fishing Licence.

"unique identification number" means a unique number the aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the aboriginal organization's Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the aboriginal organization; (b) the full name of the vessel designated by the aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating aboriginal organization's Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the aboriginal organization's Communal Fishing Licence, where fishing may be carried

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

out under the dual fishing designation certificate; (f) the full name of the aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the aboriginal organization has assigned to the dual fishing designation certificate; and (i) the Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 23(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 23(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number the aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea boarding occurs.

(7) At the request of the aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

validation.

(9) Where fish taken under the authority of the Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of a Communal Fishing Licence shall occur only in the waters, or area, where the designating aboriginal organization's Communal Fishing Licence authorizes fishing.

(12) Before the fish caught pursuant to the Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the aboriginal organization who was advised of the landing 18(12)(a) were made and provides it to a Fishery Officer upon request.

(13) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the Communal Fishing Licence during the fishing trip to the aboriginal organization that issued the dual fishing designation certificate.

(14) All fish caught under the authority of the Communal Fishing Licence are for the food, social and ceremonial purposes of the aboriginal organization which holds the licence. The vessel master or any person designated to fish under the Communal Fishing Licence shall not sell trade or barter any fish caught pursuant to the Communal Fishing Licence.

19. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

PART 3 [AMENDED March 7, 2017]

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

Fisheries and Oceans Canada | Pêches et Océans Canada

Licence Number: XFSC 13 2017
Valid From: 01-Mar-2017
Expiry Date: 30-Jun-2017

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Species, Quantity of Fish, Area(s) and Gear and Terms and Conditions of this licence document.

Period of Activity:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This licence is for an allocation for the term of this licence for management purposes only, and is without prejudice to allocations in future years and may be amended in-season.

Terms and Conditions:

Definitions

"Band" means the First Nation.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and which is used to fish for a species of fish which is authorized by a commercial fishing licence (including commercial licences under the Aboriginal Communal Fishing Licences Regulations). This does not include non-licenced vessels fishing for food, social and ceremonial purposes.

"DFO" means Department of Fisheries and Oceans.

"First Nation" means First Nation noted as a licence holder in this licence.

"Fishery" means fishing under the authority of this licence.

"Indian Status Card" means a photo identity card issued by the Aboriginal Affairs and Northern Development Canada and entitled 'Certificate of Indian Status'.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"Non Commercial Fishing Vessel" means a vessel that is not commercially licenced.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Designation of Vessels

If the harvester is intending to use a commercial or non-commercial fishing vessel to participate in the fishery the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email: Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email: Wade.Norman@dfo-mpo.gc.ca) at least twenty-four (24) hours prior to using the vessel in the fishery. Where the Metlakatla Fisheries Program Manager, or designate, designates a vessel after this time, the Metlakatla Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Designation of Individuals

The First Nation has designated all members of the First Nation who have a Band Indian Status Card for the licence holder noted in this licence to fish under this licence. Band Indian Status Cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation permit.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) with a list of the additional persons designated.

Designations are personal and non-transferable. Designation permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Band Indian Status Card for the licence holder in this licence or a designation card must be carried at all times by designated persons while participating in the fishery or while transporting fish harvested in the fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Band Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the First Nation. The First Nation will keep a record of all harvests under this licence. Where, during a week, harvesting of herring spawn on seaplants or boughs is carried out under this licence, the First Nation will provide to the DFO AFS Resource Manager at DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) or upon request by the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca), a copy of the up to date harvest log, on Wednesday of each week.

General Provisions

This licence does not define an aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

005732

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi sur l'accès à l'information.

Licence Number: XFSC 138 2017
File Number: NCD-10-CL015-YEKOOCHE
Valid From: 25-May-2017
Expiry Date: 31-Dec-2017

This licence is issued to the NANCUT INDIAN BAND also known as YEKOOCHE FIRST NATION for and on behalf of its members, and subject to the Fisheries Act and a regulation thereunder, confers the authority to fish under the following conditions:

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Definitions

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).
"First Nation" means the licence holder as identified under licence holder.
"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.
"Fishery" means fishing under the authority of this licence.
"Indian Status Card" means a photo identity card issued by the Department of Indian Affairs and Northern Development and entitled "Certificate of Indian Status".
"Participant" means an individual carrying on any fishing or fishing related activity, including transporting and landing fish, under the authority of this licence.

Dates and Times

Fishing is authorized by this licence 7 days each week from July 1 to September 30. Fishing dates and times are subject to amendment to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e) in accordance with the other conditions,
set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

The following gear is permitted to be used for Salmon harvesting:

(a) Fish wheel;
(b) Gill nets;
(c) Set-nets;
(d) Dip net;
(e) Gaff with single point;
(f) Beach seine;
(g) Trap or weir;
(h) Rod and reel angling gear with single point hook

All fishing gear must be clearly marked with the participant's name and Band number or Designation Card number, as the case may be.

No one is permitted to fish more than one gillnet or set-net.

Designation of Individuals

Designated persons must carry the documentation described herein at all times while participating in the Fishery or while transporting fish harvested in the Fishery. Designated persons who are members of the First Nation must carry a form of identification that documents their membership of the First Nation. Designated persons who are members of the First Nation must carry an Indian Status Card. Designated persons who are not members of the First Nation must carry a letter of authorization issued by the Chief Councillor of the First Nation.

A designated person must present, to any DFO fishery officer, DFO fishery guardian, or the First Nation Monitor, on request, a form of identification that documents their membership of the First Nation, their Indian Status Card, or their letter of authorization.

Designations are personal and non-transferable.

Tag Recovery

The First Nation will provide all tags and radio tags and/or recovery information to the nearest DFO office.

Catch Monitoring and Harvest Reporting

DFO and the First Nation will cooperate in the monitoring of the catch made further to this licence. Where fishing iscarried out under this licence, the First Nation will provide DFO Fisheries Management in Smithers at (email: melanie.anthony@dfo-mpo.gc.ca and dfo.ncap-pacn.mpo@dfo-mpo.gc.ca, phone: 250-847-5108, fax: 250-847-4723) with final catch and net counts by October 15.

The use of grappling hooks, rakes, or any other method which damages kelp holdfasts is not permitted under this licence.

For greater certainty, harvesting by closed ponding is not permitted under this licence.

This licence is for an allocation for the term of this licence for management purposes only, and is without prejudice to allocations in future years and may be amended in-season.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Terms and Conditions:

Definitions

"Band" means the First Nation.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and which is used to fish for a species of fish which is authorized by a commercial fishing licence (including commercial licences under the Aboriginal Communal Fishing Licences Regulations). This does not include non-licenced vessels fishing for food, social and ceremonial purposes.

"DFO" means Department of Fisheries and Oceans.

"First Nation" means First Nation noted as a licence holder in this licence.

"Fishery" means fishing under the authority of this licence.

"Indian Status Card" means a photo identity card issued by the Aboriginal Affairs and Northern Development Canada and entitled 'Certificate of Indian Status'.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"Non Commercial Fishing Vessel" means a vessel that is not commercially licenced.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Designation of Vessels

If the harvester is intending to use a commercial or non commercial fishing vessel to participate in the fishery the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) at least 24 hours prior to using the vessel in the fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Individuals

The First Nation has designated all members of the First Nation who have a Band Indian Status Card for the licence holder noted in this licence to fish under this licence. Band Indian Status Cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation permit.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) with a list of the additional persons designated.

Designations are personal and non-transferable. Designation permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Band Indian Status Card for the licence holder in this licence or a designation card must be carried at all times by designated persons while participating in the fishery or while transporting fish harvested in the fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Band Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the First Nation. The First Nation will keep a record of all harvests under this licence. Where, during a week, harvesting of herring spawn on seaplants or boughs is carried out under this licence, the First Nation will provide to the DFO AFS Resource Manager by email at DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca or upon request by the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca), a copy of the up to date harvest log, on Wednesday of each week.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Licence Number: XFSC 22 2017 - Amendment 1
Valid From: 01-Apr-2017
Expiry Date: 31-Mar-2018

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Period of Activity:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Maximum Harvest Amount:	35 Individual Pieces

Species:	All SHELLFISH excluding ABALONES (Haliotidae);
Gear:	Hand Picking Dip Net Trap, Hoop or Ring Net Trap or Pot Hook and Line

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Licence Area:

Additional Descriptions: No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

s.20(1)(c)

Ring net on condition that:
(i) nets are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.

Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) Where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(iii) Rigid frame traps with hinged lids: No designated fisherman shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater than #120 untreated cotton twine, such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No designated fisherman shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than #120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35 cm square.

No chemicals are allowed to be used in marine and intertidal areas.

Species: BUTTER CLAM (Saxidomus gigantea)
Gear: Hand Picking
Fork
Rake

Licence Area:

Additional Descriptions: See Additional Information for specific harvest areas.

In keeping with the traditions of the Tsimshian people, the black-tipped siphons will be removed from all butter clams (Saxidomus gigantea) prior to consumption. This method of preparing butter clams has been practiced by the Tsimshian people for thousands of years, and the technique has been passed down orally from generation to generation.

For greater certainty, this licence does not authorize the harvest of abalone.

Terms and Conditions:

Definitions

"Band" means the First Nation, which is represented by the Metlakatla Band Council.

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

Document Released Under the Access to Information Act / Document divulgué en vertu

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Metlakatla Band Council will issue each person so designated with a transport permit that will contain:
1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product (complete address),
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) Licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and fax: 250-627-3188) or Field Supervisor (phone: 250-627-3419 and fax: 250-627-3188) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel prior to the vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;

Document Released Under the Access to Information Act / Document divulgué en vertu

iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including VRN), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by set in the comments sections.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Metlakatla Band Council. The Metlakatla Band Council will keep a record of all harvests under this licence and will provide such information to the following DFO Fisheries Management Coordinators, on request:

Marine Mammals: DFO Marine Mammals Coordinator, Vancouver (Phone: 604-666-9965, or Fax: 604-666-3341)

Groundfish: Regional Manager, Groundfish Management Unit, Vancouver (Phone: 604-666-9033, or Fax: 604-666-8525) or email DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca

Eulachon: DFO Resource Management Biologist, Prince Rupert (Phone: 250-627-3457, or Fax: 250-627-3427)

Shellfish: DFO Resource Management Shellfish Unit Biologist, Prince Rupert (Phone: 250-627-3477, or Fax: 250-627-3427)

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Metlakatla will provide DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, Phone: 250-627-3492, or Fax: 250-627-3427) a copy of the up-to-date harvest log, on Wednesday of each week.

If a fishing vessel is used for fishing under this licence, the Metlakatla Band Council will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the

Document Released Under the Access to Information Act / Document divulgué en vertu

regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, a species of fish set out in this licence may be harvested under this licence,
(a) in the specified quantities
(b) during the specified dates and times
(c) with the specified gear, identified or marked in accordance with the specified method
(d) at the specified locations, and
(e) in accordance with the other conditions.

Subject to closures and other conditions of this licence, the authority to fish each species set out in this licence will expire on the date specified or earlier if DFO, after consultation with the Metlakatla Band Council, has determined that the maximum quantity for the species has been reached.

This licence is for a specified quantity for the term of this licence for management purposes only, and is without prejudice to maximum quantities in future years.

Designation of Individuals

The Metlakatla Band Council has designated all members of the Metlakatla First Nation who have a valid Metlakatla First Nation Band card to fish under this licence. Metlakatla First Nation Band cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation card/letter.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and fax: 250-627-3188) or Field Supervisor (phone: 250-627-3419 and fax: 250-627-3188) with a list of the additional persons designated.

Designations are personal and non-transferable. Designation cards must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Metlakatla Band Council band card or a designation card must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

For management purposes, 2017-2018, bivalve harvests will be limited to Metlakatla band members and other designated individuals only. Harvesters must be in possession of a valid food fish permit or Metlakatla status card while harvesting. The Metlakatla Fisheries Program, in consultation with DFO Conservation and Protection staff has developed a monitoring and enforcement program for the clam fishery. Metlakatla will have on-ground monitoring during an opening to monitor band member activities; MFP will also carry out occasional joint patrols with C&P personnel to monitor non-band members' activities.

Harvesting sites in Venn Pass are located in Metlakatla's IR 2 this harvesting area is exclusive to band membership. A

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

clam fishery for non-band members and non-Tsimshian will be considered after assessing the impacts of the initial harvest. A fishery for non-band members will take place at the discretion of the Metlakatla Band Council and Metlakatla Fisheries Program.

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca & patricia.demille@dfo-mpo.gc.ca, or by phone at 250-627-3499) at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the First Nation Fisheries Program and subject to 100% dockside validation by the First Nation Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email: Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email: Wade.Norman@dfo-mpo.gc.ca) at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

Bivalves

Metlakatla will maintain a Community Harvest Plan to manage the community bivalve harvest. The Metlakatla Fisheries Program will monitor the fishery and provide Fisheries and Oceans Canada with a copy of the Community Harvest Plan prior to the start of the fishery.

Catch monitoring information will be collected to better quantify the intertidal bivalve needs of the Metlakatla community for future FSC bivalve harvests. Participants will also be required to provide MFP with a bivalve harvest report upon completion of harvesting. Metlakatla Fisheries staff, in conjunction with DFO (C&P), will patrol the harvest openings and MFP staff will collect catch information at the harvest site and upon return of the permit or interview. Catch monitoring will include harvesters name, date of harvest, amount harvested (lbs.), catch report will be forwarded at the end of each month with catch reports to Resource Management Shellfish Unit Biologist at the Department of Fisheries and Oceans.

On-site monitoring coverage will be done at all harvest locations every harvest tide by MFP staff.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;

Document Released Under the Access to Information Act / Document divulgué en vertu

(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Fishing is not permitted in an area described in this licence unless the Canadian Food Inspection Agency recommends to the Regional Director General, Pacific Region, (RDG) that the prohibition order respecting harvesting in that area be lifted and the RDG announces by PUBLIC NOTICE as described below that harvesting in that area is permitted.

The Parties agree to work together to identify the times, locations and methods whereby bivalves can be safely harvested. This may include the implementation of PSP assessment and monitoring procedures for specific harvesting times and locations.

Replaced due to Licence Issued with Amended Conditions Attached

Document Released Under the Access to Information Act / Document divulgué en vertu

Licence Issued: 03 April 2017

Licence Printed: 03 April 2017
Licence Issued By: MARISA KEEFE, Fisheries and Oceans Canada

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fisheries and Oceans Canada | Pêches et Océans Canada

Licence Number: XFSC 26 2017 - Amendment 1
File Number: NCD-CL10-017-KITSELAS
Valid From: 01-Apr-2017
Expiry Date: 31-Mar-2018

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Period of Activity:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Additional salmon harvesting information and restrictions are provided in the Term and Conditions section of this licence document and must be adhered to when participating in fishing or transporting activities.

Fishing is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Species: SABLEFISH (Anoplopoma fimbria)
Gear: Trap or Pot
Hook and Line
Licence Area: [redacted]
Maximum Harvest Amount: 500 Pounds
Additional Descriptions: Additional groundfish harvesting information and restrictions are provided in the Term and Conditions section of this licence document and must be adhered to when participating in fishing or transporting activities.

Fishing for groundfish, sablefish or halibut is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Species: PACIFIC HALIBUT (Hippoglossus stenolepis)
Gear: Trap or Pot
Hook and Line
Licence Area: [redacted]
Maximum Harvest Amount: 9600 Pounds
Additional Descriptions: Additional groundfish harvesting information and restrictions are provided in the Term and Conditions section of this licence document and must be adhered to when participating in fishing or transporting activities.

Fishing for groundfish, sablefish or halibut is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Species: All GROUNDFISH excluding SABLEFISH (Anoplopoma fimbria), PACIFIC HALIBUT (Hippoglossus stenolepis);

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Gear: Trap or Pot
Hook and Line

Licence Area: [redacted] s.20(1)(c)

Maximum Harvest Amount: 1800 Pounds *(Total for all Species in this group)*

Additional Descriptions: This groundfish fishery (other than sablefish and halibut) is limited to those species listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, excluding salmon and herring. Additional groundfish harvesting information and restrictions are provided in the Term and Conditions section of this licence document and must be adhered to when participating in fishing or transporting activities.

Fishing for groundfish, sablefish or halibut is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Species: EULACHON (Thaleichthys pacificus)

Gear: Seine Net, Beach
Dip Net
Hook and Line
Trap or Pot
Weir, Temporary
Trawl

Licence Area: [redacted]

Maximum Harvest Amount: 2800 Pounds

Additional Descriptions: **Allowable Harvest Areas for Eulachon:** [redacted]

Harvesting of eulachon is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Species: STELLER SEA LION (Eumetopias jubatus)

Gear: Rifle
Shotgun
Spear

Licence Area: [redacted]

Maximum Harvest Amount: 4 Individual Pieces

Additional Descriptions: [redacted]

Fishing is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Species: HARBOUR SEAL (Phoca vitulina) s.20(1)(c)

Gear: Rifle
Shotgun
Spear

Licence Area:

Maximum Harvest Amount: 10 Individual Pieces

Additional Descriptions:

Gear is subject to applicable federal and provincial laws.

Fishing is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Species: All SHELLFISH excluding ABALONES (Haliotidae);

Gear: Hand Picking
Trap or Pot
Dip Net
Trap, Hoop or Ring Net

Licence Area:

Additional Descriptions: The fishery is limited to those species listed in part II of Schedule I of the Pacific Fishery Regulations, 1993, during the term of this licence, with the exception of abalone which is closed for conservation. **For greater certainty, this licence does not authorize the harvest of abalone.**

No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace, or
(b) Red Rock Crab that measures less than 115mm in a straight line through the greatest breadth of the carapace.

For greater certainty, this licence does not authorize the harvest of bivalve shellfish in areas that are closed due to PSP or concerns of danger to public health.

Additional shellfish harvesting information and restrictions are provided in the Term and Conditions section of this licence document and must be adhered to when participating in fishing or transporting activities.

Fishing is authorized by this licence from 00:01 hours April 1 to 23:59 hours March 31.

Terms and Conditions:

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and

Document Released Under the Access to Information Act / Document divulgué en vertu

is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Transporting Harvest

The First Nation may designate persons to transport Fish harvested under the authority of this licence. The First Nation will issue each person so designated with a transport permit that will contain:
(a) The name of the person(s) transporting the Fish,
(b) The quantity and species to be transported,
(c) The date of transport (departure and arrival),
(d) The destination of the product,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(e) The vehicle and vehicle licence plate number or the vessel name and the Canadian Fishing Vessel (CFV) Licence number or Ministry of Transportation number, and
(f) The names of the individuals receiving the product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Field Supervisor, DFO Conservation & Protection, in Terrace (phone: 250-615-5357, fax: 250-615-5364, email: Wade.Larson@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Groundfish Dual Fishing Provisions:

The following definitions apply to this section:
"dual fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.
"dual fishing designation certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.
"unique identification number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.
"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.
"vessel master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial fishing vessel, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel master prior to the commercial fishing vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master and commercial fishing vessel (including the Vessel Registration Number) ;
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the commercial fishing vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the designated groundfish dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the name of the commercial fishing vessel (including the Vessel Registration Number), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of the validation;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

d) Fishing under the authority of this licence must occur in the area where this licence authorizes fishing.
e) The vessel master is responsible for recording fish retained under the authority of this licence in the Integrated Groundfish Fishing Logbook by set in the comments section.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Kitselas First Nation. The Kitselas First Nation will keep a record of all harvests under this licence and will provide such information to the DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, Phone: 250-627-3492, or Fax: 250-627-3427) on request.

If a fishing vessel is used for fishing under this licence, the Kitselas First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Fish Management Coordinator on completion of the fishing operations of that vessel.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e) in accordance with the other conditions,
set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

Designation of Individuals

The Kitselas Band Council has designated members of the Kitselas First Nation who have a valid Kitselas Band designation card to fish pursuant to this licence. Kitselas Band designation cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation card.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Prior to the fishery, the First Nation will provide the C&P Field Supervisor Wade Larson, DFO Conservation and Protection, in Terrace (phone: 250-615-5357 and fax 250-615-5364) with a list of the additional persons designated.

Designations are personal and non-transferable. Designation cards must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Kitselas Band designation card must be carried at all times by designated persons while participating in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca & patricia.demille@dfo-mpo.gc.ca, or by phone at 250-627-3499) at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the First Nation Fisheries Program and subject to 100% dockside validation by the First Nation Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Field Supervisor Wade Larson, DFO Conservation and Protection, in Terrace (phone: 250-615-5357, fax: 250-615-5364, email: Wade.Larson@df-mpo.gc.ca) at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

The following gear is permitted to be used for Salmon harvesting:

(a) Fish wheel;
(b) Gillnets, on condition that all gill nets and set nets are marked at both ends with a floating buoy clearly marked with the fisherman's name and designation number;
(b) Dip net;
(c) Hook and line, on condition that;
(i) (Proof) a designation card is carried when fishing in non-tidal waters.
(ii) Only single-point hooks are used in non-tidal waters for purposes of selective fishing.
(d) Seine gear;
(e) Trap or weir

All stationary fishing apparatus must be marked with a floating buoy clearly marked with the designated fisherman's name and designation number.

No salmon gear is to be left unattended in tidal waters.

A commercial fishing vessel with commercial seine gear may not be used to fish for food, social and ceremonial purposes six (6) hours before, during and twelve (12) hours after a commercial seine net opening in these areas.

A commercial fishing vessel with commercial gill net gear may not be used to fish for food, social and ceremonial purposes six(6) hours before, during and twelve (12) hours after a commercial gill net opening in these areas.

The following gear may be used maybe used for Groundfish harvesting:

a) Hook and line, and where long line gear is used, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation;
(b) Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

with the name of the participant and First Nation.

The following gear may be used for Eulachon harvesting:

(a) Dip net
(b) Weir
(c) Trap net,
(d) Hook and line
(e) Beach seine
(f) Trawl

Subject to closures and other conditions of this licence.

Any gear left unattended must be clearly marked with the name of the participant and First Nation.

The following gear may be used for Marine Mammal harvesting:

Subject to applicable Federal and Provincial laws, the following gear may be used:

(a) Rifle
(b) Shotgun
(c) Spear

Replaced due to Licence Issued with Amended Conditions Attached

Licence Issued: 05 April 2017

Licence Printed: 05 April 2017
Licence Issued By: MARISA KEEFE, Fisheries and Oceans Canada

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fisheries and Oceans Canada | Pêches et Océans Canada

Licence Number: XFSC 29 2017
Valid From: 01-Apr-2017
Expiry Date: 31-Mar-2018

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Species, Quantity of Fish, Area(s) and Gear and Terms and Conditions portion of this licence document.

Gear: Hand Picking
Dip Net
Trap, Hoop or Ring Net
Trap or Pot
Hook and Line

Licence Area:

Additional Descriptions: No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mmin a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

Ring net, on condition that:
(i) All individual nets are marked with a floating buoy clearly marked with the name of the participant and First Nation.
(ii) Where a number of nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the name of the participant and First Nation.
(ii) Where a number traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) Rigid frame traps with hinged lids: No designated fisherman shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater than #120 untreated cotton twine, such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No designated fisherman shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than #120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35 cm square.

No chemicals are allowed to be used in marine and intertidal areas.

For greater certainty, this licence does not authorize the harvest of bivalve shellfish due to the lack of biotoxin monitoring in Management Areas 1 to 10.

For greater certainty, this licence does not authorize the harvest of abalone.

Terms and Conditions:

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Transporting Harvest

The First Nation may designate persons to transport Fish harvested under the authority of this licence. The First Nation will issue each person so designated with a transport permit that will contain:
(a) The name of the person(s) transporting the Fish,
(b) The quantity and species to be transported,
(c) The date of transport (departure and arrival),
(d) The destination of the product,
(e) The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) Licence number or Ministry of Transportation number, and
(f) The names of the individuals receiving the product, and the amounts thereof.

Before transporting under this licence commences, the Kitsumkalum Band Council will provide the C&P Field Supervisor in Terrace (phone: 250-615-5357 and fax 250-615-5364) or C&P Detachment Supervisor in Prince Rupert, (phone: 250-627-3430 and fax: 250-627-3188), with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

1. The Kitsumkalum First Nation may engage in Dual Fishing only if the following conditions are met:
a) The Kitsumkalum First Nation designates the Vessel Master, commercial fishing vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

authority of this licence.
b) The Kitsumkalum First Nation issues a Dual Fishing Designation Certificate to the Vessel Master prior to the commercial fishing vessel participating in a commercial groundfish fishing trip. The Dual Fishing Designation Certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the Unique Identification Number of the Dual Fishing Designation Certificate.

2. While Dual Fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Licence must be landed at the same time and must be validated by the dockside service provider;
b) The Kitsumkalum First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Licence if a fishery guardian, a fisheries representative designated by the Kitsumkalum First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the Kitsumkalum First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including the VRN), the Vessel Master and the Dual Fishing Designation Certificate Unique Identification Number to the Kitsumkalum First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by set in the comments sections.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Kitsumkalum First Nation. The Kitsumkalum First Nation will keep a record of all harvests under this licence and will provide such information to the following DFO Fisheries Management Coordinators, on request:

Marine Mammals: Marine Mammals Coordinator, Vancouver (Phone: 604-666-9965, or Fax: 604-666-7712)

Groundfish: DFO Regional Manager, Groundfish Management Unit, Vancouver, (Phone: 604-666-9033, or Fax: 604-666-8525) or email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca

Eulachon: DFO Resource Management Biologist, Prince Rupert (Phone: 250-627-3457, or Fax: 250-627-3427)

Shellfish: Resource Management Shellfish Unit Biologist, Prince Rupert (Phone: 250-627-3477, or Fax: 250-627-3427)

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Kitsumkalum Band Council will provide DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, Phone: 250-627-3492, or Fax: 250-627-3427) a copy of the up-to-date harvest log, on Wednesday of each week.

If a fishing vessel is used for fishing under this licence, the Kitsumkalum First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Salmon:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

All salmon harvested and retained under this licence must be landed at a landing site designated by the Kitsumkalum First Nation within 72 hours of days fished.

Monitors will be present at designated landing sites when possible during fishing activity.

All Participants/Monitors must report to the Kitsumkalum Fisheries employee:
- the number and species of fish caught and released in the Fishery;
- the number and species of fish retained.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, a species of fish set out in this licence may be harvested under this licence,
(a) in the maximum specified quantities
(b) during the specified dates and times
(c) with the specified gear, identified or marked in accordance with the specified method
(d) at the specified locations, and
(e) in accordance with the other conditions.

Subject to closures and other conditions of this licence, the authority to fish each species set out in this licence will expire on the date specified or earlier if DFO, after consultation with the Kitsumkalum First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

Designation of Individuals

The Kitsumkalum Band Council will designate members of the Kitsumkalum First Nation to harvest fish under this licence by issuing them a Kitsumkalum Food, Social & Ceremonial Fishing Permit (the "Permit"). Indian Band Status cards are not acceptable proof of designation. The Kitsumkalum Band Council may designate other persons to fish under this licence by issuing them a Permit. All persons fishing under the authority of this licence must hold a valid Permit.

Prior to the Fishery, the Kitsumkalum First Nation will provide the C&P Field Supervisor in Terrace (phone: 250-615-5357 and fax 250-615-5364) or C&P Detachment Supervisor in Prince Rupert, (phone: 250-627-3430 and fax: 250-627-3188), with a list of the additional persons designated.

Permits are personal and non-transferable. Permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

areas and reporting requirements.

Permits must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Permits must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca & patricia.demille@dfo-mpo.gc.ca, or by phone at 250-627-3499) at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the First Nation Fisheries Program and subject to 100% dockside validation by the First Nation Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Designation of Vessels

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email: Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email: Wade.Norman@dfo-mpo.gc.ca) at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of

Document Released Under the Access to Information Act / Document divulgué en vertu de la

traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Expiry Date: 31-Dec-2017

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Terms and Conditions and Species Gear and Areas portion of this licence document.

Period of Activity:

s.20(1)(c)

Licence Area: [redacted]

Maximum Harvest Amount: 1050 Individual Pieces

Additional Descriptions: Only 100 Sockeye are permitted to be harvested [redacted]

[redacted]

Terms and Conditions:

General Provisions

This licence does not define an aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is issued to the Takla Lake Indian Band, for and on behalf of its members, and subject to the Fisheries Act and a regulations thereunder, confers the authority to fish under the following conditions:

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Definitions

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).
"First Nation" means the licence holder as identified under licence holder.
"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.
"Fishery" means fishing under the authority of this licence.
"Indian Status Card" means a photo identity card issued by the Department of Indian Affairs and Northern Development and entitled "Certificate of Indian Status".
"Participant" means an individual carrying on any fishing or fishing related activity, including transporting and landing fish, under the authority of this licence.
"Upper Sustut River" means that portion of the Sustut River from the confluence of the Sustut River and Johanson Creek to a point 500 meters downstream.

Dates and Times

Fishing is authorized by this licence 7 days each week from July 1 to September 30. Fishing dates and times are subject to amendment to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Licence Number: XFSC 3 2017
File Number: NCD-10-CL014-TAKLA
Valid From: 13-Jan-2017
Expiry Date: 31-Dec-2017

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e)in accordance with the other conditions,
set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

Gear and Gear Identification:

The following gear is permitted to be used for Salmon harvesting in the prescribed fishing area.

Gill net or set-net on condition that:
(i) No more that two thirds (2/3) of any waterway described in this licence is blocked by the net at any time; and
(ii) No one is permitted to fish more than one gill net or set-net;

Gaff with single point, permitted in the Upper Sustut River only;

Dip net.

All fishing gear must be clearly marked with the participant's name and Indian Status Card number or authorization letter number, as the case may be.

Designation of Individuals

The members of the First Nation are hereby designated to fish under the authority of this licence.

Designated persons must carry the documentation described herein at all times while participating in the Fishery or while transporting fish harvested in the Fishery. Designated persons who are members of the First Nation must carry a form of identification that documents their membership of the First Nation. Indian Status Cards are acceptable proof of designation. The Chief Councillor of the First Nation may designate additional persons to fish under the authority of this licence by issuing to them a letter of authoriztion.

A designated person must present, to any DFO fishery officer or fishery guardian, on request, a form of identification that documents their membership of the First Nation, their Indian Status Card, or their letter of authorization.

Designations are personal and non-transferable.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Licence Number: XFSC 3 2017
File Number: NCD-10-CL014-TAKLA
Valid From: 13-Jan-2017
Expiry Date: 31-Dec-2017

Catch Monitoring and Harvest Reporting

DFO and the First Nation will cooperate in the monitoring of the catch made further to this licence. Where fishing is carried out under this licence, the First Nation will provide DFO Fisheries Management contact Melanie Anthony in Smithers at (email: Melanie.Anthony@dfo-mpo.gc.ca or dfo.ncap-pacn.mpo@dfo-mpo.gc.ca, phone: 250-847-5108, fax: 250-847-4723) with final sockeye salmon catch and net counts by October 15.

Tag Recovery

The First Nation will provide all tag and radio tag recovery information to the DFO Fisheries Management contact Melanie Anthony at:
Department of Fisheries and Oceans
PO Box 578
3177 Tatlow Rd
Smithers, BC V0J 2N0
Telephone: 250-847-5108
Fax: 250-847-4723

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Licence Issued: 24 July 2017

Licence Printed: 24 July 2017

Additional Descriptions for Salmon:

Gill nets, on condition that:
(i) All gill nets and set nets are marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) All gill nets and set nets in tidal waters not clearly marked with a designated fisherman's name, name of band office and phone number or if designated fisher does not have a telephone a CB call sign may be used, will be considered by DFO to be unattended.

All stationary fishing apparatus must be marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.

No salmon gear is to be left unattended in non-tidal waters.

Species: All SHELLFISH excluding ABALONES (Haliotidae); s.20(1)(c)

Gear:
Hand Picking
Dip Net
Trap, Hoop or Ring Net
Trap or Pot
Hook and Line

Licence Area:

Additional Descriptions: No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

Ring net on condition that:
(i) nets are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.

Traps, on condition that:
(i) all individual traps are marked with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(ii) Where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the designated fisherman's name, name of band office and phone number. If designated fisher does not have a telephone number a CB call sign may be used.
(iii) Rigid frame traps with hinged lids: No designated fisherman shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater than #120 untreated cotton twine, such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No designated fisherman shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than #120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35 cm square.

No chemicals are allowed to be used in marine and intertidal areas.

For greater certainty, this licence does not authorize the harvest of bivalve shellfish due to the lack of biotoxin monitoring in Management Areas 1-10.

For greater certainty, the Communal Licence does not authorize the harvest of abalone.

Terms and Conditions:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Gitxaala

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

First Nation Council will issue each person so designated with a transport permit that will contain:
1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product (complete address),
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and fax: 250-627-3188) or Field Supervisor (phone: 250-627-3419 and fax: 250-627-3188) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel master prior to the vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including VRN), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the DFO Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by set in the comments sections.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Gitxaala First Nation. The Gitxaala First Nation will keep a record

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

of all harvests under this licence and will provide such information to the following DFO Fisheries Management Coordinators, on request:

Marine Mammals: Marine Mammals Coordinator, Vancouver (Phone: 604-666-9965, or Fax: 604-666-7712)

Groundfish: DFO Regional Manager, Groundfish Management Unit, Vancouver (Phone: 604-666-9033, or Fax: 604-666-8525)

Shellfish: Resource Management Shellfish Unit Biologist, Prince Rupert (Phone: 250-627-3007, or Fax: 250-627-3427)

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Gitxaala First Nation will provide DFO - AFS Resource Manager, Prince Rupert (Email: DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca, Phone: 250-627-3492, or Fax: 250-627-3427) a copy of the up-to-date harvest log, on Wednesday of each week.

If a commercial fishing vessel is used for fishing under this licence, the Gitxaala First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e) in accordance with the other conditions set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, the First Nation will notify DFO and make a request on the fish species they require.

Designation of Individuals

The Gitxaala First Nation Council has designated members of the Gitxaala First Nation who have a valid Gitxaala First Nation Permit to fish pursuant to this licence. Gitxaala First Nation Band permits are acceptable proof of designation.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

The Band Council may designate additional persons to fish under this licence by issuing to them a designation card/letter.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and fax: 250-627-3188) or Field Supervisor (phone: 250-627-3419 and fax: 250-627-3188) with a list of the additional persons designated. Designations are personal and non-transferable. Designation cards must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Gitxaala First Nation Band permit or designation/letter card must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels for Salmon Only – When Commercial Fisheries are occurring concurrently

If a designated person intends to use a vessel equipped with Commercial Fishing Gear to harvest FSC salmon, the Gitxaala First Nation's Fisheries Program Manager, or designate, must designate the fishing vessel in writing. The Gitxaala First Nation's Fisheries Program Manager, or designate, will provide a list of designated vessels to the DFO (DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca & patricia.demille@dfo-mpo.gc.ca, or by phone at 250-627-3499) at least twelve (12) hours prior to using the fishing vessel to harvest FSC fishery. Where the Gitxaala First Nation's Fisheries Program Manager, or designate, designates a vessel after this time, the Gitxaala Fisheries Program will advise DFO via email as soon as possible. This applies only when commercial openings occur simultaneously to the proposed FSC fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Failure to obtain a designation permit prior to FSC fishing will prohibit the vessel and or persons on board the vessel from being authorized to FSC fish for salmon under the authority of this licence six (6) hours prior to, during and twelve (12) hours after a commercial salmon opening.

When a vessel or person is designated by permit to FSC fish under this licence during a commercial opening, that vessel or person is not authorized to participate in the concurrent commercial salmon fishery opening. If the vessel or person designated to FSC fish chooses to participate in the commercial salmon fishery, the authorization for fishing under this licence is revoked and any fishing under this licence is a violation of the six (6) hours prior to, during or twelve (12) hours after condition as described in the Designation of Vessels for Salmon Only. This prohibition for simultaneous fishing applies regardless of the order of the fishing activity.

The vessel and individual designation as described under Designation of Individual and Designation of Vessels, must be carried on the vessel at all times while the vessel is being used to FSC harvest or while transporting FSC fish harvested 6 hours prior, during and 12 hours after the commercial salmon fishery. Proof of vessel or individual designation must be presented to any Fishery Officer or Fishery Guardian on request. Harvesters and catch are subject to inspection upon request of a Fishery Officer of Fishery Guardian.

All vessels must offload 100% of their catch. Fishers/vessels that choose to participate in the FSC fishery may not participate in the commercial net opening until the following calendar day. All landed catch of the designated vessels or persons must be validated by the Gitxaala Fisheries Program and subject to 100% dockside validation by Gitxaala Fisheries Program. Catch numbers are to be provided to the DFO AFS Resource Manager on Wednesday following the week's fishing activities. Failure to provide aggregated catch information to DFO will result in future opportunities for FSC harvest during concurrent commercial salmon openings being rescinded until such information is provided.

When the commercial salmon fishery is not open and subject to the terms and conditions listed above, fishing will be authorized as otherwise stated in the conditions of this licence.

Failure to comply with the above conditions will result in:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening".

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the Gitxaala Band Council must designate the commercial fishing vessel in writing and notify the C&P Detachment Supervisor (phone: 250-627-3430 and fax: 250-627-3188) or Field Supervisor (phone: 250-627-3419 and fax: 250-627-3188) at least 24 hours prior to using the commercial fishing vessel in the fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the commercial fishing vessel at all times while the commercial fishing vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon opening.

The following gear is permitted to be used for Shellfish harvesting:

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Licence Number: XFSC 30 2017
Valid From: 01-Apr-2017
Expiry Date: 31-Mar-2018

Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Licence Issued: 31 March 2017

Licence Printed: 31 March 2017
Licence Issued By: MARISA KEEFE, Fisheries and Oceans Canada

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fisheries and Oceans Canada | Pêches et Océans Canada

Licence Number: XFSC 4 2017
Valid From: 01-Apr-2017
Expiry Date: 31-Mar-2018

This licence is issued under the authority of SECTION 4 OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

This licence is not intended to define an Aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is subject to the *Fisheries Act* and regulations thereunder, and confers the authority to fish under the following conditions: Food, Social, and Ceremonial purposes.

Licence/Permit Activity Description:
Licence Holder may harvest during the periods further described in the Species, Quantity of Fish, Area(s) and Gear and Terms and Conditions portion of this licence document.

Licence Holder:

Additional Descriptions:

Species:	PINK SALMON (Oncorhynchus gorbuscha)
Life Stage:	Adult
Gear:	Fish Wheel Trap or Pot Weir, Carcass Weir, Juvenile Weir, Temporary Gillnet (unspecified) Hook and Line Dip Net Seine Net, Beach Trap, Salmon
Licence Area:	[redacted]
Maximum Harvest Amount:	1000 Individual Pieces

s.20(1)(c)

Additional Descriptions: **Additional Descriptions for Salmon:**

Hook and line, on condition that proof of Band membership is carried when fishing.

Gillnets, on condition that all gill nets and set nets are marked at both ends with a floating buoy clearly marked with the fisherman's name.

All stationary fishing apparatus must be marked with a floating buoy clearly marked with the designated fisherman's name.

No salmon gear is to be left unattended in tidal waters.

This licence does not authorize fishing for salmon with a gillnet or seine net 6 hours prior to, during and 12 hours following a commercial salmon net opening, unless DFO and the Lax Kw Alaams Band enter into alternative agreements which provides for simultaneous FSC fishing opportunities for salmon with gillnet or seine net under this licence while commercial salmon net fisheries are occurring. For greater certainty, DFO is committed to working with Lax Kw Alaams to provide fishing opportunities during commercial salmon net fisheries.

Species:	SABLEFISH (Anoplopoma fimbria)
Life Stage:	Adult
Gear:	Trap or Pot Hook and Line
Licence Area:	[redacted]
Maximum Harvest Amount:	1500 Pounds

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

s.20(1)(c)

Species: PACIFIC HALIBUT (Hippoglossus stenolepis)
Life Stage: Adult
Gear: Trap or Pot
Hook and Line
Licence Area: [redacted]
Maximum Harvest Amount: 25000 Pounds

Species: All GROUNDFISH excluding SABLEFISH (Anoplopoma fimbria), PACIFIC HALIBUT (Hippoglossus stenolepis);
Life Stage: Adult
Gear: Trap or Pot
Hook and Line
Licence Area: [redacted]
Maximum Harvest Amount: 1500 Pounds *(Total for all Species in this group)*
Additional Descriptions: Traps on condition that:
(i) All individual traps must be marked with a floating buoy clearly marked with the designated fisherman's name.
(ii) Where a number of traps are set on a line, and where longline gear is used, the line must be marked at both ends with a floating bouy clearly marked with the designated fisherman's name.

Species: STELLER SEA LION (Eumetopias jubatus)
Gear: Shotgun
Rifle
Spear
Licence Area: [redacted]
Maximum Harvest Amount: 6 Individual Pieces

Species: HARBOUR SEAL (Phoca vitulina)
Gear: Rifle
Shotgun
Spear
Licence Area: [redacted]
Maximum Harvest Amount: 12 Individual Pieces

Species: All SHELLFISH excluding ABALONES (Haliotidae);
Gear: Hand Picking
Trap or Pot
Hook and Line
Dip Net
Trap, Hoop or Ring Net
s.20(1)(c)
Licence Area: [redacted]
Additional Descriptions: No person shall catch and retain, or have in his possession, any:
(a) Dungeness Crab that measures less than 165mm in a straight line through the greatest breadth of the carapace; or
(b) Red Rock Crab that measures less than 115 mm in a straight line through the greatest breadth of the carapace.

For greater certainty, the Communal Licence does not authorize the harvest of abalone.

Species: NATIVE LITTLENECK CLAM (Leukoma staminea)
Gear: Rake
Hand Picking
Fork
Licence Area: [redacted]
Additional Descriptions: See Additional Information for specific harvest areas and restrictions.

Species: BUTTER CLAM (Saxidomus gigantea)
Gear: Rake
Hand Picking
Fork
Licence Area: [redacted]
Additional Descriptions: See Additional Information for specific fishing areas and restrictions.

Species: NUTTALL COCKLE (aka HEART COCKLE) (Clinocardium nuttallii)
Gear: Fork
Rake
Hand Picking
Licence Area: [redacted]
Additional Descriptions: See Additional Information for specific harvest areas and restrictions.

Additional Information:

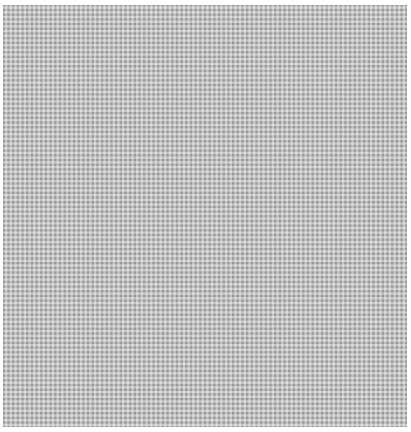
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Harvest Areas and Restrictions:

Fishing is not permitted in an area described in this licence unless the Canadian Food Inspection Agency recommends to the Regional Director General, Pacific Region, ("RDG") that the prohibition order respecting harvesting in that area be lifted and the RDG announces by "PUBLIC NOTICE" as described below that harvesting in that area is permitted.

The Parties agree to work together to identify the times, locations and methods whereby bivalves can be safely harvested. This may include the implementation of PSP assessment and monitoring procedures for specific harvesting times and locations. Always check for both PSP and Sanitary Contamination Closures if you plan on consuming any shellfish. Information on sanitary contamination (human and animal waste) closures, and in-season closures due to Paralytic Shellfish Poisoning (red tide) is available at the Prince Rupert DFO office by phone: (250) 627-3499, or call 1-866-431-3474 toll free, or on the Internet at: http//www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Fishing is permitted in the following areas:



s.20(1)(c)

Beaches being opened for the harvest of butter clams will be advertised with a description of the method for siphon removal within all public notices. PUBLIC NOTICE of BIOTOXIN and SANITATION results will be posted for food, social and ceremonial ("FSC") harvesters.

For greater certainty, this licence does not authorize the harvest of abalone.

Terms and Conditions:

Definitions

"Band" means the Lax Kw'alaams First Nation, which is represented by the Lax Kw'alaams Band Council.

"Indian Status Card" means a photo identity card issued by the Department of Indian Affairs and Northern Development and entitled 'Certificate of Indian Status'.

Definitions

"Commercial Fishing Gear" means power assisted gear commonly used in the commercial fishery including, but not limited to, hydraulic gurdies and trap haulers, powered drums, blocks or live rollers.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and is used to fish for a species of fish which is authorized by a commercial fishing licence (including a "communal commercial fishing licence" issued under the Aboriginal Communal Fishing Licences Regulations). This does not

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

include vessels without commercial fishing licences fishing for food, social and ceremonial ("FSC") purposes.

"Commercial Licence" means a category A, C, G, K, L, R, S, T or W commercial fishing licence issued under section 19(1) of the Pacific Fishery Regulations, 1993.

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).

"Designated Groundfish Dockside Observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"Dual Fishing" means fishing for and retaining fish under the authority of a licence issued under the Pacific Fishery Regulations, 1993 (a "Commercial Groundfish Licence") and under this licence on the same fishing trip.

"Dual Fishing Designation Certificate" means a document issued by the First Nation to fish groundfish under the authority of this licence that designates the vessel master and the commercial fishing vessel that may be used.

"First Nation" means the Organization identified under Licence Holder.

"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.

"Fishery" means fishing under the authority of this licence.

"Groundfish" means those species of fish listed in Part I of Schedule I of the Pacific Fishery Regulations, 1993, but does not include herring and salmon.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"PSP" means Paralytic Shellfish Poisoning.

"Shellfish" means those species of fish listed in Part II of Schedule I of the Pacific Fishery Regulations, 1993.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

"Unique Identification Number" means a unique number the aboriginal organization assigned to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"Vessel Master" means the Captain or Skipper, or any person having charge of the commercial fishing vessel.

"VRN" means Vessel Registration Number.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, a species of fish set out in this licence may be harvested under this licence,
(a) in the maximum specified quantities
(b) during the specified dates and times
(c) with the specified gear, identified or marked in accordance with the specified method
(d) at the specified locations, and
(e) in accordance with the other conditions set out in this licence.

Subject to closures and other conditions of this licence, the authority to fish each species set out in this licence will expire on the date specified or earlier if DFO, after consultation with the Lax Kw'alaams First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, the First Nation will notify DFO and make a request on the fish species they require.

Dual Fishing (Fishing for Groundfish for Commercial Purposes, and for Food, Social and Ceremonial Purposes)

1. The First Nation may engage in dual fishing only if the following conditions are met:
a) The First Nation designates the vessel master and the commercial vessel (including VRN), in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of this licence.
b) The First Nation issues a dual fishing designation certificate to the vessel master prior to the commercial fishing vessel participating in a commercial groundfish fishing trip. The dual fishing designation certificate must include:
i. the name of the vessel master, commercial fishing vessel (including VRN);
ii. the start and end date of the groundfish fishing trip;
iii. the amount of groundfish by species the vessel may land under the authority of this licence during the fishing trip;
iv. the licence number of this licence;
v. the name of the aboriginal organization that issued the dual fishing designation certificate, and
vi. the unique identification number of the dual fishing designation certificate.

2. While dual fishing under this licence:
a) Subject to subsection 2(b), all fish taken when fishing under the authority of this licence and a Commercial Groundfish Licence must be landed at the same time and must be validated by the dockside service provider;
b) The First Nation may request that fish taken under the authority of this licence be landed at a different time and location from the fish caught under the authority of the Commercial Groundfish Licence if a fishery guardian, a fisheries representative designated by the First Nation or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained;
c) The designated groundfish dockside observer, fishery guardian or fisheries representative designated by the First Nation, as the case may be, must record landed catch information by weight, species and piece count, the halibut tag numbers, the name of the vessel (including VRN), the vessel master and the dual fishing designation certificate unique identification number to the First Nation and to the Groundfish Management Unit at 604-666-8525 (fax) within seven days of validation;
d) Dual Fishing under the authority of this licence must occur only in the area where this licence authorizes fishing and must not occur in areas closed to fishing by the Commercial Licence.
e) Fish retained under the authority of this licence must be recorded in the Integrated Groundfish Fishing Logbook by set in the comments sections.

The following gear is permitted to be used for Shellfish harvesting:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(a) Hand picking, rake, shovel, dip net, and diving; and
(b) Ring nets, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of ring nets are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(c) Traps, on condition that:
(i) they are marked with a floating buoy clearly marked with the name of the participant and First Nation;
(ii) where a number of traps are set on a line, the line must be marked at both ends with a floating buoy clearly marked with the name of the participant and First Nation.
(iii) All traps must be fitted with the following escapement mechanisms:
No participant shall fish with rigid framed traps with hinged lids, unless the trap lid is secured by a loop of no greater that # 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord must be attached to the hook by a cow hitch. If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap.
(iv) All other traps without hinged lids: No participant shall use a non-hinged lid trap, unless it has a section in a side wall or panel that has been laced, sewn or otherwise secured by a single strand of no greater than # 120 untreated cotton twine that on deterioration or parting produces in the wall of panel, an opening a minimum of 35cm square.

No chemicals are allowed to be used in marine or inter-tidal areas.

Prawn & Shrimp:
The harvest of prawn and shrimp with a Commercial Fishing Vessel or Commercial Fishing Gear is not permitted. Should the First Nation be interested in using a Commercial Fishing Vessel or Commercial Fishing Gear to harvest prawns for FSC purposes please contact the local DFO Resource Manager. DFO will request details about how this will occur, including when and where fishing will take place, which and how many boats will be used, the number of traps (and marking), how the fishery will be monitored and catch reported, and the amounts to be harvested. DFO will review the details, discuss it with the First Nation, and work towards agreement. This information will allow DFO to issue a supplemental communal licence that authorizes the use of a Commercial Fishing Vessel or Commercial Fishing Gear in a First Nations' communal (FSC) fishery.

Sanitary and Biotoxin Closures:
For greater certainty, the collection of bivalves from areas in closed status for sanitary contamination under the Management of Contaminated Fisheries Regulations is not authorized by this licence. Many areas along the BC coast are not monitored and therefore remain closed. Always check for both Bivalve Shellfish Biotoxin (PSP/red tide, ASP, DSP) and Sanitary (Emergency, Seasonal, Annual) Contamination Closures if you plan on harvesting and consuming any shellfish. Information on in-season openings and closures due to biotoxin and sanitary contamination is available at local DFO offices, by calling the toll-free information line at 1-866-431-3474, or on the Internet at http://www.pac.dfo-mpo.gc.ca/fm-gp/contamination/index-eng.htm.

Bivalves:

Lax Kw'alaams will maintain a Community Harvest Plan to manage the community bivalve harvest. The Lax Kw'alaams Fisheries Program will monitor the fishery and provide Fisheries and Oceans Canada with a copy of the Community Harvest Plan prior to the start of the fishery.

Catch monitoring will include harvesters name, date of harvest, amount harvested (lbs.), catch report will be forwarded at the end of month with catch reports to the Resource Management Shellfish Unit at the Department of Fisheries and Oceans.

On-site monitoring coverage will be done at all harvest locations every harvest tide by Lax Kw'alaams Fisheries Program.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the Lax Kw'alaams Band Council. The Lax Kw'alaams First Nation will keep a record of all harvests under this licence and will provide such information to the following DFO Fisheries Management Coordinators, on request:

Marine Mammals: Marine Mammals Coordinator, Vancouver (Phone: 604-666-9965, or Fax: 604-666-7712)

Groundfish: DFO Regional Manager, Groundfish Management Unit, Vancouver (Phone: 604-666-9033, or Fax: 604-666-8525)

Shellfish: Resource Management Shellfish Unit , Prince Rupert (Phone: 250-627-3455, or Fax: 250-627-3427)

Salmon: Where, during a week, harvesting of salmon is carried out under this licence, the Lax Kw'alaams Band will provide AFS Resource Manager (Phone: 250-847-5108, Fax: 250-627-3427, or emai: dfo.ncap-pacn.mpo@dfo-mpo.gc.ca) a copy of the up-to-date harvest log, on Wednesday of each week.

If a fishing vessel is used for fishing under this licence, the Lax Kw'alaams First Nation will provide information respecting the species and quantity of fish harvested by the vessel to the applicable Resource Management Manager on completion of the fishing operations of that vessel.

Transporting Harvest

The First Nation may designate persons to transport fish outside of Lax Kw'alaams traditional area harvested under the authority of this licence. The Lax Kw'alaams Band Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) Licence number or MOT number,

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and fax 250-627-3188) or Field Supervisor (phone: 250-627-3401 and fax: 250-627-3188) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Designation of Individuals

The Lax Kw'alaams Band Council has designated all valid members of the Lax Kw'alaams First Nation who have an Indian Status Card to fish under this licence. Indian Status Cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation permit.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Designations are personal and non-transferable. Designation permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Lax Kw'alaams First Nation Indian Status Card or a designation permit must be carried at all times by designated persons while participating in the Fishery or while transporting fish harvested in the Fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Vessels

If a person designated to fish intends to use a vessel equipped with Commercial Fishing Gear to participate in the Fishery for species other than prawn and shrimp, for which a supplemental communal licence is required, the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email: Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email: Wade.Norman@dfo-mpo.gc.ca) at least twenty-four (24) hours prior to using the commercial fishing vessel in the fishery. Where the Fisheries Program Manager, or designate, designates a vessel after this time, the Fisheries Program will advise DFO via email as soon as possible. Vessel designations must set out the fishing times, areas, and gear authorized by this licence. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Subject to salmon conditions below, fish harvested under this licence must be unloaded from a commercial fishing vessel at least six (6) hours prior to participating in a commercial fishery. Commercial fishing vessels participating in the Fishery must be available for inspection prior to engaging in a commercial fishery. No fish harvested under the authority of this licence may be on board a vessel engaged in commercial fishing operations, except for commercial fisheries with 100% dockside monitoring and are quota based.

A commercial fishing vessel shall not be used to fish, transport or be used as storage for salmon under the authority of this licence six (6) hours prior to, during or twelve (12) hours after a commercial salmon net opening (unless directed by DFO).

Definitions

"Band" means the First Nation.

"Commercial Fishing Vessel" means a vessel that is registered according to the Pacific Fishery Regulations, 1993 and which is used to fish for a species of fish which is authorized by a commercial fishing licence (including commercial licences under the Aboriginal Communal Fishing Licences Regulations). This does not include non-licenced vessels fishing for food, social and ceremonial purposes.

"DFO" means Department of Fisheries and Oceans.

"First Nation" means First Nation noted as a licence holder in this licence.

"Fishery" means fishing under the authority of this licence.

"Indian Status Card" means a photo identity card issued by the Aboriginal Affairs and Northern Development Canada and entitled 'Certificate of Indian Status'.

"Management Area" means a management area as defined in the Pacific Fishery Management Area Regulations.

"Non Commercial Fishing Vessel" means a vessel that is not commercially licenced.

"Subarea" means a Subarea as defined in the Pacific Fishery Management Area Regulations.

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Designation of Vessels

If the harvester is intending to use a commercial or non commercial fishing vessel to participate in the fishery the First Nation must designate the vessel in writing and notify the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) at least 24 hours prior to using the vessel in the fishery. Vessel designations must set out the fishing times, areas, and gear authorized by this licence.

The vessel designation must be carried on the vessel at all times while the vessel is being used in the fishery or while transporting fish harvested in the fishery. Proof of vessel designation must be presented to any Fishery Officer or Fishery Guardian on request.

Designation of Individuals

The First Nation has designated all members of the First Nation who have a Band Indian Status Card for the licence holder noted in this licence to fish under this licence. Band Indian Status Cards are acceptable proof of designation. The Band Council may designate additional persons to fish under this licence by issuing to them a designation permit.

Prior to the fishery, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) with a list of the additional persons designated.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Designations are personal and non-transferable. Designation permits must contain details of this licence including the name of the designated participant, the species that may be caught, harvesting times, maximum quantities, fishing gear, fishing areas and reporting requirements.

A Band Indian Status Card for the licence holder in this licence or a designation card must be carried at all times by designated persons while participating in the fishery or while transporting fish harvested in the fishery. Proof of designation must be presented to any Fishery Officer or Fishery Guardian on request.

Transporting Harvest

The First Nation may designate persons to transport fish harvested under the authority of this licence. The Band Council will issue each person so designated with a transport permit that will contain:

1. The name of the person(s) transporting the fish,
2. The quantity and species to be transported,
3. The date of transport (departure and arrival),
4. The destination of the product,
5. The vehicle and vehicle licence plate number or the vessel name and the Vessel Registration Number (VRN) licence number or MOT number,
6. The names of the individuals receiving product, and the amounts thereof.

Before transporting under this licence commences, the First Nation will provide the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca) with a list of the persons designated to transport and their transport permit number.

Transport permits must be carried at all times by designated persons transporting product harvested in the fishery. Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits are personal and non-transferable.

Catch Monitoring and Harvest Reporting

Catch monitoring will be conducted by DFO and the First Nation. The First Nation will keep a record of all harvests under this licence. Where, during a week, harvesting of herring spawn on seaplants or boughs is carried out under this licence, the First Nation will provide to the DFO AFS Resource Manager (phone: 250-847-5108 phone or email: Melanie.Anthony@dfo-mpo.gc.ca or DFO.NCAP-PACN.MPO@dfo-mpo.gc.ca) or upon request by the C&P Prince Rupert Detachment Supervisor (phone: 250-627-3430 and email Patricia.Demille@dfo-mpo.gc.ca) or Field Supervisor (phone: 250-627-3401 and email Wade.Norman@dfo-mpo.gc.ca), a copy of the up to date harvest log, on Wednesday of each week.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

General Provisions

This licence does not define an aboriginal right to fish or its scope; however, for the fishing season, it is intended to provide a mechanism, for reasons of proper management and control of the fisheries and conservation and protection of fish, for requiring compliance with the provisions of this licence.

This licence is issued to the Lake Babine Indian Band for and on behalf of Fort Babine, Old Fort, Tachet, Donald's Landing, Woyenne and their members, all of whom it represents. Subject to the Fisheries Act and regulations thereunder, this licence confers the authority to fish under the following conditions:

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Definitions

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).
"First Nation" means the licence holder as identified under licence holder.
"First Nation Fisheries Technician" means an employee of the First Nation hired to assist in the monitoring and regulation of the Fishery.
"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.
"Fishery" means fishing under the authority of this licence.
"Indian Status Card" means a photo identity card issued by the Department of Indian Affairs and Northern Development and entitled "Certificate of Indian Status".
"LBN" means Lake Babine Nation.
"Participant" means an individual carrying on any fishing or fishing related activity, including transporting and landing fish, under the authority of this licence.
"Transport Permit" means the Lake Babine Nation Transport Permit issued by the First Nation.

Dates and Times

Fishing is authorized by this licence 7 days each week from June 1 to November 30. Fishing dates and times are subject to amendment to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e)in accordance with the other conditions,
set out in this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

The following gear is permitted to be used for Salmon harvesting in the prescribed fishing area.

(a) Fish wheel;
(b) Gill nets;
(c) Set-nets;
(d) Dip net;
(e) Beach seine;
(f) Trap or weir;
(g) Rod and reel angling gear with single point hook

All fishing gear must be clearly marked with the participant's name and Band number or Designation Card number, as the case may be.

Designation of Individuals

Designated persons must carry the documentation described herein at all times while participating in the Fishery or while transporting fish harvested in the Fishery. Designated persons who are members of the First Nation must carry a form of identification that documents their membership of the First Nation. Designated persons who are members of the First Nation must carry an Indian Status Card. Designated persons who are not members of the First Nation must carry a designation card issued to them by the Lake Babine First Nation.

A designated person must present, to any DFO fishery officer, DFO fishery guardian, or the First Nation Monitor, on request, a form of identification that documents their membership of the First Nation, their Indian Status Card, or their designation card.

Designations are personal and non-transferable.

Transporting Harvest

A participant shall not transport fish caught pursuant to this license without a transport permit unless:
(a) the participant is bringing the fish from the original landing site to the participant's residence, or
(b) the participant is bringing the fish to a gathering place established by the LBN.

Responsibilities of the Transporter

While transporting fish caught pursuant to this licence, a participant must:
(a) Carry a copy of his/her Transport Permit and comply with its terms;
(b) Carry identification sufficient to establish his or her name and place of residence; and
(c) Produce the Transport Permit and personal identification on the request of any fishery officer, fishery guardian, or other peace officer.

General Salmon Conditions:

No one is permitted to fish more than one gillnet or set-net. s.20(1)(c)

Terms and Conditions:

General Provisions:

This licence is issued jointly to the Gitksan Watershed Authorities and the Wet'suwet'en Treaty Office Society listed in Schedule "A" for and on behalf of their members. The Houses have appointed the Gitksan Watershed Authorities and the Wet'suwet'en Treaty Office Society their agent for the purpose of carrying out the obligations of the Houses pursuant to this licence. Subject to the Fisheries Act and regulations thereunder, this licence confers the authority to fish under the following conditions:

Use of Fish

Fish caught under this licence are for food, social and ceremonial purposes. Without prejudice to future agreements or regulations, sale of Fish caught under this licence is not permitted.

Compliance with the Fisheries Act

Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the Fisheries Act and the regulations made under the Act is a condition of this licence.

Definitions

"DFO" means Fisheries and Oceans Canada (formerly Department of Fisheries and Oceans).
"First Nation" means the licence holder as identified under licence holder.
"Fish" means those species of fish listed in Parts I & II of Schedule I of the Pacific Fishery Regulations, 1993, including herring spawn.
"Fishery" means fishing under the authority of this licence.
"GWA" means the Gitksan Watershed Authorities.
"GWA Monitor" means a person hired by the GWA to carry out monitoring activities pursuant to this licence.
"GWA Ranger" means an individual selected by the GWA and appointed as a fishery guardian by the Minister of Fisheries and Oceans pursuant to section 5 of the Fisheries Act.
"Indian Status Card" means a photo identity card issued by the Department of Indians Affairs and Northern Development and entitled 'Certificate of Indian Status'
"Licence" means any type, kind or category of licence as defined in the Fishery (General) Regulations.
"Participant" means an individual carrying on any fishing or fishing related activity, including transporting and landing fish, under the authority of this licence.
"Transport Permit" means the Skeena Fisheries Commission Aboriginal Fishery Transport Permit issued by the GWA or the Wet'suwet'en Treaty Office Society.
"Wet'suwet'en" means the Wet'suwet'en Treaty Office Society.
"Wet'suwet'en Monitor" means a person hired by the Wet'suwet'en Treaty Office Society to carry out monitoring activities pursuant to this licence.
"Wet'suwet'en Ranger" means an individual selected by the Wet'suwet'en Treaty Office Society and appointed as a fishery guardian by the Minister of Fisheries and Oceans pursuant to section 5 of the Fisheries Act.

Dates and Times:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Fishing is authorized by this licence 7 days each week from April 1 to March 31. Fishing dates and times are subject to amendment to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations.

Species, Quantity of Fish, Area(s), Dates, Times, Gear and Gear Identification

Subject to amendments to the conditions of this licence and subject to close times as may be varied by the Director-General, Pacific Region, DFO in accordance with the Fishery (General) Regulations, species of fish set out in this licence may be harvested under this licence,

(a) in the maximum specified quantities,
(b) during the specified dates and times,
(c) with the specified gear, identified or marked in accordance with the specified method,
(d) at the specified locations, and
(e) in accordance with the other conditions,
set out in this licence.

Subject to closures and other terms and conditions of this licence, the authority to fish each species set out on this licence will expire on the date specified or earlier if DFO, after consultation with the First Nation, has determined that the maximum quantity for the species has been reached.

This licence is for a maximum quantity for the term of this licence, for management purposes only, and is without prejudice to maximum quantities in future years. Should the First Nation reach their maximum specified quantities and require more, DFO will enter into discussions with the First Nation on the fish species they require.

The following gear is permitted to be used for Salmon harvesting:

(a) Fish wheel;
(b) Gill nets;
(c) Set-nets;
(d) Dip net;
(e) Gaff with single point;
(f) Beach seine;
(g) Trap or weir;
(h) Rod and reel angling gear with single point hook

All fishing gear must be clearly marked with the participant's name and Band number or Designation Card number, as the case may be.

No one is permitted to fish more than one gillnet or set-net.

Designation of Individuals

Designated persons must carry the documentation described herein at all times while participating in the Fishery or while transporting fish harvested in the Fishery. Designated persons who are members of a Gitksan House must carry a form of identification that documents their membership in a Gitksan House. Designated persons who are members of a Wet'suwet'en House must carry an Indian Status Card.

Designated persons who are not members of a Gitksan House or a Wet'suwet'en House must carry a designation card. A designated person must present, to any DFO fishery officer, DFO fishery guardian, GWA Ranger, GWA Monitor, Wet'suwet'en Ranger, or Wet'suwet'en Monitor on request, a form of identification that documents their membership in a Gitksan or a Wet'suwet'en House, their Indian Status Card, or their designation card.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Designations are personal and non-transferable.

Transporting Harvest

A participant shall not transport fish caught pursuant to this license without a transport permit unless:
(a) the participant is bringing the fish from the original landing site to the participant's residence, or
(b) the participant is bringing the fish to a gathering place established by the GWA or the Wet'suwet'en Treaty Office Society.

While transporting fish caught pursuant to this licence, a participant must:
(a) Carry a copy of his or her Transport Permit;
(b) Carry identification sufficient to establish his or her name and place of residence; and
(c) Produce the Transport Permit and personal identification on the request of any GWA or Wet'suwet'en Ranger, DFO Fishery Officer, Fishery Guardian, or other peace officer.

Transport permits must be carried at all times by designated persons transporting product harvested in the Fishery.

Transport permits must be presented to any Fishery Officer or Fishery Guardian on request. Transport permits arepersonal and non-transferable.

Catch Monitoring and Harvest Reporting

DFO, the GWA and the Wet'suwet'en Treaty Office Society will cooperate in the monitoring of the catch made further to this licence. Where, during a week, fishing is carried out under this licence, the GWA and Wet'suwet'en Treaty Office Society will provide DFO Fisheries Management in Smithers (Melanie.Anthony@dfo-mpo.gc.ca and dfo.ncap-pacn.mpo@dfo-mpo.gc.ca, phone 250-847-5108, fax 250-847-4723) with net counts and catch information by Wednesday of the following week.

This information will include:
a) The total number of nets fished,
b) total hours fished,
c) total catch by species,
d) total catch by area, and
e) catch monitoring and catch data of chinook salmon at the Bulkley River Falls to be reported separately.

Tag Recovery

The Gitksan Watershed Authorities and Wet'suwet'en Treaty Office Society will submit all tags and radio tags and/or recovery information to the nearest DFO office.

CRAB Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FR 3 2017

CRAB Licence 2017 Date Issued: 06 Jul 2017

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2018

Licence Holder:
FIN: 100409
SECRETARIAT OF THE HAIDA NATION
504 NAANII ROAD
PO BOX 589
MASSET BC
V0T 1M0

Designated Vessel:
VRN 29365
DOT C02091BC
Vessel SEA REBEL
Vessel OAL 10.65 Meters
Gross Tonnage 25.47 Cubic Meters
Net Tonnage 19.81 Cubic Meters

Reported Vessel Owner: s.19(1)
FIN: [redacted]
NOEL JAMES STEWART-BURTON
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Quota: 600 Traps

Licence Area: CRAB AREA A

Waters in which fishing is permitted: Areas 1, 2, 101 to 110, 130 and 142

Species: CRAB

Gear: TRAP

SPECIES: DUNGENESS, RED ROCK, GOLDEN KING & RED KING

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 06 Jul 2017

Licence Serial No.: 425701

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Version Date: 19-Dec-2016

CONDITIONS OF COMMUNAL CRAB AREA A LICENCE Licence
Period: January 1, 2017 to March 31, 2018
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Information on management of the crab fishery is contained in the current Crab by Trap Integrated Fisheries Management Plan (IFMP), available upon request to the Regional Crab Manager, Tel: 250-627-3455. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for crab and octopus.

Definitions

"Approved Service Provider" means Ecotrust Canada, (250-624-4191). This service provider has been approved to provide Biological Sampling, Electronic Monitoring, Harvest Logbook, Hail, and Summary Reporting Services to Crab Area "A" licensed commercial harvesters.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

Document Released Under the Access to Information Act / Document divulgué en vertu de la loi

"Briarosaccus callosus" is a parasite identified by a reddish-brown, 1 to 2 cm diameter capsule(s), which is the egg sac of the parasite, located under the abdomen (i.e. where the crab eggs would normally be carried).

"Department (DFO)" means the Department of Fisheries and Oceans.

"Electronic Monitoring (EM) system" means an electronic-based monitoring system which may be used as an alternative to at-sea observers. An approved Crab Area "A" electronic monitoring system must include a camera(s) and accurately monitor vessel activity (location, date, time, and speed), trap hauling activity, and individual traps hauled on board, in accordance with standards set out in Appendix 9 of the Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455. "harvest log" means the record of fishing activities required to be kept under these conditions of licence.

"landing" means the transfer of fish from the licensed vessel in water to land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"soft-shell crab" means a crab whose shell is not fully hardened and yields to finger pressure. A crab with a durometer measurement of 70 units or less is defined as a soft-shell crab. Crabs shall be measured for soft-shell in front of the suture line on the underside of the carapace between the insertion of the leg bearing the claw and the widest point of the shell.

"soft-shell management area" means those areas defined and enumerated in the current Crab by Trap Integrated Fisheries Management Plan.

"trap" includes ring nets.

"vessel master" means the person present on the vessel and identified as master in the hail out (see s.13(3)(a)) who has overall and ongoing responsibility for the operation of the vessel and fishing activities.

"vessel registration number (VRN)" means the number assigned to a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Subject to the conditions of this licence:

(1) The following species of fish may be taken: (a) Dungeness Crab (Cancer magister); (b) Red Rock Crab (Cancer productus); (c) Red King Crab (Paralithodes camtschatica); (d) Golden King Crab (Lithodes aequispinus); and (e) Octopus (Octopus spp.).

(2)(a) No person shall catch and retain or possess any female crab unless the crab is infected by the parasite Briarosaccus callosus and is being brought ashore to avoid the further spread of that parasite.

(b) Dungeness Crab found with this parasite shall be frozen and shipped to Gary Meyer at the Pacific Biological Station. Call 1-250-756-7034 for instructions.

(3) No person shall catch and retain or possess any soft-shell crab.

(4) No person shall catch and retain octopus caught in octopus closure areas. All octopus shall be immediately released in a manner that will cause the least harm.

2. Size of fish permitted to be taken:

(1) No person shall catch and retain: (a) a Dungeness Crab that is less than 165 mm in width; or (b) a Red Rock Crab that is less than 115 mm in width.

(2) Each fisher shall ensure that their measuring gauge is accurate.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

(1) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

guardian.

(2) Designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsection 6(2), fishing is permitted in Areas 1, 2, 101 to 110, 130, and 142.

(2) Fishing for crab is permitted in an area and with a gear type authorized in Part 1 during those times when persons fishing under authority of a Category R licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for crab, with that gear, in that area and during that time.

7. The type, size and quantity of fishing gear permitted to be used:

(1) Trap gear, which includes ring net gear, is permitted to be used. Traps shall include the following:

(a) Biodegradable Escapement Mechanisms: Each trap shall be equipped with a biodegradable escape mechanism in the form of either a rot cord, rot panel or rot panel alternative as described below. These mechanisms are designed to minimize the effects of ghost fishing by traps. This requirement does not apply to ring nets.

(b) Rot cord: Rot cords may only be used on traps with a rigid frame, a freely opening hinged lid, and a volume less than 400 litres. (400 litres is approximately equal to a circular trap 117 cm in diameter and 36 cm in height.) The trap lid shall be secured by a loop of no greater than No. 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord shall be attached to the rubber strap by a cow hitch and attached to the hook by a cow hitch (see the current Crab

Document Released Under the Access to Information Act / Document divulgué en vertu de la

by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3455, for an illustration of how to attach the rot cord.) If the hook is attached permanently to the trap, the trap lid shall close using a single loop of the rot cord from the rubber strap. The rubber strap shall be under tension. No other fastenings may impede the hinged lid of the trap from opening. The opening created by the hinged lid shall exceed the rot panel requirement for the area or exceed the size of the largest trap entrance.

(c) Rot Panel: All 400-litre traps or traps without hinged lids secured by a rot cord shall have a rot panel. The rot panel consists of a section in a trap side wall that has been laced, sewn or otherwise secured by a single strand of no greater than No. 120 untreated cotton twine such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted opening in the wall or panel. The opening shall exceed a square 11 cm by 11 cm.

(d) Rot Panel Alternative: Traps requiring a rot panel may use the following alternative for soft web traps only. A trap side wall shall contain a cut in the web greater than 20 cm in length. The cut shall be made in a "V" pattern with each leg of the "V" greater than 11 cm in length. A single strand of no greater than No. 120 untreated cotton twine shall be used to lace the cut in the web such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted triangular opening no less than 11 cm on each side.

(e) Escape Hole: all traps shall be fitted with at least two escape holes which are located not more than 100 mm below the top of the frame. Both escape holes shall not be less than 105 mm in diameter.

(2) Subject to subsection 7(3), the maximum number of traps permitted to be fished is set out in the licence.

(3) The maximum number of traps permitted to be fished in McIntyre Bay between 00:01 h January 1, 2017 and November 1, 2017 and 00:01 h January 1, 2018 and March 31, 2018 is one-half the total trap allocation indicated on the vessel licence. McIntyre Bay is defined as those portions of Subareas 1-5 and 101-4 to 101-10 that lie east of the meridian passing through 132ø04' west longitude, and west of the meridian passing

Document Released Under the Access to Information Act / Document divulgué en vertu de la

through 131ø30' west longitude, except for that portion of Subarea 101-10 that lies southeasterly of a line that begins at 54ø09'N and 131ø40'W [Rose Spit] then to 54ø12'N and 131ø38'W then to 54ø14.9'N and 131ø30.7'W.

(4) The maximum size of traps that may be used to fish for Dungeness Crab is 400 litres.

8. Manner in which gear is permitted to be used:

(1) No person shall set a trap and leave the trap in the water for more than 18 consecutive days without lifting the trap from the water and removing all of the crab from it.

(2) All crab traps, lines and buoys used by this vessel shall be transported by the licensed vessel to and from land.

(3) Ring Net gear only may be fished in Subarea 1-4 (Naden Harbour).

(4) All radio frequency identification (RFID) chips shall be scanned by the on-board tag reader immediately upon removal from the water.

9. Buoys, lines, trap lines and groundlines:

(1) Buoys shall be greater than 12 cm in diameter and have a volume greater than 2.5 litres. This is approximately equivalent to a cylinder 12 cm in diameter and 22 cm in length or a sphere 17 cm in diameter.

(2) A unique buoy colour combination shall be registered with the Department at the time of licence renewal. A colour photograph is required. Only the colour combination registered with the Department in conjunction with this licence is permitted to be used under this licence.

(3) All buoy lines shall be non-floating so that the lines remain below the surface of the water in order to minimize navigational hazards.

(4) A single buoy and buoy line shall be attached to each trap. Traps shall not be connected to each other with lines.

10. Marking of traps and buoys with tags:

(1) Subject to subsection 10(2), all crab traps fished under the authority of

Document Released Under the Access to Information Act / Document divulgué en vertu de l'

this licence shall be marked with a tag that meets the requirements of the Department.

(2) If the licensed vessel is using an EM system:

(a) all buoys attached to crab traps fished shall be marked with a radio frequency identification (RFID) chip.

(3) If the vessel is not using an EM System:

(a) only traps marked with crab trap tags that have been reported and registered to be fished are permitted to be on board the licensed vessel during the period when crab fishing is open;

(b) only those crab trap tags that have been reported and registered to be fished may be attached to traps, with the exception of trap tags noted below; and (c) if a new set of crab trap tags is issued, they should be affixed to the trap as soon as possible and shall be affixed to the trap within 18 days of issuance. Old crab trap tags shall be removed and destroyed.

(4) All crab traps fished shall be marked with the vessel registration number of the licensed vessel. To mark a trap with the vessel registration number either:

(a) engrave the number on the escape hole strut or on the tunnel; or (b) attach a brightly coloured plastic tag with the vessel registration number on it to the trap.

11. Radio Frequency Identification (RFID) Chips:

(1) All crab buoys fished shall be marked with a Radio Frequency Identification (RFID) chip registered in the vessel's RFID chip inventory for this licence period (see 11(6)(b)), which shall consist of a set of Main RFID chips equal to their trap limit, plus a secondary set of spare chips equal to 10 percent of their trap limit to allow for replacements.

(2) Only those RFID chips that have been reported and registered to be fished shall be placed on buoys.

(3) The vessel master shall scan every RFID chip as the buoy is hauled

Document Released Under the Access to Information Act / Document divulgué en vertu de

on board. If an RFID chip fails to be read, that buoy shall be removed immediately from the water until the chip is either repaired or replaced.

(4) If buoys lost by this vessel have been replaced and these same buoys are later found, the vessel master is responsible for removing the lost buoys with the RFID chips from the water.

(5) When a buoy is taken out of the water and replaced, the vessel master is responsible for switching the RFID chips so that all buoys in the water are fitted with RFID chips in that vessel's inventory for the current year.

(6) For the licensed vessel using an EM system, the vessel master shall arrange the following with the approved service provider:

(a) RFID chip procurement, distribution, administration, and data entry services; and

(b) Update the vessel's entire RFID chip inventory at the beginning of the fishing season, including a number of "Main" chips equal to or less than the trap limit and a number of "Spare" chips equal to or less than 10 percent of the trap limit. These RFID chip numbers shall be entered into a database and submitted to the Department within the first 30 days of fishing for the this licence period. When the vessel master scans RFID chips not previously registered in the vessel's inventory for the current fishing season, the vessel's inventory shall be updated and submitted to the Department within 30 days of scanning the new RFID chips. If the vessel master scans a number of RFID chips greater than the 10 percent allowance for "spare" chips, these RFID chips shall be classified in the vessel's inventory as "over-limit" chips.

12. Records - Harvest Log and Fishing Location Information: (see explanatory note after section 19)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department in accordance with the timing set out in subsection 12(7). The content and format of the log (paper and electronic) shall meet the requirements as defined by Fisheries and Oceans Canada Marine Ecosystem and Aquaculture Division's Shellfish Data Unit.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) The harvest and fishing location information recorded in the harvest log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the harvest log not later than midnight of that day.

(4) The vessel master shall enter latitude/longitude co-ordinates in the location field of the harvest log for each trap or group of traps. A group is defined as single traps in a distinct area (e.g. a bay) not crossing an Area or Subarea boundary with no two traps more than 0.5 nautical miles (1 km) apart. The vessel master shall:

(a) In the case of a group of traps, record a new line of harvest information with a new latitude/longitude coordinate pair to represent the centre point of the group of traps; and (b) Record Latitude/longitude coordinate pairs using degree decimal minute format, with information provided to the third decimal point.

(5) The vessel master shall enter their Fishing Identification Number, (Vessel Master FIN) from their Fisher Registration Card (FRC) in the space provided at the top of each harvest log page.

(6) The harvest log shall be kept on board the licensed vessel.

(7) The harvest log shall be produced for examination on demand of a fishery officer or an observer.

(8) The licence holder shall ensure the completed log pages (original copy) and electronic copy of the log are forwarded not later than 28 days following the end of each month in which fishing occurred to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that fishing does not occur under authority of this licence, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log; the licence holder shall sign the nil report.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

This report may contain data rated up to Protected A.
Do not release this data to external parties.

13. Fishing Activity Location Reports (Hails):

(1) The vessel master shall arrange with the approved service provider to have fishing activity location reports (Hails) entered into the DFO Hail Database.

(2) The vessel master shall provide the following information:

(a) vessel name and registration number, vessel master's name and fisher identification number; (b) the date and time the report was made; (c) the caller's name and fisher identification number; (d) the hail operator's name; (e) the date for which the fishing activity location report is effective; (f) Areas and Subareas to be fished; (g) time and date fishing will begin and end or any change in fishing location; and (h) the fishing activity location report verification number.

(3) The vessel master shall arrange to have this fishing location activity information available to DFO not more than 24 hours after completion for:

(a) prior to leaving port when intending to fish for crab; (b) prior to moving to a new location; and (c) once fishing activities have been completed for each fishing trip and not less than 2 hours prior to landing.

14. Biological Sampling:

(1) The vessel master shall arrange with the approved service provider for a designated Observer to collect and provide data according to the Biological Sampling standards in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455.

(2) The vessel master shall permit the biological sampling service provider access to catch for the purpose of data collection.

15. Fishery Monitoring:

Each licensed vessel shall have either an Electronic Monitoring (EM) System or an at-sea observer designated by the Regional Director-General to monitor fishing activity.

(1) Where an EM system is in use on a vessel:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) The vessel master shall ensure that the Electronic Monitoring system meets the equipment and data collection requirements set out in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455. The vessel master shall ensure that the Electronic Monitoring system: (i) accurately monitors the vessel 24 hours per day, seven days per week while it is engaged in fishing, where fishing is defined as the entire period of time that traps are in the water; (ii) accurately monitors vessel activity and includes the use of a camera (location, date, time, and speed); (iii) accurately identifies trap-hauling activity; (iv) accurately identifies individual traps using Radio Frequency Identification (RFID)chips; (v) accurately records and stores data; (vi) provides a feedback mechanism so vessel masters can ensure the system is operational; (vii) includes an independent and reliable power supply; and (viii) is tamper-proof.

(b) The vessel master shall ensure, by checking components on a daily basis, that all components of the Electronic Monitoring System are fully operational and in use while the vessel has traps in the water fishing on the fishing grounds.

(c) The vessel master shall immediately cease both deploying and retrieving traps should any or all of the EM system equipment become inoperative or malfunction in any way. The vessel master shall not resume deploying and retrieving traps while the EM system is inoperative or malfunctioning in any way.

(d) The licence holder shall arrange with the approved service provider for the data produced from this EM system to be collected, analyzed, and reported to the Department, in the format and time frame set out in Appendix 9 of the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3455.

(2) Where a designated at-sea observer is in use on a vessel as an alternative to an operational EM system:

(a) the vessel master shall arrange with the approved service provider to have an at-sea observer designated by the Regional Director-General to collect information at sea present during all active fishing operations in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

accordance with At-Sea Observer specifications described in Appendix 9 of the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3455.

16. Marking of holding cages:

(1) All crab enclosed in a holding cage shall be from one licensed vessel only.

(2) All holding cages shall be marked with the vessel registration number of the vessel which harvested the impounded crab.

17. Landing of catch:

All crab taken by the licensed vessel shall be transported by that vessel either directly to land or to a holding cage. Only the licensed vessel may transport the crab from the holding cage to land.

18. Reporting catch on fish slips:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish are used for bait, personal consumption or disposed of otherwise.

(3) The vessel master shall submit slips not later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at(604)666-2716.

19. Avoidance of entanglement in fishing gear:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

(a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure:

(a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

Explanatory Note - Harvest Log and Fishing Location Information: The paper copy of the harvest log shall have the same format and content as the example shown in the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3455. Logbooks meeting these requirements are available from service providers who, for a fee, will provide the logbook, coding and keypunch services.

Fish harvesters who do not use the logbook, coding and keypunch services provided by a service provider shall contact the Shellfish Data Unit at (250) 756-7306 or (250) 756-7022 in order to obtain the information necessary to fulfil these requirements.

COMMUNAL PART 2 [January 1, 2017]

Application

This Part applies to fishing for those species listed in s.1.

Definitions:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to subsection 39(1) of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 9 of these conditions. "fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department of Fisheries and Oceans database into which all catch data must be entered.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 10)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 6)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department of Fisheries and Oceans and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip. "landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

Document Released Under the Access to Information Act / Document divulgué en vertu de l'
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight)

Document Released Under the Access to Information Act / Document divulgué en vertu de la

Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a)

Document Released Under the Access to Information Act / Document divulgué en vertu de la

Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 1 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Release of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) No vessel other than the vessel designated to fish this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 6(1). The person identified as the vessel master in subsection 6(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master, who must be the caller making the report; (d) name of the directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 18, will occur. If that is the case, the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate shall be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsection 6(1).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 7(2), when fishing under authority of this licence at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system onboard the vessel, as described in section 9.

Document Released Under the Access to Information Act / Document divulgué en vertu de la

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 8(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea. (c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip. (d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 9.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 10(1)). (1) Subject to subsection 10(2) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 18, an estimate in poundage by species of fish that was caught under the authority of the Communal Fishing Licence.

(2) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 11(2), 11(3) and 11(4), all fish caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2017.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Subject to subsection 11(4), no halibut shall be retained after 12:00 h local time, November 7, 2016. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2016.

(3) Subject to subsection 11(4), no lingcod shall be retained after 23:59 h local time, November 14, 2016. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2016.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight

Document Released Under the Access to Information Act / Document divulgué en vertu de la

to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" Fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log no later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) The vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a fishery officer, a DFO employee or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(f) The completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) The licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall submit the fish slips not later than seven (7) days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel .

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 17(2) and 17(3), the vessel master fishing:

(a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear;

(c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and

(d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 17(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing for all species

The following definitions apply to this section:

"Communal Fishing Licence" means a licence issued under the Aboriginal Communal Fishing Licences Regulations that authorizes an aboriginal organization to fish groundfish for food, social and ceremonial purposes.

"dual fishing" means fishing for and retaining groundfish under the authority of this licence and a Communal Fishing Licence during the same fishing trip.

"dual fishing designation" means designation by an aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an aboriginal organization confirming designation to fish under a Communal Fishing Licence.

"unique identification number" means a unique number the aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

issue.

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the aboriginal organization's Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the aboriginal organization; (b) the full name of the vessel designated by the aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating aboriginal organization's Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the aboriginal organization's Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the aboriginal organization has assigned to the dual fishing designation certificate; and (i) the Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 23(3)(a)-(i).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 23(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number the aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea boarding occurs.

(7) At the request of the aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

seven (7) days of the validation.

(9) Where fish taken under the authority of the Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of a Communal Fishing Licence shall occur only in the waters, or area, where the designating aboriginal organization's Communal Fishing Licence authorizes fishing.

(12) Before the fish caught pursuant to the Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the aboriginal organization who was advised of the landing 18(12)(a) were made and provides it to a Fishery Officer upon request.

(13) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the Communal Fishing Licence during the fishing trip to the aboriginal organization that issued the dual fishing designation certificate.

(14) All fish caught under the authority of the Communal Fishing Licence are for the food, social and ceremonial purposes of the aboriginal organization which holds the licence. The vessel master or any person designated to fish under the Communal Fishing Licence shall not sell

Document Released Under the Access to Information Act / Document divulgué en vertu de l'
This report may contain data rated up to Protected A.
Do not release this data to external parties.

trade or barter any fish caught pursuant to the Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

PART 3 [January 1, 2017]

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

This Part does not authorize the transport of salmon. For conditions authorizing the transport of salmon, contact your Area salmon manager.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

2. Transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

3. Transporting Roe Herring:

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

CRAB Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FR 16 2017

CRAB Licence 2017 Date Issued: 03 May 2017

Licensed for: Commercial Fishing Expiry Date: 31 Mar 2018

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:
VRN 312305
DOT 836896
Vessel HUSTLE
Vessel OAL 8.04 Meters
Gross Tonnage 9.70 Cubic Meters
Net Tonnage 8.28 Cubic Meters

Reported Vessel Owner:
FIN: [redacted] s.19(1)
DUNCAN GORDON CAMERON
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Quota: 316 Traps

Licence Area: CRAB AREA B

Waters in which fishing is permitted: Areas 3 to 10

Species: CRAB

Gear: TRAP

SPECIES: DUNGENESS, RED ROCK, GOLDEN KING & RED KING

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 03 May 2017

Licence Serial No.: 433852

Version Date: 19-Dec-2016

CONDITIONS OF COMMUNAL CRAB AREA B LICENCE Licence Period: January 1, 2017 to March 31, 2018

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Information on management of the crab fishery is contained in the current Crab by Trap Integrated Fisheries Management Plan (IFMP), available upon request to the Regional Crab Manager, Tel: 250-627-3455. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for crab and octopus.

Definitions

"Approved Service Provider" means Pacific Coast Fisheries Services, (250-931-7686). This service provider has been approved to provide Biological Sampling, Electronic Monitoring, Harvest Logbook, Plastic Trap Tag, and Summary Reporting Services to Crab Area B licensed commercial harvesters.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Management Area Regulations, 2007.

"Briarosaccus callosus" is a parasite identified by a reddish-brown, 1 to 2 cm diameter capsule(s), which is the egg sac of the parasite, located under the abdomen (i.e. where the crab eggs would normally be carried).

"Department (DFO)" means the Department of Fisheries and Oceans.

"Electronic Monitoring (EM) system" means an electronic-based monitoring system which may be used as an alternative to at-sea observers. An approved electronic monitoring system must accurately monitor vessel activity (location, date, time, and speed), trap hauling activity, and individual traps hauled on board, in accordance with the standards set out in Appendix 9 of the Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence.

"landing" means the transfer of fish from the licensed vessel in water to land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"soft-shell crab" means a crab whose shell is not fully hardened and yields to finger pressure. A crab with a durometer measurement of 70 units or less is defined as a soft-shell crab. Crabs shall be measured for soft-shell in front of the suture line on the underside of the carapace between the insertion of the leg bearing the claw and the widest point of the shell.

"trap" includes ring nets.

"vessel master" means the person present on the vessel who has overall and ongoing responsibility for the operation of the vessel and fishing activities.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

vessel.

1. Subject to the conditions of this licence:

(1) The following species of fish may be taken: (a) Dungeness Crab (Cancer magister); (b) Red Rock Crab (Cancer productus); (c) Red King Crab (Paralithodes camtschatica); (d) Golden King Crab (Lithodes aequispinus); and (e) Octopus (Octopus spp.).

(2)(a) No person shall catch and retain or possess any female crab unless the crab is infected by the parasite Briarosaccus callosus and is being brought ashore to avoid the further spread of that parasite.

(b) Dungeness Crab found with this parasite shall be frozen and shipped to Gary Meyer at the Pacific Biological Station. Call 1-250-756-7034 for instructions.

(3) No person shall catch and retain or possess any soft-shell crab.

(4) No person shall catch and retain octopus caught in octopus closure areas. All such octopus shall be immediately released in a manner that will cause the least harm.

2. Size of fish permitted to be taken:

(1) No person shall catch and retain: (a) a Dungeness Crab that is less than 165 mm in width; or (b) a Red Rock Crab that is less than 115 mm in width.

(2) Each fisher shall ensure that their measuring gauge is accurate.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

(1) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery guardian.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) Designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsection 6(2), fishing is permitted in Areas 3 to 10.

(2) Fishing for crab is permitted by a gear type authorized in Part 1 during those times when persons fishing under authority of a Category R licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for crab, with that gear, in that area and during that time.

7. The type, size and quantity of fishing gear permitted to be used:

(1) Trap gear, which includes ring net gear, is permitted to be used. Traps shall include the following:

(a) Biodegradable Escapement Mechanisms: Each trap shall be equipped with a biodegradable escape mechanism in the form of either a rot cord, rot panel or rot panel alternative as described below. These mechanisms are designed to minimize the effects of ghost fishing by traps. This requirement does not apply to ring nets.

(b) Rot cord: Rot cords may only be used on traps with a rigid frame, a freely opening hinged lid, and a volume less than 400 litres. (400 litres is approximately equal to a circular trap 117 cm in diameter and 36 cm in height.) The trap lid shall be secured by a loop of no greater than No. 120 untreated cotton twine such that the trap lid will open freely when the rot cord is broken. The rot cord shall be attached to the rubber strap by a cow hitch and attached to the hook by a cow hitch (see the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3455, for an illustration of how to attach the rot cord.) If the hook is attached permanently to the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

trap, the trap lid shall close using a single loop of the rot cord from the rubber strap. The rubber strap shall be under tension. No other fastenings may impede the hinged lid of the trap from opening. The opening created by the hinged lid shall exceed the rot panel requirement for the area or exceed the size of the largest trap entrance.

(c) Rot Panel: All 400-litre traps without hinged lids secured by a rot cord shall have a rot panel. The rot panel consists of a section in a trap side wall that has been laced, sewn or otherwise secured by a single strand of no greater than No. 120 untreated cotton twine such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted opening in the wall or panel. The opening shall exceed a square 11 cm by 11 cm.

(d) Rot Panel Alternative: Traps requiring a rot panel may use the following alternative for soft web traps only. A trap side wall shall contain a cut in the web greater than 20 cm in length. The cut shall be made in a "V" pattern with each leg of the "V" greater than 11 cm in length. A single strand of no greater than No. 120 untreated cotton twine shall be used to lace the cut in the web such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted triangular opening no less than 11 cm on each side.

(e) Escape Hole: all traps shall be fitted with at least two escape holes which are located not more than 100 mm below the top of the frame. Both escape holes shall not be less than 105 mm in diameter. (2) Subject to subsection 7(3), the maximum number of traps permitted to be fished from 0800 hours March 1, 2017 to 2359 hours November 30, 2017 and from 0800 hours March 1, 2018 to 2359 hours March 31, 2018 is 316.

(3) The maximum number of traps permitted to be fished in the Nass Estuary from 1200 hours October 1, 2017 to 2359 hours November 15, 2017 is 158, (one half the total trap allocation indicated in section 7.2). The Nass Estuary is described as those portions of Subareas 3-12, 3-18 and the Nass River estuary inside a line that begins at 54ø58.995'N and 130ø06.270'W [Ramsden Point Light] then to a point on shore at 54ø56.5'N and 130ø04.2'W, located three nautical miles southwest of Arrandale on Mylor Peninsula, then following the shoreline to 54ø58.933'N and 129ø50.385'W [Leading Point] then to 54ø59.620'N

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

and 129ø53.467'W [east of Mill Bay] then following the shoreline to 55ø00.626'N and 130ø00.329'W [Nass Point] then due west to 55ø00.626'N and 130ø03.350'W, (on the opposite mainland shore) then following the shoreline to the beginning point.

(4) The maximum size of traps used to fish for Dungeness Crab is 400 litres.

8. Manner in which gear is permitted to be used:

(1) No person shall set a trap and leave the trap in the water for more than 18 consecutive days without lifting the trap from the water and removing all of the crab from it.

(2) All crab traps, lines and buoys used by this vessel shall be transported by the licensed vessel to and from land.

(3) All bait shall be contained within hard plastic bait containers having a screw top lid. Bait containers may have holes no larger than 8 mm in width.

(4) Bait containers that do not meet the requirements described in 8(3) above are not permitted in any traps fished.

9. Buoys, lines, trap lines and groundlines:

(1) Buoys shall be greater than 12 cm in diameter and have a volume greater than 2.5 litres. This is approximately equivalent to a cylinder 12 cm in diameter and 22 cm in length or a sphere 17 cm in diameter.

(2) All buoy lines, trap lines and groundlines shall be non-floating so that the lines remain below the surface of the water in order to minimize navigational hazards.

10. Marking of traps with plastic tags:

(1) All crab traps fished under the authority of this licence shall have approved plastic tags attached to each trap. All tags shall indicate the licence year and have an identification number unique to each individual vessel. Each trap tag shall be attached to the trap so that it is visible without opening the trap.

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(2) Only those plastic crab trap tags that have been reported and registered for that fishing year shall be attached to traps.

(3) Each vessel will be issued a total number of tags equal to their trap limit plus 10 percent to allow for replacements.

(4) If the vessel master requires more replacement tags than the 10 percent allotted, a complete new set of replacement tags shall be issued. New replacement tags shall be marked with the letters "RP" and be a different colour than the original set issued. New replacement tags shall also indicate the licence year and be unique to each individual vessel.

Note: To receive replacement plastic tags, the harvester must contact their area crab manager. The area crab manager will contact the service provider regarding issuing a complete new set of replacement tags.

(5) If the harvester is issued replacement plastic tags pursuant to s.10(4), all other plastic tags must be removed and returned to DFO not later than the 21st of the month following the issue date. Tags that have been replaced are invalid after that date.

(6) The vessel master shall arrange with the approved service provider to have crab trap tag numbers for tags that meet the requirements of the Department, entered into a database and submitted to the Department within 24 hours of being issued.

11. In addition to crab trap tags required under section 10, if the licensed vessel is using an EM system:

(1) All crab traps fished shall be marked with a Radio Frequency Identification (RFID) chip registered in the vessel's RFID chip inventory for this licence period (see 11(7)(b)), which shall consist of a set of Main RFID chips equal to their trap limit, plus a secondary set of spare chips equal to 10 percent of their trap limit to allow for replacements. (2) Notwithstanding subsection 11(1), where single traps are marked by individual buoys, the RFID chip may be attached to the buoy rather than to the trap.

(3) RFID chips shall be placed on traps or buoys, as required, in such a manner that they can be scanned by an on-board chip scanner. Only

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

those RFID chips that have been reported and registered to be fished shall be placed on traps or buoys as required.

(4) The vessel master shall scan every RFID chip as the trap is hauled on board. If an RFID chip fails to be read, that trap shall be removed immediately from the water until the chip is either repaired or replaced.

(5) If traps lost by this vessel have been replaced and these same traps are later found, the vessel master is responsible for removing the found traps with the RFID chips from the water.

(6) When a trap is taken out of the water and replaced, the vessel master is responsible for switching the RFID chips so that all traps in the water are fitted with RFID chips in that vessel's inventory for the current year.

(7) For the licensed vessel using an EM system, the vessel master shall arrange the following with the approved service provider:

(a) RFID chip procurement, distribution, administration, and data entry services; and

(b) update the vessel's entire RFID chip inventory at the beginning of the fishing season, including a number of "Main" chips equal to or less than the trap limit and a number of "Spare" chips equal to or less than 10 percent of the trap limit. These RFID chip numbers shall be entered into a database and submitted to the Department within the first 30 days of fishing in this licence period. When the vessel master scans RFID chips not previously registered in the vessel's inventory for the current fishing season, the vessel's inventory shall be updated and submitted to the Department within 30 days of scanning the new RFID chips. If the vessel master scans a number of RFID chips greater than the 10 percent allowance for "spare" chips, these RFID chips shall be classified in the vessel's inventory as "over-limit" chips.

12. Records - Harvest Log and Fishing Location Information: (see explanatory note after section 18)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department in accordance with the timing set out in subsection 12(7).

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

The content and format of the log (paper and electronic) shall meet the requirements as defined by Fisheries and Oceans Canada Marine Ecosystem and Aquaculture Division's Shellfish Data Unit.

(2) The harvest and fishing location information recorded in the harvest log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the harvest log not later than midnight of that day.

(4) The vessel master shall enter latitude/longitude co-ordinates in the location field of the harvest log for each string or group of traps. A string is defined as traps connected by a line. A group is defined as single trap or short strings of traps in a distinct area (e.g. a bay) not crossing an Area or Subarea boundary with no two traps more than 0.5 nautical miles (1 km) apart. The vessel master shall:

(a) In the case of a string of traps, record a new line of harvest information with a new latitude/longitude coordinate pair to represent one end of the string. (b) In the case of a group of traps, record a new line of harvest information with a new latitude/longitude coordinate pair to represent the centre point of the group of traps. (c) Record Latitude/longitude coordinate pairs using degree decimal minute format, with information provided to the third decimal point.

(5) Subject to section 8(4), the vessel master shall enter their Fishing Identification Number, (Vessel Master FIN) from their Fisher Registration Card (FRC) in the space provided at the top of each harvest log page.

(6) The harvest log shall be kept on board the licensed vessel.

(7) The harvest log shall be produced for examination on demand of a fishery officer or an observer.

(8) The licence holder shall ensure the completed log pages (original copy) and electronic copy of the log are forwarded not later than 28 days following the end of each month in which fishing occurred to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

This report may contain data rated up to Protected A. Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(9) In the event that fishing does not occur under authority of this licence, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log; the licence holder shall sign the nil report.

13. Biological Sampling:

(1) The vessel master shall arrange with the approved service provider for a designated Observer to collect and provide data according to the Biological Sampling standards in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455.

(2) The vessel master shall permit the biological sampling service provider access to catch for the purpose of data collection.

14. Fishery Monitoring:

Each licensed vessel shall have either an Electronic Monitoring (EM) System or an at-sea observer designated by the Regional Director-General to monitor fishing activity.

(1) Where an EM system is in use on a vessel:

(a) The vessel master shall ensure that the Electronic Monitoring system meets the equipment and data collection requirements set out in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455. The vessel master shall ensure that the Electronic Monitoring system: (i) accurately monitors the vessel 24 hours per day, seven days per week while it is engaged in fishing, where fishing is defined as the entire period of time that traps are in the water; (ii) accurately monitors vessel activity (location, date, time, and speed); (iii) accurately identifies trap-hauling activity; (iv) accurately identifies individual traps using Radio Frequency Identification (RFID)chips; (v) accurately records and store data; (vi) automatically transmits the collected data to the approved service provider on a daily basis where possible, with a maximum of 14 days between successful transmissions; (vii) provides a feedback mechanism so vessel masters

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

can ensure the system is operational; (viii) includes an independent and reliable power supply; and (ix) is tamper-proof.

(b) The vessel master shall ensure, by checking components on a daily basis, that all components of the Electronic Monitoring System are fully operational and in use while the vessel has traps in the water fishing on the fishing grounds.

(c) The vessel master shall immediately cease both deploying and retrieving traps should any or all of the EM system equipment become inoperative or malfunction in any way. The vessel master shall not resume deploying and retrieving traps while the EM system is inoperative or malfunctioning in any way.

(d) The licence holder shall arrange with the approved service provider for the data produced from this EM system to be collected, analyzed, and reported to the Department, in the format and time frame set out in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455.

(2) Where a designated at-sea observer is in use on a vessel as an alternative to an operational EM system:

(a) the vessel master shall arrange with the approved service provider to have an at-sea observer designated by the Regional Director-General to collect information at sea present during all active fishing operations in accordance with At-Sea Observer specifications described in Appendix 9 of the current Crab by Trap IFMP, available upon request to the Regional Crab Manager, Tel: 250-627-3455.

15. Marking of holding cages:

(1) All crab enclosed in a holding cage shall be from one licensed vessel only.

(2) All holding cages shall be marked with the vessel registration number of the vessel which harvested the impounded crab.

16. Landing of catch:

All crab taken by the licensed vessel shall be transported by that vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

either directly to land or to a holding cage. Only the licensed vessel may transport the crab from the holding cage to land.

17. Reporting catch on fish slips:

(1) An accurate written report shall be furnished on a fish slip of all fish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish are used for bait, personal consumption or disposed of otherwise.

(3) The vessel master shall submit slips not later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

18. Avoidance of entanglement in fishing gear:

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

(a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure:

(a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

Explanatory Note - Harvest Log and Fishing Location Information: The paper copy of the harvest log shall have the same format and content as the example shown in the current Crab by Trap Integrated Fisheries Management Plan, available upon request to the Regional Crab Manager, Tel: 250-627-3455. Logbooks meeting these requirements are available from service providers who, for a fee, will provide the logbook, coding and keypunch services.

Fish harvesters who do not use the logbook, coding and keypunch services provided by a service company shall contact the Shellfish Data Unit at (250) 756-7306 or (250) 756-7022 in order to obtain the information necessary to fulfil these requirements.

COMMUNAL PART 2 [January 1, 2017]

Application

This Part applies to fishing for those species listed in s.1.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to subsection 39(1) of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 9 of these conditions. "fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department of Fisheries and Oceans database into which all catch data must be entered.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1,

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 10)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 6)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department of Fisheries and Oceans and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip. "landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye

This report may contain data rated up to Protected A.

Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 1 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Release of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 6(1). The person identified as the vessel master in subsection 6(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master, who must be the caller making the report; (d) name of the directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 18, will occur. If that is the case, the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate shall be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsection 6(1).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 7(2), when fishing under authority of this licence at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system onboard the vessel, as described in section 9.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 8(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea. (c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip. (d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 9.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

subsection 10(1)). (1) Subject to subsection 10(2) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 18, an estimate in poundage by species of fish that was caught under the authority of the Communal Fishing Licence.

(2) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 11(2), 11(3) and 11(4), all fish caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2017.

(2) Subject to subsection 11(4), no halibut shall be retained after 12:00 h local time, November 7, 2016. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2016.

(3) Subject to subsection 11(4), no lingcod shall be retained after 23:59 h local time, November 14, 2016. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2016.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" Fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log no later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) The vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a fishery officer, a DFO employee or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) The completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) The licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall submit the fish slips not later than seven (7) days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel .

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 17(2) and 17(3), the vessel master fishing:

(a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear;

(c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and

(d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 17(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing for all species

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

The following definitions apply to this section:

"Communal Fishing Licence" means a licence issued under the Aboriginal Communal Fishing Licences Regulations that authorizes an aboriginal organization to fish groundfish for food, social and ceremonial purposes.

"dual fishing" means fishing for and retaining groundfish under the authority of this licence and a Communal Fishing Licence during the same fishing trip.

"dual fishing designation" means designation by an aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an aboriginal organization confirming designation to fish under a Communal Fishing Licence.

"unique identification number" means a unique number the aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the aboriginal organization's Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the aboriginal organization; (b) the full name of the vessel designated by the aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating aboriginal organization's Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the aboriginal organization's Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the aboriginal organization has assigned to the dual fishing designation certificate; and (i) the Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 23(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 23(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number the aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

produce it at the time of validation and whenever any at-sea boarding occurs.

(7) At the request of the aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of a Communal Fishing Licence shall occur only in the waters, or area, where the designating aboriginal

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

organization's Communal Fishing Licence authorizes fishing.

(12) Before the fish caught pursuant to the Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the aboriginal organization who was advised of the landing 18(12)(a) were made and provides it to a Fishery Officer upon request.

(13) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the Communal Fishing Licence during the fishing trip to the aboriginal organization that issued the dual fishing designation certificate.

(14) All fish caught under the authority of the Communal Fishing Licence are for the food, social and ceremonial purposes of the aboriginal organization which holds the licence. The vessel master or any person designated to fish under the Communal Fishing Licence shall not sell trade or barter any fish caught pursuant to the Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

PART 3 [January 1, 2017]

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

This Part does not authorize the transport of salmon. For conditions authorizing the transport of salmon, contact your Area salmon manager.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

2. Transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

3. Transporting Roe Herring:

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A /Do not release this data to external parties.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

V8M 1T9

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GEODUCK AND HORSE CLAM

Gear: DIVE

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

For Licence Amendment Purposes Only

Date Printed: 01 Nov 2016

Licence Serial No.: 415380

Document Released Under the Access to Information Act / Document divulgué en vertu de la

Version Date: 13-Jan-2016

CONDITIONS OF 2016/2017 COMMUNAL GEODUCK AND HORSE CLAM LICENCE

Authority

The Department of Fisheries and Oceans has authority to set licensing conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the Geoduck and Horse Clam fishery obtain a copy of the current Geoduck and Horse Clam Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for Geoduck and Horse Clam.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a mesh harvest bag, mesh transport bag, plastic tote, cage or other container used for the gathering, handling or transportation of Geoduck or Horse Clam.

"Department (DFO)" means the Department of Fisheries and Oceans.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"discarding" means not placing harvested Geoduck or Horse Clam in a container or removing a Geoduck or Horse Clam from a container and not validating that Geoduck or Horse Clam.

"harvesting" means removing or dislodging, by any means, Geoduck or Horse Clam of any size from the substrate of the ocean floor.

"landed" or "landing" means the transfer of Geoduck or Horse Clam from a vessel in the water to land.

"log" means the Geoduck and Horse Clam Validation and Harvest Log (see section 11 and explanatory note after section 15) or an alternative log approved by the Department.

"observer" means a person who has been designated as an observer by the Regional Director General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations and in the employ of a service provider company that has been certified by the Canadian General Standards Board (CGSB) for Dockside Monitoring.

"On-Grounds Monitor" means an individual, who may or may not be designated as an observer, whose role is to take biosamples, co-ordinate sampling for the Marine Biotoxin Monitoring Program, communicate with dockside observers, write Incident Reports, advise operators of open and close times and fishing locations, monitor effort, manage fishing activity to avoid excessive harvesting in specific Geoduck and Horse Clam beds, observe product transfers to packer vessels, check dive harvest information, and record other observations about the prosecution of the Geoduck and Horse Clam fishery, and about sea otter impacts.

"transhipment" means the transfer of Geoduck or Horse Clam from a vessel to another vessel.

"validated" means Geoduck or Horse Clam that have been weighed by an observer and the weight entered into the Geoduck and Horse Clam Validation & Harvest Log (see section 11 and explanatory note after section 15) or an alternative log approved by the Department of Fisheries and Oceans.

"vessel registration number (VRN)" means the number assigned to a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel by the Department at the time the vessel is registered as a fishing vessel.

"wasting" means discarding, failing to gather harvested Geoduck or Horse Clam, or failing to validate harvested Geoduck or Horse Clam suitable for human consumption.

1. Species of fish permitted to be taken:

Geoduck (Panopea generosa) and Horse Clam (Tresus spp.)

2. Quantities permitted to be taken:

The licensed vessel is permitted to catch and retain a maximum of 0 lb (0 kg) of Geoduck.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

(a) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery guardian; and (b) designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsection 6(2), fishing for Geoduck and Horse Clam is permitted by a gear type authorized in Part 1 during those times when persons fishing under authority of a Category G licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for Geoduck and Horse Clam, with that gear, in that area and during

Document Released Under the Access to Information Act / Document divulgué en vertu de la
This report may contain data rated up to Protected A.
Do not release this data to external parties.

that time.

(2) All harvesting of Geoduck and Horse Clam shall be conducted from the seabed in waters at least 10 feet (3 m) below chart datum (i.e. deeper than 10 feet (3 m) at the lowest low tide).

7. Fishing gear permitted to be used:

(1) All harvesting of Geoduck and Horse Clam shall be conducted using hand-held, manually operated water nozzles guided and controlled underwater by a diver.

(2) Each water nozzle shall have a maximum inside diameter of 5/8 inch (1.59 cm).

(3) All Geoduck and Horse Clam or portions of Geoduck and Horse Clam which have been removed or dislodged from the substrate of the ocean floor are considered to have been harvested and shall be landed and validated. (See section 11) The following steps shall be taken when harvesting Geoduck and Horse Clam:

(a) all Geoduck and Horse Clam and portions of Geoduck and Horse Clam which have been harvested shall be immediately placed in a container; (b) Geoduck and Horse Clam shall remain in the container while taken to the surface and loaded onto the catcher boat; (c) on the catcher boat, Geoduck and Horse Clam may be removed from the first container and immediately placed in another container; (d) Geoduck and Horse Clam shall remain in the second container until landed and validated; and (e) no harvested Geoduck or Horse Clam may be discarded or wasted.

8. The type and size of containers to hold or transport Geoducks or Horse Clam and the marking of such containers:

(1) All Geoduck or Horse Clam shall be packed in containers with a maximum weight (while empty) of 5 lb (2.3 kg) each. The containers shall be clean and fabricated from approved material.

(2) All Geoduck or Horse Clam delivered to designated landing ports or transhipped to another vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

in water resistant ink:

(a) vessel name and Vessel Registration Number (VRN); (b) Geoduck licence number (G Tab); (c) harvest date; (d) Geoduck Management Area (GMA), e.g. 24D01c; (e) Area and Subarea, e.g. 24-4; (f) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (g) common name of the product, i.e. Geoduck Clam or Horse Clam

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

9. Transhipment:

Geoduck or Horse Clam may be transhipped from the licensed vessel to another vessel licensed for the transportation of fish provided the vessel master complies with the following conditions:

(1) all Geoduck or Horse Clam are in containers and the containers are tagged as per section 8;

(2) the number of containers is recorded in the log;

(3) the "packer weight" (determined by subtracting the weight of the containers from the weight of the product) is recorded in the log;

(4) a copy of the log accompanies the product to the designated port; and

(5) the product is landed at a designated port and validated by an observer.

10. Locations permitted for the landing of Geoduck and Horse Clam:

Geoduck and Horse Clam shall be landed at one of the following ports:

(1) For fisheries off the east coast of Vancouver Island: (a) Port Hardy, Port McNeill, Campbell River, Heriot Bay, Lund, Westview, Comox, Deep Bay, French Creek, Nanaimo, Ladysmith, Chemainus, Cowichan Bay and Sidney.

(b) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) For fisheries off the west coast of Vancouver Island: Sooke, Port Alberni, Ucluelet, Tofino, Gold River, Zeballos, Fair Harbour, Winter Harbour, Coal Harbour.

(3) For fisheries in waters north of Cape Caution: Bella Bella, Massett, Port Hardy, Prince Rupert, Port Edward and Queen Charlotte City.

This condition applies to both the licensed vessel and, if the vessel master chooses to tranship his catch to another vessel, to the vessel receiving the catch.

11. Validation: (see explanatory note after section 15)

(1) Subject to subsection 11(4), all Geoduck and Horse Clam harvested or removed from the seabed floor under the authority of this licence shall be validated at the point and time of landing.

(2) Prior to validation of Geoduck and Horse Clam no person shall:

(a) smash the shells or slit the membranes of Geoduck or Horse Clam to drain the waters; or (b) dump, throw overboard, or otherwise discard Geoduck or Horse Clam which have been harvested and retained in accordance with the Fisheries Act and the regulations made thereunder.

(3) All weights shall be determined using a scale approved by Industry Canada.

(4) If the requirement to weigh Geoduck and Horse Clam at the point of landing cannot be met because weigh scales are not available, the vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall have an observer enter the total number of containers in the log.

(5) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide the observer with a hard copy of the log prior to each validation.

(6) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide to the observer at the point of landing, access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

12. Oral reports:

(1) The vessel master shall, under the circumstances set out in subsection 12(2), report the information set out therein by notifying in person an observer or by telephoning (800) 663-7152. Where feasible, at least 24 hour notice will be given.

(2) Before a fishing trip, upon cancellation of a fishing trip, after fishing, and prior to delivering Geoducks and Horse Clams: (a) vessel name, vessel master's name and vessel registration number; (b) Area, Subarea(s) and Geoduck Management Area(s); (c) date and time of arrival on, or departure from, the fishing location; and (d) date and time of landing, landing port and location at the port.

13. Harvest logs and chart records: (See explanatory note after section 15)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department. The content and format of this log (paper and electronic) shall meet the requirements as defined by the Shellfish Data Unit for the current licence year.

(2) The harvest and fishing location information recorded in the log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the log no later than midnight of that day.

(4) The log shall be kept on board the licensed vessel.

(5) The log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(6) The vessel master shall enter latitude and longitude co-ordinates for each dive in the log.

(7) For Geoduck and Horse Clam harvested from Areas 12 to 19 and 29, the vessel master shall provide a chart record of the locations fished to the Department.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) The chart shall be marked with: (i) the vessel registration number; (ii) the licence tab number; and (iii) the validation I.D. numbers.

The validation I.D. number is the unique page number assigned to each validation page of the Geoduck and Horse Clam Validation & Harvest Log. If an alternative log is used, the validation I.D. number is the unique page number provided by the Shellfish Data Unit when the licence holder contacts the Unit to obtain the information necessary to fulfil the log requirements. (see explanatory note after section 15).

(b) Each harvest site shall be clearly marked on the chart with a dive site reference or dive number, validation I.D. number and the dates that fishing activity occurred at each site. The dive numbers on the chart record shall correspond to the dive numbers in the log.

(c) The information for each day's harvest operations shall be recorded on the chart record no later than midnight of that day.

(8) The completed log pages (original copy), electronic copy of the log and, for Geoduck and Horse Clam harvested in Areas 12 to 19 and 29, the chart record of locations fished, shall be forwarded within 28 days following the end of each month in which fishing occurred to:

Department of Fisheries and Oceans Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the current fishing season, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence number and the year with 'nil' entered in the body of the log; the licence holder shall sign the nil report.

14. Fish slips:

(1) An accurate written report shall be provided on a fish slip of all fish and shellfish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish or shellfish landed are used for bait, personal consumption or disposed of otherwise.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties

(3) The report shall be mailed nnot later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

(4) This report shall be made within seven days of the offloading regardless of whether or not the catch has been sold within that period.

15. WorkSafeBC (Workers' Compensation Board) Requirements:

All Geoduck and Horse Clam divers shall be in possession of a WorkSafeBC (previously Workers' Compensation Board of BC) Seafood Harvesting Diving Certificate.

Explanatory note - harvest log, fishing location information and validation: the Geoduck and Horse Clam Validation & Harvest Log issued by the Underwater Harvesters' Association is approved for both form and content by the Shellfish Data Unit. A service provider contracted by the Underwater Harvesters' Association will provide, for a fee, the logbook and coding, keypunch, bonded chart coding, mapping and validation services.

PART 2 [December 16, 2015]

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

2. Transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel. (b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

3. Transporting Roe Herring:

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A
Do not release this data to external parties.

fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A
Do not release this data to external parties

location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

GEODUCK AND HORSE CLAM Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FG 25 2017

GEODUCK AND HORSE CLAM Licence 2017 Date Issued: 26 Oct 2017

Licensed for: Commercial Fishing Expiry Date: 28 Feb 2018

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:

VRN 25834
DOT 347059
Vessel HELLS BELLS
Vessel OAL 11.28 Meters
Gross Tonnage 40.95 Cubic Meters
Net Tonnage 19.58 Cubic Meters

Reported Vessel Owner:

FIN: 2076
SEABOLT FISHING LTD.
2531 NELSON AVE
WEST VANCOUVER BC
V7V 2R5

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GEODUCK AND HORSE CLAM

Gear: DIVE

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

Date Printed: 26 Oct 2017

Licence Serial No.: 438004

Printed from the PacFish Search System by User "GEBREHIWOTAK" on October 26, 2018, 3:27 PM

Document Released Under the Access to Information Act / Document divulgué en vertu

Version Date: 17-Feb-2017

CONDITIONS OF 2017/2018 COMMUNAL GEODUCK AND HORSE CLAM LICENCE

Authority

The Department of Fisheries and Oceans has authority to set licensing conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the Geoduck and Horse Clam fishery obtain a copy of the current Geoduck and Horse Clam Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for Geoduck and Horse Clam.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a mesh harvest bag, mesh transport bag, plastic tote, cage or other container used for the gathering, handling or transportation of Geoduck or Horse Clam.

"Department (DFO)" means the Department of Fisheries and Oceans.

"discarding" means not placing harvested Geoduck or Horse Clam in a container or removing a Geoduck or Horse Clam from a container and not validating that Geoduck or Horse Clam.

"harvesting" means removing or dislodging, by any means, Geoduck or Horse Clam of any size from the substrate of the ocean floor.

"landed" or "landing" means the transfer of Geoduck or Horse Clam from a vessel in the water to land.

Document Released Under the Access to Information Act / Document divulgué en vertu

"log" means the Geoduck and Horse Clam Validation and Harvest Log (see section 11 and explanatory note after section 15) or an alternative log approved by the Department.

"observer" means a person who has been designated as an observer by the Regional Director General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations and in the employ of a service provider company that has been certified by the Canadian General Standards Board (CGSB) for Dockside Monitoring.

"On-Grounds Monitor" means an individual, who may or may not be designated as an observer, whose role is to take biosamples, co-ordinate sampling for the Marine Biotoxin Monitoring Program, communicate with dockside observers, write Incident Reports, advise operators of open and close times and fishing locations, monitor effort, manage fishing activity to avoid excessive harvesting in specific Geoduck and Horse Clam beds, observe product transfers to packer vessels, check dive harvest information, and record other observations about the prosecution of the Geoduck and Horse Clam fishery, and about sea otter impacts.

"tranship" means the transfer of Geoduck or Horse Clam from a vessel to another vessel.

"validated" means Geoduck or Horse Clam that have been weighed by an observer and the weight entered into the Geoduck and Horse Clam Validation & Harvest Log (see section 11 and explanatory note after section 15) or an alternative log approved by the Department of Fisheries and Oceans.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

"wasting" means discarding, failing to gather harvested Geoduck or Horse Clam, or failing to validate harvested Geoduck or Horse Clam suitable for human consumption.

1. Species of fish permitted to be taken:

Geoduck (Panopea generosa) and Horse Clam (Tresus spp.)

2. Quantities permitted to be taken:

The licensed vessel is permitted to catch and retain a maximum of 0 lb (0 kg) of Geoduck.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fish harvesters:

Document Released Under the Access to Information Act / Document divulgué en vertu

(a) Individuals fishing under authority of this licence shall be designated by the licence holder and shall carry proof of designation and shall provide proof of designation on request by any Fishery Officer or fishery guardian; and (b) designations are personal and non-transferable.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Waters in which fishing is permitted:

(1) Subject to subsection 6(2), fishing for Geoduck and Horse Clam is permitted by a gear type authorized in Part 1 during those times when persons fishing under authority of a Category G licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for Geoduck and Horse Clam, with that gear, in that area and during that time.

(2) All harvesting of Geoduck and Horse Clam shall be conducted from the seabed in waters at least 10 feet (3 m) below chart datum (i.e. deeper than 10 feet (3 m) at the lowest low tide).

7. Fishing gear permitted to be used:

(1) All harvesting of Geoduck and Horse Clam shall be conducted using hand-held, manually operated water nozzles guided and controlled underwater by a diver.

(2) Each water nozzle shall have a maximum inside diameter of 5/8 inch (1.59 cm).

(3) All Geoduck and Horse Clam or portions of Geoduck and Horse Clam which have been removed or dislodged from the substrate of the ocean floor are considered to have been harvested and shall be landed and validated. (See section 11) The following steps shall be taken when harvesting Geoduck and Horse Clam:

(a) all Geoduck and Horse Clam and portions of Geoduck and Horse Clam which have been harvested shall be immediately placed in a container; (b) Geoduck and Horse Clam shall remain in the container while taken to the surface and loaded onto the catcher boat; (c) on the catcher boat, Geoduck and Horse Clam may be removed from the first container and immediately placed in another container; (d) Geoduck and Horse Clam shall remain in the second container until landed and validated; and (e) no harvested Geoduck or Horse Clam may be discarded or wasted.

8. The type and size of containers to hold or transport Geoducks or Horse Clam and the marking of such containers:

Document Released Under the Access to Information Act / Document divulgué en vertu

(1) All Geoduck or Horse Clam shall be packed in containers with a maximum weight (while empty) of 5 lb (2.3 kg) each. The containers shall be clean and fabricated from approved material.

(2) All Geoduck or Horse Clam delivered to designated landing ports or transhipped to another vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink:

(a) vessel name and Vessel Registration Number (VRN); (b) Geoduck licence number (G Tab); (c) harvest date; (d) Geoduck Management Area (GMA), e.g. 24D01c; (e) Area and Subarea, e.g. 24-4; (f) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (g) common name of the product, i.e. Geoduck Clam or Horse Clam

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

9. Transhipment:

Geoduck or Horse Clam may be transhipped from the licensed vessel to another vessel licensed for the transportation of fish provided the vessel master complies with the following conditions:

(1) all Geoduck or Horse Clam are in containers and the containers are tagged as per section 8;

(2) the number of containers is recorded in the log;

(3) the "packer weight" (determined by subtracting the weight of the containers from the weight of the product) is recorded in the log;

(4) a copy of the log accompanies the product to the designated port; and

(5) the product is landed at a designated port and validated by an observer.

10. Locations permitted for the landing of Geoduck and Horse Clam:

Geoduck and Horse Clam shall be landed at one of the following ports:

(1) For fisheries off the east coast of Vancouver Island: (a) Port Hardy, Port McNeill, Campbell River, Heriot Bay, Lund, Westview, Comox, Deep Bay, French Creek, Nanaimo, Ladysmith, Chemainus, Cowichan Bay and Sidney.

(b) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(2) For fisheries off the west coast of Vancouver Island: Sooke, Port Alberni, Ucluelet, Tofino, Gold River, Zeballos, Fair Harbour, Winter Harbour, Coal Harbour.

(3) For fisheries in waters north of Cape Caution: Bella Bella, Massett, Port Hardy, Prince Rupert, Port Edward and Queen Charlotte City.

Document Released Under the Access to Information Act / Document divulgué en vertu

This condition applies to both the licensed vessel and, if the vessel master chooses to tranship his catch to another vessel, to the vessel receiving the catch.

11. Validation: (see explanatory note after section 15)

(1) Subject to subsection 11(4), all Geoduck and Horse Clam harvested or removed from the seabed floor under the authority of this licence shall be validated at the point and time of landing.

(2) Prior to validation of Geoduck and Horse Clam no person shall:

(a) smash the shells or slit the membranes of Geoduck or Horse Clam to drain the waters; or (b) dump, throw overboard, or otherwise discard Geoduck or Horse Clam which have been harvested and retained in accordance with the Fisheries Act and the regulations made thereunder.

(3) All weights shall be determined using a scale approved by Industry Canada.

(4) If the requirement to weigh Geoduck and Horse Clam at the point of landing cannot be met because weigh scales are not available, the vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall have an observer enter the total number of containers in the log.

(5) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide the observer with a hard copy of the log prior to each validation.

(6) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide to the observer at the point of landing, access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

12. Oral reports:

(1) The vessel master shall, under the circumstances set out in subsection 12(2), report the information set out therein by notifying in person an observer or by telephoning (800) 663-7152. Where feasible, at least 24 hour notice will be given.

(2) Before a fishing trip, upon cancellation of a fishing trip, after fishing, and prior to delivering Geoducks and Horse Clams: (a) vessel name, vessel master's name and vessel registration number; (b) Area, Subarea(s) and Geoduck Management Area(s); (c) date and time of arrival on, or departure from, the fishing location; and (d) date and time of landing, landing port and location at the port.

13. Harvest logs and chart records: (See explanatory note after section 15)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department. The content and format of this log (paper and electronic) shall meet the requirements as

Document Released Under the Access to Information Act / Document divulgué en vertu

defined by the Shellfish Data Unit for the current licence year.

(2) The harvest and fishing location information recorded in the log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the log no later than midnight of that day.

(4) The log shall be kept on board the licensed vessel.

(5) The log shall be produced for examination on demand of a fishery officer, a fishery guardian or an observer.

(6) The vessel master shall enter latitude and longitude co-ordinates for each dive in the log.

(7) For Geoduck and Horse Clam harvested from Areas 12 to 19 and 29, the vessel master shall provide a chart record of the locations fished to the Department.

(a) The chart shall be marked with: (i) the vessel registration number; (ii) the licence tab number; and (iii) the validation I.D. numbers.

The validation I.D. number is the unique page number assigned to each validation page of the Geoduck and Horse Clam Validation & Harvest Log. If an alternative log is used, the validation I.D. number is the unique page number provided by the Shellfish Data Unit when the licence holder contacts the Unit to obtain the information necessary to fulfil the log requirements. (see explanatory note after section 15).

(b) Each harvest site shall be clearly marked on the chart with a dive site reference or dive number, validation I.D. number and the dates that fishing activity occurred at each site. The dive numbers on the chart record shall correspond to the dive numbers in the log.

(c) The information for each day's harvest operations shall be recorded on the chart record no later than midnight of that day.

(8) The completed log pages (original copy), electronic copy of the log and, for Geoduck and Horse Clam harvested in Areas 12 to 19 and 29, the chart record of locations fished, shall be forwarded within 28 days following the end of each month in which fishing occurred to:

Department of Fisheries and Oceans Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, BC V9T 6N7 Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the current fishing season, the licence holder shall submit a nil report. The nil report shall include one page from the harvest logbook identifying the vessel, licence number and the year with 'nil'

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

entered in the body of the log; the licence holder shall sign the nil report.

14. Fish slips:

(1) An accurate written report shall be provided on a fish slip of all fish and shellfish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish or shellfish landed are used for bait, personal consumption or disposed of otherwise.

(3) The report shall be mailed nnot later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

(4) This report shall be made within seven days of the offloading regardless of whether or not the catch has been sold within that period.

15. WorkSafeBC (Workers' Compensation Board) Requirements:

All Geoduck and Horse Clam divers shall be in possession of a WorkSafeBC (previously Workers' Compensation Board of BC) Seafood Harvesting Diving Certificate.

Explanatory note - harvest log, fishing location information and validation: the Geoduck and Horse Clam Validation & Harvest Log issued by the Underwater Harvesters' Association is approved for both form and content by the Shellfish Data Unit. A service provider contracted by the Underwater Harvesters' Association will provide, for a fee, the logbook and coding, keypunch, bonded chart coding, mapping and validation services.

COMMUNAL PART 2 [February 15, 2017]

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with,

Document Released Under the Access to Information Act / Document divulgué en vertu

the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Part 1

This Part applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Part 2

This Part applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection

Document Released Under the Access to Information Act / Document divulgué en vertu

3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the

Document Released Under the Access to Information Act / Document divulgué en vertu

transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Part 3

This Part applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

Document Released Under the Access to Information Act / Document divulgué en vertu

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

Document Released Under the Access to Information Act / Document divulgué en vertu

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the

Document Released Under the Access to Information Act / Document divulgué en vertu

validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Part 4

This Part applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

GEODUCK AND HORSE CLAM Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FG 1 2017

GEODUCK AND HORSE CLAM Licence 2017 Date Issued: 22 Sep 2017

Licensed for: Commercial Fishing Expiry Date: 28 Feb 2018

Licence Holder:

FIN: 131025

CENTRAL COAST COMMERCIAL FISHERIES 2012 ASSOCIATION
2790 VARGO ROAD
CAMPBELL RIVER BC
V9W 4X1

Designated Vessel:

VRN 312730
DOT BC4239997
Vessel NOBBY
Vessel OAL 17.63 Meters
Gross Tonnage .00 Cubic Meters
Net Tonnage .00 Cubic Meters

Reported Vessel Owner:

FIN: 129846
KITASOO DEVELOPMENT CORPORATION
GENERAL DELIVERY
KLEMTU BC
V0T 1L0

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GEODUCK AND HORSE CLAM

Gear: DIVE

THIS LICENCE IS ISSUED UNDER THE AUTHORITY OF THE FISHERIES ACT AND OF SUBSECTION 4(1) OF THE ABORIGINAL COMMUNAL FISHING LICENCES REGULATIONS.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Version Date: 15-Feb-2017

CONDITIONS OF 2017/2018 COMMUNAL GROUNDFISH TRAWL LICENCE
Licence Period: February 21, 2017 to February 20, 2018 Option A
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the groundfish trawl fishery obtain a copy of the current Integrated Groundfish Fisheries Management Plan from the Department of Fisheries and Oceans. The management plan is intended for general information purposes only. Where there is a discrepancy between the plan and the regulations or these conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for groundfish by means of a bottom trawl net or midwater trawl net.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"coastwide" means all Canadian fisheries waters of the Pacific Ocean.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish dockside observer" means an individual designated pursuant

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"designated service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Integrated Quota Management Inc. of Vancouver, B.C.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 7 of these conditions.

"electronic hail software" means an electronic-based hail program that meets the minimum specifications set out in subsection 6(1)of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all fishing activity information shall be entered.

"functionality test certificate number(FTCN)" means the unique number assigned by an EM system technician certifying that an EM system has been installed and is fully functional.

"groundfish management area(s)" means the waters listed below, each comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Gulf Hake Area" means Areas 13 to 19 and 29 when used in connection with fishing for Pacific Hake.

"Gulf Pollock Area" means Areas 13 to 19 and 29 when used in connection with fishing for Walleye Pollock.

"Hail-out Report" means the report made to the designated groundfish hail service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

provider prior to commencement of a fishing trip. (See section 9).

"Hail-in Report" means the report made to the designated groundfish hail service provider prior to landing fish. (See section 12).

"landed" means having offloaded catch onto land.

"landing" means the offloading of catch onto land.

"mesh size" means the total length of twine measured along two contiguous sides of a single mesh, including the distance across the knot joining those sides but not including any other knots.

"Offshore Hake Area" means those waters comprising Areas 1 to 12, 20 to 21, 23 to 27, 101 to 111, 121, 123 to 127, 130 and 142, combined.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"rockfish" means the species listed under the heading "Rockfish/Thornyheads" in Appendix I.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Waters in which fishing is permitted:

(1) Fishing by bottom trawl is permitted only within those waters of Areas 1 to 11, 21, 23 to 27, 101 to 111, 121, 123 to 127, 130 and 142 during those times when persons fishing under authority of a Category T licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish in those areas.

(2) Fishing by midwater trawl gear is permitted in those areas and during those times when persons fishing under authority of a Category T licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish in those areas.

2. Species and quantities of fish that are permitted to be taken and the groundfish management area(s) from which these fish are permitted to be caught:

(1) The licensed vessel is permitted to catch and retain those species listed in column I of an item of the Table to this subsection, from the groundfish management area(s) set out in Column II of that item up to the maximum quantity set out in Column III of that item.

Table Species, Area and Quantity

Item Column I Column II Column III Species Areas Quantity in Round Weight

(2) A maximum of 15,000 pounds round weight (6804 kg) of rockfish listed in Appendix I and not referred to in subsection 2(1) may be landed per landing.

(3) An unlimited amount of groundfish, not including rockfish, listed in Appendix I and not referred to in subsection 2(1) may be landed.

(4) Subject to subsection 2(1), the round weight of mackerel landed shall not exceed 6 percent of the combined weight of Pacific Hake, listed in the table to subsection 2(1) as items 55 and 56.

(5) The vessel may retain all incidentally caught squid and octopus.

(6) When midwater trawling for Pacific Hake and when using an electronic monitoring system the vessel master shall retain all authorized species caught.

3. Prohibited Species:

When fishing under the authority of Part 1 of this licence the following species shall not be retained and shall be returned to the water immediately upon capture, in the manner that causes the least harm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Eulachon Thaleichthys pacificus Pacific Halibut Hippoglossus stenolepis Salmon species Onchorhynchus spp. Pacific Herring Clupea harengus pallasi Green Sturgeon Acipenser medirostris White Sturgeon Acipenser transmontanus Wolf-eels Anarrhichthys ocellatus Basking Shark Cetorhinus maximus Tope (Soupfin) Shark Galeorhinus galeus Bluntnose Sixgill Shark Hexanchus griseus

4. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

5. Designated fishers:

Individuals fishing under authority of this licence shall be designated pursuant to the Aboriginal Communal Fishing Licences Regulations, shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

6. Size of fish permitted to be taken:

(1) No person shall catch and retain a sablefish that is less than

(a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(2) No person shall catch and retain a lingcod that is less than

(a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

7. The type and size of fishing gear permitted to be used:

(1) Bottom trawl nets and midwater trawl nets are permitted subject to subsection 7(2).

(2) Bottom trawl nets are not permitted in Areas 12 to 20, 28 and 29.

(3) Subject to subsections 7(4), 7(5) and 7(6), the mesh size in any part of a bottom trawl net or midwater trawl net, including the cod-end, shall not be less than 76 mm.

(4) In that area bounded on the south by the parallel passing through 52 degrees 51 minutes north latitude in Hecate Strait, bounded on the north by the Canada/U.S. International boundary, bounded on the west by the meridian passing through 132 degrees 00 minutes west longitude in Dixon Entrance and, bounded on the east by the mainland of British Columbia, the mesh size in a bottom trawl net shall not be less than 152.6 mm in the last 50 meshes of the net, including the cod-end. In all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) In Queen Charlotte Sound: the mesh size in a bottom trawl shall not be less than 140 mm mesh size in the last 50 meshes of the net, including the cod-end. For all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm. This mesh size restriction applies to vessels fishing in waters shallower than 60 fathoms in the area bounded by the southern boundary of Pacific Fishery Management Areas 130-1 and 111 and 11-1 and 11-2 and the parallel passing through 52 degrees 51 minutes north latitude (Hecate Strait) in the north.

(6) All bottom trawl nets and midwater trawl nets, when used in fishing for Pacific Hake destined for delivery to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations, an escape panel fitted to permit the release of unwanted fish. This escape panel shall be located in the intermediate portion (lengthening piece) of the trawl net commencing at a point six feet from where the intermediate is attached to the cod-end. The escape panel shall be composed of not less than one row of meshes running parallel to the long axis of the intermediate for a distance of not less than six feet. The row(s) of mesh shall be cut and sewn with a length of twine or similar material having a breaking strength not exceeding 70 pounds.

(7) Where a minimum mesh size is prescribed, no person shall use any device by means of which openings that are smaller in size than the original mesh are created.

8. Transport and transhipment requirements:

(1) Subject to subsection 8(2), all groundfish taken under authority of this licence shall be transported by this licenced vessel to land.

(2) Pacific Hake and associated bycatch may be transhipped to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations.

9. Information reports required prior to the commencement of a trip:

Prior to the commencement of a trip, the vessel master shall report (hereinafter referred to as a Hail-out Report) to the designated groundfish hail service provider by either means described in subsection 9(1) or subsection 9(2).

The person identified as the vessel master in subsection 9(1)(b) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) If the Hail-out Report is submitted electronically to the designated groundfish hail service provider:

Subject to subsections 9(4) and 9(5), the vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip, provide the following information (hereinafter referred to as a Hail-out Report) to and obtain a hail-out number by contacting the designated groundfish hail service provider using the electronic hail software supplied by the service provider. The Hail-out Report

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

must include the following information:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

The vessel master must use the approved electronic hail software from the designated groundfish hail service provider that has been installed on an onboard computer that uses an Android operating system 4.0.3 or higher that has the ability to send and receive e-mail;

(2) If the Hail-out Report is submitted by telephone to the designated groundfish hail service provider:

Subject to subsections 9(3) and 9(4), the vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip provide the following information (hereinafter referred to as a Hail-out Report) to and obtain a hail-out number from the designated groundfish hail service provider by calling 1-866-658-0890: The Hail-out Report must include the following information:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

(3) Hail-out Report prior to fishing for Pacific Hake:

The vessel master shall report the information set out in subsections 9(1) and 9(2) to the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 not less than eight (8) hours prior to the commencement of a fishing trip for Pacific Hake.

(4) Hail-out Report prior to fishing for Pacific Hake (Joint Venture):

The vessel master shall report the following information to the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 not less than eight (8) hours prior to the commencement of the first fishing trip for Pacific Hake intended to be transhipped to a foreign vessel licensed under the Coastal Fisheries Protection Regulations:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) notification that they will be fishing a Joint Venture trip; (e) date of commencement of first Joint Venture fishing trip; and (f) anticipated date of completion of last Joint Venture fishing trip.

(5) The vessel master shall hail out for one trawl fishery type only.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(6) Hail-out number:

(a) Upon completing a Hail-out Report, the vessel master shall receive a unique hail-out number from the designated groundfish hail service provider. (b) The vessel master shall record the hail-out number in the vessel's Groundfish Trawl Log Book or in the vessel's electronic logbook.

(7) Cancellation of fishing trip

Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall notify DFO through the designated groundfish hail service provider and make a Hail-in Report to indicate the trip has been cancelled and that no fishing occurred either electronically or by calling 1-866-658-0890. A Cancellation Hail-in Report shall be made not later than three days after making the Hail-out report.

(8) Requirement to enter hail-out information into DFO's FOS system

The licence holder or vessel master shall arrange to have the hail-out data submitted to the designated hail service provider entered into the DFO's Fishery Operations System (FOS) not less than twenty-four (24) hours prior to the commencement of a fishing trip.

10. At-sea monitoring:

(1) Subject to subsections 10(2) and 10(3), the vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of a designated groundfish at-sea observer carried on board the vessel.

(2) When mid-water fishing for Pacific Hake and delivering all fish caught in a fresh non-frozen form, the vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system as described in section 11 on board the vessel.

(3) All vessels mid-water and bottom fishing for Pacific Hake destined for delivery to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations, shall have an electronic catch monitoring system as described in section 11.

11. Electronic Monitoring (EM) System (when midwater trawling for Pacific Hake):

(1) The vessel master, when using an electronic monitoring (EM) system to meet the at-sea monitoring requirement set out in Section 10, shall ensure that the EM system onboard the vessel meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor device (where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100% of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure that all components of the electronic monitoring (EM) system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The electronic monitoring (EM) system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing and hail in as soon as possible.

(5) The vessel master shall provide to the designated EM system service provider all sensor and video data from the EM system every 30 calendar days from the time of the last data retrieval/install event (provided the vessel has fished during this time).

(6) The vessel master shall make arrangements for EM service/data retrievals at the time of hail-in.

(7) The vessel master shall perform a Functionality Test prior to the commencement of each trip to ensure that there is a minimum of 15 percent hard disk storage space remaining on the installed system.

(8) The licence holder or vessel master shall arrange to have the EM service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

provider conduct a comparison of the EM sensor and video data with the Groundfish Trawl Fishing Log and the Groundfish Trawl Validation Record and then enter the data into the Fishery Operations System (FOS).

(9) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM system sensor and imagery data to the Department.

12. Requirement for the vessel master to report information from sea:

Prior to completing or cancelling a trip, the vessel master shall report to the designated groundfish hail service provider the following information.

(1) Subject to subsection 12(4), the vessel master shall report the following information (hereinafter referred to as a Hail-in Report) to the designated hail service provider not less than sixteen (16) hours prior to landing fish either electronically by using the electronic hail software supplied by the service provider or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) date, time and location of landing of the fish; (e) name of the fish buying station where fish are to be landed or the location of public sales or the name of the processor in the United States where fish are to be landed; and (f) estimated total round weight of fish on board.

(2) Upon completing a Hail-in Report, the designated groundfish hail service provider will provide the vessel master with a unique hail-in number.

(3) The vessel master shall record the hail-in number in the vessel's Groundfish Trawl Log Book or within the vessel's electronic logbook.

(4) Disembarking of the at-sea observer after completion of fishing activity:

The vessel master may after discontinuing fishing, and if transiting directly to an offloading port, subject to subsections 12(4)(a) through (e), disembark the observer in Port Hardy, Victoria, Ucluelet or Prince Rupert.

(a) A Hail-in Report, as described in subsection 12(1), must be provided to the designated service provider (Archipelago Marine Research Ltd.) prior to disembarkation of the observer.

(b) The use of Port Hardy for observer disembarkation shall be considered only when the vessel will be transiting southbound between Vancouver Island and the mainland of British Columbia.

(c) The use of Victoria for observer disembarkation shall be considered only when the vessel will be transiting eastbound to a Canadian landing port or transiting southbound to Blaine, Bellingham or Anacortes in Washington State.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(d) The use of Ucluelet for observer disembarkation shall be considered only when the vessel is transiting directly to Port Alberni, southbound to a Canadian landing port or to Blaine, Bellingham or Anacortes in Washington State.

(e) The use of Prince Rupert for observer disembarkation shall be considered only when the vessel is transiting southbound between Vancouver Island and the mainland of British Columbia to a Canadian landing port or the ports of Blaine, Bellingham or Anacortes in Washington State

(5) The vessel master transhipping fish to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations shall report the following information to the designated hail service provider immediately upon completion of participation in Joint Venture fishing activity either electronically or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fishery Identification Number (FIN) of the vessel master; (c) vessel registration number; and (d) date and time of completion of all transhipping activities for that fishing trip.

(6) The vessel master shall record the unique Hail-in number supplied by the designated groundfish hail service provider in the Groundfish Trawl Log Book or in the vessel's electronic logbook.

(7) Requirement to enter hail-in information into DFO's FOS system

The licence holder or vessel master shall arrange to have the hail-in information submitted to the designated groundfish hail service provider entered into the Fishery Operations System (FOS) not less than sixteen (16) hours prior to landing fish.

13. Records that the vessel master shall keep:

(1) Groundfish Trawl Log Book

(a) The vessel master shall keep a record of all fishing activity carried out under authority of this licence in either a DFO approved paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book.

(b) The Groundfish Trawl Log Book shall be kept in the manner set out in the example in the Groundfish Trawl Log Book set out in Appendix 8 (Groundfish Trawl Commercial Harvest Plan) of the current Integrated Groundfish Fisheries Management Plan or in the DFO approved electronic Groundfish Trawl Log Book and shall be complete.

(c) The vessel master shall record the information in the paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl Log Book for each tow, immediately after completion of the tow.

(d) The paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl Log Book shall be made available for inspection upon the request of an observer, a fishery officer or a fishery guardian.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(e) The completed original paper Groundfish Trawl Log Book pages and yellow copies shall be provided to the observer attending the landing of the fish.

(f) The vessel master shall ensure that the Groundfish Trawl Log Book is available for use prior to fishing, and that sufficient pages or that sufficient digital memory in the DFO approved electronic or in the DFO approved electronic Groundfish Trawl Log Book is available to cover any fishing trip.

(g) All recording in the paper Groundfish Trawl Log Book shall be in ink. If an error is made while completing an entry, the entry shall be crossed out. Erasure of an entry in the Groundfish Trawl Log Book is not permitted.

(h) The vessel master shall arrange to have all fishing activity information recorded in either the paper Trawl Log Book or in the DFO approved electronic Groundfish Trawl logbook entered into the DFO's Fishery Operations System (FOS) not less than forty-eight(48) hours after the completion of the landing of the fishing trip.

(2) Quota Status Report

(a) The vessel master shall keep a record, in the form commonly known as a Quota Status Report, of all groundfish landed by the vessel named in this licence. The Quota Status Report form will be supplied by the designated service provider.

(b) The vessel master shall keep the Quota Status Report on board the vessel and shall make it available for inspection and use upon the request of an observer, a fishery officer or a fishery guardian.

(3) Fish Slips

(a) The vessel master shall keep records, in the form commonly known as a fish slip, of all fish landed under the authority of this licence. Each fish slip shall contain the following information:

(i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales or the name of the processor in the United States accepting delivery; (vi) date of landing; (vii) number of days fished in each Area; (viii) landed weight of each groundfish species reported separately in pounds; (ix) method of dressing catch, by species; and (x) price paid per pound, by species.

(b) The vessel master shall ensure that the fish slip is sent not later than seven (7) days after landing to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Forms, phone (604) 596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604) 666-2716.

14. Location and times at which landing of fish from the vessel is permitted:

(1) All groundfish caught and retained under the authority of this licence shall be landed not later than 23:59 h local time February 27, 2018.

(2) Subject to subsections 14(3) and 14(4), all fish caught under the authority of this licence, shall be landed at one of the following locations:

In Canada:

Beaver Cove Ladysmith Sooke Campbell River Masset Tofino Chemainus Nanaimo Ucluelet Coal Harbour Port Alberni Metro Vancouver Comox Port Edward Victoria Courtenay Port Hardy Winter Harbour Cowichan Bay Prince Rupert Zeballos Deep Bay Queen Charlotte City Port Simpson French Creek Sidney

In the United States (Washington State):

Anacortes, Bellingham, Blaine, Westport.

(3) Subject to subsection 14(4), all fish caught under the authority of this licence shall be landed at a fish buying station licenced under the Fisheries Act (Province of British Columbia) except:

(a) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia); or

(b) fish landed in the United States at one of the locations listed in subsection 14(2).

(4) All Pacific Hake caught outside of the Gulf Hake Area shall be landed: (a) at a fish buying station licenced under the Fisheries Act (Province of British Columbia) at the following locations: (i) Ucluelet; (ii) Port Alberni; (iii) Port Hardy; (iv) Coal Harbour; (v) Victoria; (vi) Metro Vancouver; (vii) Port Simpson; or

(b) in the United States (Washington State): Westport; or

(c) transhipped to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations.

15. Method permitted for landing of fish from the vessel and verification by an observer of the weight and species of any fish caught and retained:

(1) No fish shall be landed unless an observer is present and authorizes the commencement of weight verification.

(2) The weight and species of all fish landed from the vessel shall be verified by an observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Subject to subsection 15(4), when any fish taken under authority of this licence are landed, all fish on board the vessel shall be landed at the same time.

(4) The vessel master may land a portion the fish on board the vessel provided that the vessel master ensures that the groundfish at-sea observer who was present on board the vessel during the fishing trip remains on board for the next fishing trip.

(5) All fish caught during one fishing trip and not landed at the conclusion of that trip shall be landed at the conclusion of the next fishing trip.

(6) No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

(7) The vessel master shall provide to the observer verifying the landing access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

(8) The licence holder or vessel master shall arrange for all catch and landing information to be entered into the Departmental Fishery Operations System (FOS) within two (2) days of completion of the fishing trip.

16. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing the fish and in the presence of an observer:

(a) Where fish are not placed in containers prior to landing and are not frozen at sea: (i) all fish shall be sorted and weighed by individual species; (ii) all fish segregated by species shall be weighed prior to intermixing of those species; (iii) if fish are placed into totes or other containers, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use; (iv) totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by an observer; and (v) if fish are transported directly from the vessel across an in-line scale (e.g., automated hopper) then the weight recorded shall be the net weight.

(b) Where fish are placed in containers prior to landing and are not frozen at sea: (i) each container shall be clearly marked as to the species contained therein; (ii) all containers shall be accurately weighed; and (iii) the containers shall be emptied and the contents sorted and weighed by individual species.

(c) Where fish are placed in containers prior to landing and are frozen at sea: (i) in the case of all groundfish, each container shall contain only one species; (ii) each container shall be clearly marked as to the species contained therein; (iii) all containers shall be accurately weighed; and (iv) a sample of no less than 15 percent of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by the Legal Metrology Branch, Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(3) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and the ice/slime or glaze allowance.

(4) There shall be a 2 percent allowance for ice/slime in the case of fresh fish and a 4 percent allowance for glaze in the case of frozen fish.

(5) In the case of dressed fish, the following conversion factors shall be used to calculate net round weights:

Rockfish/Thornyheads Frozen: Japanese Cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: Western Cut, 1.48 Fresh: Western cut, 1.51 Frozen: Head-on, 1.13 Fresh: Head-on, 1.16

Sablefish Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.37 Fresh: Western cut, 1.40 Frozen: Head-on, 1.09 Fresh: Head-on, 1.11

LingCod Frozen: Japanese Cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western Cut, 1.33 Fresh: Western cut, 1.36 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Pacific Cod Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.26 Fresh: Western cut, 1.28 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Arrowtooth Flounder Frozen: Head-on, 1.16 Fresh: Head-on, 1.14 Frozen: Head-off, 1.43 Fresh: Head-off, 1.39 Frozen: Head-off-tailed 1.54 Fresh: Head-off-tailed 1.49

Other flounders and soles Frozen: Head-on, 1.20 Fresh: Head-on, 1.22 Frozen: Head-off, 1.60 Fresh: Head-off, 1.64

Skates Fresh: Flap/Wing, 2.45

All of the above conversion factors include a 2 percent ice/slime allowance for fresh product and a 4 percent glaze allowance for frozen product.

17. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), and subject to subsection 17(2) below, the vessel master is authorized to engage in fishing activities, that may incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2) (c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

that while the fishing activities are conducted, any Basking Shark incidentally caught and alive, is released in a manner that causes it the least harm.

COMMUNAL PART 2 [February 15, 2017]

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Part 1

This Part applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Part 2

This Part applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Part 3

This Part applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port

Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Part 4

This Part applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers

under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

GROUNDFISH TRAWL Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FT 2 2017

GROUNDFISH TRAWL Licence 2017 — Date Issued: 04 Apr 2017

Licensed for: Commercial Fishing — Expiry Date: 20 Feb 2018

Licence Holder:
FIN: 131025
CENTRAL COAST COMMERCIAL FISHERIES 2012 ASSOCIATION
2790 VARGO ROAD
CAMPBELL RIVER BC
V9W 4X1

Designated Vessel:
VRN 312730
DOT BC4239997
Vessel NOBBY
Vessel OAL 17.63 Meters
Gross Tonnage .00 Cubic Meters
Net Tonnage .00 Cubic Meters

Reported Vessel Owner:
FIN: 129846
KITASOO DEVELOPMENT CORPORATION
GENERAL DELIVERY
KLEMTU BC
V0T 1L0

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: GROUNDFISH

Gear: TRAWL

Option: GROUNDFISH OPTION A

EACH GROUNDFISH TRAWL VESSEL OWNER/MASTER MUST ENSURE THAT A COPY OF THE PERSONALIZED REQUIREMENT TO CARRY AN AT-SEA OBSERVER LETTER IS KEPT ON BOARD THE VESSEL AT ALL TIMES.

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON FEBRUARY 20, 2018. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON JUNE 30, 2017.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 04 Apr 2017

Licence Serial No.: 429010

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Version Date: 16-Feb-2017

CONDITIONS OF 2017/2018 COMMUNAL GROUNDFISH TRAWL LICENCE
Licence Period: February 21, 2017 to February 20, 2018 Option A
Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the groundfish trawl fishery obtain a copy of the current Integrated Groundfish Fisheries Management Plan from the Department of Fisheries and Oceans. The management plan is intended for general information purposes only. Where there is a discrepancy between the plan and the regulations or these conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for groundfish by means of a bottom trawl net or midwater trawl net.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"coastwide" means all Canadian fisheries waters of the Pacific Ocean.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish dockside observer" means an individual designated pursuant

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"designated service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Integrated Quota Management Inc. of Vancouver, B.C.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 7 of these conditions.

"electronic hail software" means an electronic-based hail program that meets the minimum specifications set out in subsection 6(1)of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all fishing activity information shall be entered.

"functionality test certificate number(FTCN)" means the unique number assigned by an EM system technician certifying that an EM system has been installed and is fully functional.

"groundfish management area(s)" means the waters listed below, each comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Gulf Hake Area" means Areas 13 to 19 and 29 when used in connection with fishing for Pacific Hake.

"Gulf Pollock Area" means Areas 13 to 19 and 29 when used in connection with fishing for Walleye Pollock.

"Hail-out Report" means the report made to the designated groundfish hail service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

provider prior to commencement of a fishing trip. (See section 9).

"Hail-in Report" means the report made to the designated groundfish hail service provider prior to landing fish. (See section 12).

"landed" means having offloaded catch onto land.

"landing" means the offloading of catch onto land.

"mesh size" means the total length of twine measured along two contiguous sides of a single mesh, including the distance across the knot joining those sides but not including any other knots.

"Offshore Hake Area" means those waters comprising Areas 1 to 12, 20 to 21, 23 to 27, 101 to 111, 121, 123 to 127, 130 and 142, combined.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"rockfish" means the species listed under the heading "Rockfish/Thornyheads" in Appendix I.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Waters in which fishing is permitted:

(1) Fishing by bottom trawl is permitted only within those waters of Areas 1 to 11, 21, 23 to 27, 101 to 111, 121, 123 to 127, 130 and 142 during those times when persons fishing under authority of a Category T licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish in those areas.

(2) Fishing by midwater trawl gear is permitted in those areas and during those times when persons fishing under authority of a Category T licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish in those areas.

2. Species and quantities of fish that are permitted to be taken and the groundfish management area(s) from which these fish are permitted to be caught:

(1) The licensed vessel is permitted to catch and retain those species listed in column I of an item of the Table to this subsection, from the groundfish management area(s) set out in Column II of that item up to the maximum quantity set out in Column III of that item.

Table Species, Area and Quantity

(2) A maximum of 15,000 pounds round weight (6804 kg) of rockfish listed in Appendix I and not referred to in subsection 2(1) may be landed per landing.

(3) An unlimited amount of groundfish, not including rockfish, listed in Appendix I and not referred to in subsection 2(1) may be landed.

(4) Subject to subsection 2(1), the round weight of mackerel landed shall not exceed 6 percent of the combined weight of Pacific Hake, listed in the table to subsection 2(1) as items 55 and 56.

(5) The vessel may retain all incidentally caught squid and octopus.

(6) When midwater trawling for Pacific Hake and when using an electronic monitoring system the vessel master shall retain all authorized species caught.

3. Prohibited Species:

When fishing under the authority of Part 1 of this licence the following species shall not be retained and shall be returned to the water immediately upon capture, in the manner that causes the least harm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Eulachon Thaleichthys pacificus Pacific Halibut Hippoglossus stenolepis Salmon species Onchorhynchus spp. Pacific Herring Clupea harengus pallasi Green Sturgeon Acipenser medirostris White Sturgeon Acipenser transmontanus Wolf-eels Anarrhichthys ocellatus Basking Shark Cetorhinus maximus Tope (Soupfin) Shark Galeorhinus galeus Bluntnose Sixgill Shark Hexanchus griseus

4. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

5. Designated fishers:

Individuals fishing under authority of this licence shall be designated pursuant to the Aboriginal Communal Fishing Licences Regulations, shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

6. Size of fish permitted to be taken:

(1) No person shall catch and retain a sablefish that is less than

(a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(2) No person shall catch and retain a lingcod that is less than

(a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

7. The type and size of fishing gear permitted to be used:

(1) Bottom trawl nets and midwater trawl nets are permitted subject to subsection 7(2).

(2) Bottom trawl nets are not permitted in Areas 12 to 20, 28 and 29.

(3) Subject to subsections 7(4), 7(5) and 7(6), the mesh size in any part of a bottom trawl net or midwater trawl net, including the cod-end, shall not be less than 76 mm.

(4) In that area bounded on the south by the parallel passing through 52 degrees 51 minutes north latitude in Hecate Strait, bounded on the north by the Canada/U.S. International boundary, bounded on the west by the meridian passing through 132 degrees 00 minutes west longitude in Dixon Entrance and, bounded on the east by the mainland of British Columbia, the mesh size in a bottom trawl net shall not be less than 152.6 mm in the last 50 meshes of the net, including the cod-end. In all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) In Queen Charlotte Sound: the mesh size in a bottom trawl shall not be less than 140 mm mesh size in the last 50 meshes of the net, including the cod-end. For all other parts of a bottom trawl net, the mesh size shall not be less than 76 mm. This mesh size restriction applies to vessels fishing in waters shallower than 60 fathoms in the area bounded by the southern boundary of Pacific Fishery Management Areas 130-1 and 111 and 11-1 and 11-2 and the parallel passing through 52 degrees 51 minutes north latitude (Hecate Strait) in the north.

(6) All bottom trawl nets and midwater trawl nets, when used in fishing for Pacific Hake destined for delivery to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations, an escape panel fitted to permit the release of unwanted fish. This escape panel shall be located in the intermediate portion (lengthening piece) of the trawl net commencing at a point six feet from where the intermediate is attached to the cod-end. The escape panel shall be composed of not less than one row of meshes running parallel to the long axis of the intermediate for a distance of not less than six feet. The row(s) of mesh shall be cut and sewn with a length of twine or similar material having a breaking strength not exceeding 70 pounds.

(7) Where a minimum mesh size is prescribed, no person shall use any device by means of which openings that are smaller in size than the original mesh are created.

8. Transport and transhipment requirements:

(1) Subject to subsection 8(2), all groundfish taken under authority of this licence shall be transported by this licenced vessel to land.

(2) Pacific Hake and associated bycatch may be transhipped to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations.

9. Information reports required prior to the commencement of a trip:

Prior to the commencement of a trip, the vessel master shall report (hereinafter referred to as a Hail-out Report) to the designated groundfish hail service provider by either means described in subsection 9(1) or subsection 9(2).

The person identified as the vessel master in subsection 9(1)(b) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) If the Hail-out Report is submitted electronically to the designated groundfish hail service provider:

Subject to subsections 9(4) and 9(5), the vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip, provide the following information (hereinafter referred to as a Hail-out Report) to and obtain a hail-out number by contacting the designated groundfish hail service provider using the electronic hail software supplied by the service provider. The Hail-out Report

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

must include the following information:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

The vessel master must use the approved electronic hail software from the designated groundfish hail service provider that has been installed on an onboard computer that uses an Android operating system 4.0.3 or higher that has the ability to send and receive e-mail;

(2) If the Hail-out Report is submitted by telephone to the designated groundfish hail service provider:

Subject to subsections 9(3) and 9(4), the vessel master shall, not less than twenty-four (24) hours prior to the commencement of a fishing trip provide the following information (hereinafter referred to as a Hail-out Report) to and obtain a hail-out number from the designated groundfish hail service provider by calling 1-866-658-0890: The Hail-out Report must include the following information:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) type of trawl fishery trip; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) date of departure; (g) Subarea(s) to be fished; and (h) anticipated landing date, landing location and name of fish buying station.

(3) Hail-out Report prior to fishing for Pacific Hake:

The vessel master shall report the information set out in subsections 9(1) and 9(2) to the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 not less than eight (8) hours prior to the commencement of a fishing trip for Pacific Hake.

(4) Hail-out Report prior to fishing for Pacific Hake (Joint Venture):

The vessel master shall report the following information to the designated groundfish hail service provider either electronically or by calling 1-866-658-0890 not less than eight (8) hours prior to the commencement of the first fishing trip for Pacific Hake intended to be transhipped to a foreign vessel licensed under the Coastal Fisheries Protection Regulations:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) notification that they will be fishing a Joint Venture trip; (e) date of commencement of first Joint Venture fishing trip; and (f) anticipated date of completion of last Joint Venture fishing trip.

(5) The vessel master shall hail out for one trawl fishery type only.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(6) Hail-out number:

(a) Upon completing a Hail-out Report, the vessel master shall receive a unique hail-out number from the designated groundfish hail service provider. (b) The vessel master shall record the hail-out number in the vessel's Groundfish Trawl Log Book or in the vessel's electronic logbook.

(7) Cancellation of fishing trip

Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall notify DFO through the designated groundfish hail service provider and make a Hail-in Report to indicate the trip has been cancelled and that no fishing occurred either electronically or by calling 1-866-658-0890. A Cancellation Hail-in Report shall be made not later than three days after making the Hail-out report.

(8) Requirement to enter hail-out information into DFO's FOS system

The licence holder or vessel master shall arrange to have the hail-out data submitted to the designated hail service provider entered into the DFO's Fishery Operations System (FOS) not less than twenty-four (24) hours prior to the commencement of a fishing trip.

10. At-sea monitoring:

(1) Subject to subsections 10(2) and 10(3), the vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of a designated groundfish at-sea observer carried on board the vessel.

(2) When mid-water fishing for Pacific Hake and delivering all fish caught in a fresh non-frozen form, the vessel master shall ensure that at-sea monitoring is conducted for all vessel activities conducted under the authority of this licence by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system as described in section 11 on board the vessel.

(3) All vessels mid-water and bottom fishing for Pacific Hake destined for delivery to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations, shall have an electronic catch monitoring system as described in section 11.

11. Electronic Monitoring (EM) System (when midwater trawling for Pacific Hake):

(1) The vessel master, when using an electronic monitoring (EM) system to meet the at-sea monitoring requirement set out in Section 10, shall ensure that the EM system onboard the vessel meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor device (where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100% of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure that all components of the electronic monitoring (EM) system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The electronic monitoring (EM) system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing and hail in as soon as possible.

(5) The vessel master shall provide to the designated EM system service provider all sensor and video data from the EM system every 30 calendar days from the time of the last data retrieval/install event (provided the vessel has fished during this time).

(6) The vessel master shall make arrangements for EM service/data retrievals at the time of hail-in.

(7) The vessel master shall perform a Functionality Test prior to the commencement of each trip to ensure that there is a minimum of 15 percent hard disk storage space remaining on the installed system.

(8) The licence holder or vessel master shall arrange to have the EM service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

provider conduct a comparison of the EM sensor and video data with the Groundfish Trawl Fishing Log and the Groundfish Trawl Validation Record and then enter the data into the Fishery Operations System (FOS).

(9) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM system sensor and imagery data to the Department.

12. Requirement for the vessel master to report information from sea:

Prior to completing or cancelling a trip, the vessel master shall report to the designated groundfish hail service provider the following information.

(1) Subject to subsection 12(4), the vessel master shall report the following information (hereinafter referred to as a Hail-in Report) to the designated hail service provider not less than sixteen (16) hours prior to landing fish either electronically by using the electronic hail software supplied by the service provider or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fisher Identification Number (FIN) of the vessel master; (c) vessel registration number; (d) date, time and location of landing of the fish; (e) name of the fish buying station where fish are to be landed or the location of public sales or the name of the processor in the United States where fish are to be landed; and (f) estimated total round weight of fish on board.

(2) Upon completing a Hail-in Report, the designated groundfish hail service provider will provide the vessel master with a unique hail-in number.

(3) The vessel master shall record the hail-in number in the vessel's Groundfish Trawl Log Book or within the vessel's electronic logbook.

(4) Disembarking of the at-sea observer after completion of fishing activity:

The vessel master may after discontinuing fishing, and if transiting directly to an offloading port, subject to subsections 12(4)(a) through (e), disembark the observer in Port Hardy, Victoria, Ucluelet or Prince Rupert.

(a) A Hail-in Report, as described in subsection 12(1), must be provided to the designated service provider (Archipelago Marine Research Ltd.) prior to disembarkation of the observer.

(b) The use of Port Hardy for observer disembarkation shall be considered only when the vessel will be transiting southbound between Vancouver Island and the mainland of British Columbia.

(c) The use of Victoria for observer disembarkation shall be considered only when the vessel will be transiting eastbound to a Canadian landing port or transiting southbound to Blaine, Bellingham or Anacortes in Washington State.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(d) The use of Ucluelet for observer disembarkation shall be considered only when the vessel is transiting directly to Port Alberni, southbound to a Canadian landing port or to Blaine, Bellingham or Anacortes in Washington State.

(e) The use of Prince Rupert for observer disembarkation shall be considered only when the vessel is transiting southbound between Vancouver Island and the mainland of British Columbia to a Canadian landing port or the ports of Blaine, Bellingham or Anacortes in Washington State

(5) The vessel master transhipping fish to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations shall report the following information to the designated hail service provider immediately upon completion of participation in Joint Venture fishing activity either electronically or by calling 1-866-658-0890:

(a) vessel name; (b) name and Fishery Identification Number (FIN) of the vessel master; (c) vessel registration number; and (d) date and time of completion of all transhipping activities for that fishing trip.

(6) The vessel master shall record the unique Hail-in number supplied by the designated groundfish hail service provider in the Groundfish Trawl Log Book or in the vessel's electronic logbook.

(7) Requirement to enter hail-in information into DFO's FOS system

The licence holder or vessel master shall arrange to have the hail-in information submitted to the designated groundfish hail service provider entered into the Fishery Operations System (FOS) not less than sixteen (16) hours prior to landing fish.

13. Records that the vessel master shall keep:

(1) Groundfish Trawl Log Book

(a) The vessel master shall keep a record of all fishing activity carried out under authority of this licence in either a DFO approved paper Groundfish Trawl Log Book or a DFO approved electronic Groundfish Trawl Log Book.

(b) The Groundfish Trawl Log Book shall be kept in the manner set out in the example in the Groundfish Trawl Log Book set out in Appendix 8 (Groundfish Trawl Commercial Harvest Plan) of the current Integrated Groundfish Fisheries Management Plan or in the DFO approved electronic Groundfish Trawl Log Book and shall be complete.

(c) The vessel master shall record the information in the paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl Log Book for each tow, immediately after completion of the tow.

(d) The paper Groundfish Trawl Log Book or in the DFO approved electronic Groundfish Trawl Log Book shall be made available for inspection upon the request of an observer, a fishery officer or a fishery guardian.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(e) The completed original paper Groundfish Trawl Log Book pages and yellow copies shall be provided to the observer attending the landing of the fish.

(f) The vessel master shall ensure that the Groundfish Trawl Log Book is available for use prior to fishing, and that sufficient pages or that sufficient digital memory in the DFO approved electronic or in the DFO approved electronic Groundfish Trawl Log Book is available to cover any fishing trip.

(g) All recording in the paper Groundfish Trawl Log Book shall be in ink. If an error is made while completing an entry, the entry shall be crossed out. Erasure of an entry in the Groundfish Trawl Log Book is not permitted.

(h) The vessel master shall arrange to have all fishing activity information recorded in either the paper Trawl Log Book or in the DFO approved electronic Groundfish Trawl logbook entered into the DFO's Fishery Operations System (FOS) not less than forty-eight(48) hours after the completion of the landing of the fishing trip.

(2) Quota Status Report

(a) The vessel master shall keep a record, in the form commonly known as a Quota Status Report, of all groundfish landed by the vessel named in this licence. The Quota Status Report form will be supplied by the designated service provider.

(b) The vessel master shall keep the Quota Status Report on board the vessel and shall make it available for inspection and use upon the request of an observer, a fishery officer or a fishery guardian.

(3) Fish Slips

(a) The vessel master shall keep records, in the form commonly known as a fish slip, of all fish landed under the authority of this licence. Each fish slip shall contain the following information:

(i) vessel name; (ii) vessel registration number; (iii) name and Fisher Identification Number (FIN) of the vessel master; (iv) name of the tally person; (v) name of the fish buying station accepting delivery or the location of public sales or the name of the processor in the United States accepting delivery; (vi) date of landing; (vii) number of days fished in each Area; (viii) landed weight of each groundfish species reported separately in pounds; (ix) method of dressing catch, by species; and (x) price paid per pound, by species.

(b) The vessel master shall ensure that the fish slip is sent not later than seven (7) days after landing to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Forms, phone (604) 596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604) 666-2716.

14. Location and times at which landing of fish from the vessel is permitted:

(1) All groundfish caught and retained under the authority of this licence shall be landed not later than 23:59 h local time February 27, 2018.

(2) Subject to subsections 14(3) and 14(4), all fish caught under the authority of this licence, shall be landed at one of the following locations:

In Canada:

Beaver Cove Ladysmith Sooke Campbell River Masset Tofino Chemainus Nanaimo Ucluelet Coal Harbour Port Alberni Metro Vancouver Comox Port Edward Victoria Courtenay Port Hardy Winter Harbour Cowichan Bay Prince Rupert Zeballos Deep Bay Queen Charlotte City Port Simpson French Creek Sidney

In the United States (Washington State):

Anacortes, Bellingham, Blaine, Westport.

(3) Subject to subsection 14(4), all fish caught under the authority of this licence shall be landed at a fish buying station licenced under the Fisheries Act (Province of British Columbia) except:

(a) fish sold directly to the public under authority of a fisherman's vending licence issued under the Fisheries Act (Province of British Columbia); or

(b) fish landed in the United States at one of the locations listed in subsection 14(2).

(4) All Pacific Hake caught outside of the Gulf Hake Area shall be landed: (a) at a fish buying station licenced under the Fisheries Act (Province of British Columbia) at the following locations: (i) Ucluelet; (ii) Port Alberni; (iii) Port Hardy; (iv) Coal Harbour; (v) Victoria; (vi) Metro Vancouver; (vii) Port Simpson; or

(b) in the United States (Washington State): Westport; or

(c) transhipped to a foreign fishing vessel licensed under the Coastal Fisheries Protection Regulations.

15. Method permitted for landing of fish from the vessel and verification by an observer of the weight and species of any fish caught and retained:

(1) No fish shall be landed unless an observer is present and authorizes the commencement of weight verification.

(2) The weight and species of all fish landed from the vessel shall be verified by an observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Subject to subsection 15(4), when any fish taken under authority of this licence are landed, all fish on board the vessel shall be landed at the same time.

(4) The vessel master may land a portion the fish on board the vessel provided that the vessel master ensures that the groundfish at-sea observer who was present on board the vessel during the fishing trip remains on board for the next fishing trip.

(5) All fish caught during one fishing trip and not landed at the conclusion of that trip shall be landed at the conclusion of the next fishing trip.

(6) No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

(7) The vessel master shall provide to the observer verifying the landing access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

(8) The licence holder or vessel master shall arrange for all catch and landing information to be entered into the Departmental Fishery Operations System (FOS) within two (2) days of completion of the fishing trip.

16. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing the fish and in the presence of an observer:

(a) Where fish are not placed in containers prior to landing and are not frozen at sea: (i) all fish shall be sorted and weighed by individual species; (ii) all fish segregated by species shall be weighed prior to intermixing of those species; (iii) if fish are placed into totes or other containers, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use; (iv) totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by an observer; and (v) if fish are transported directly from the vessel across an in-line scale (e.g., automated hopper) then the weight recorded shall be the net weight.

(b) Where fish are placed in containers prior to landing and are not frozen at sea: (i) each container shall be clearly marked as to the species contained therein; (ii) all containers shall be accurately weighed; and (iii) the containers shall be emptied and the contents sorted and weighed by individual species.

(c) Where fish are placed in containers prior to landing and are frozen at sea: (i) in the case of all groundfish, each container shall contain only one species; (ii) each container shall be clearly marked as to the species contained therein; (iii) all containers shall be accurately weighed; and (iv) a sample of no less than 15 percent of each type of container shall be taken, as directed by an observer. The containers shall be emptied and the contents sorted where necessary and weighed by individual species.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by the Legal Metrology Branch, Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(3) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and the ice/slime or glaze allowance.

(4) There shall be a 2 percent allowance for ice/slime in the case of fresh fish and a 4 percent allowance for glaze in the case of frozen fish.

(5) In the case of dressed fish, the following conversion factors shall be used to calculate net round weights:

Rockfish/Thornyheads Frozen: Japanese Cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: Western Cut, 1.48 Fresh: Western cut, 1.51 Frozen: Head-on, 1.13 Fresh: Head-on, 1.16

Sablefish Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.37 Fresh: Western cut, 1.40 Frozen: Head-on, 1.09 Fresh: Head-on, 1.11

LingCod Frozen: Japanese Cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western Cut, 1.33 Fresh: Western cut, 1.36 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Pacific Cod Frozen: Japanese Cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western Cut, 1.26 Fresh: Western cut, 1.28 Frozen: Head-on, 1.08 Fresh: Head-on, 1.11

Arrowtooth Flounder Frozen: Head-on, 1.16 Fresh: Head-on, 1.14 Frozen: Head-off, 1.43 Fresh: Head-off, 1.39 Frozen: Head-off-tailed 1.54 Fresh: Head-off-tailed 1.49

Other flounders and soles Frozen: Head-on, 1.20 Fresh: Head-on, 1.22 Frozen: Head-off, 1.60 Fresh: Head-off, 1.64

Skates Fresh: Flap/Wing, 2.45

All of the above conversion factors include a 2 percent ice/slime allowance for fresh product and a 4 percent glaze allowance for frozen product.

17. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), and subject to subsection 17(2) below, the vessel master is authorized to engage in fishing activities, that may incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2) (c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

that while the fishing activities are conducted, any Basking Shark incidentally caught and alive, is released in a manner that causes it the least harm.

APPENDIX I

GROUNDFISH SPECIES

Rockfish/Thornyheads

Aurora Rockfish Sebastes aurora Black Rockfish Sebastes melanops Blue Rockfish Sebastes mystinus Bocaccio Sebastes paucispinis Brown Rockfish Sebastes auriculatus Canary Rockfish Sebastes pinniger Chilipepper Rockfish Sebastes goodei China Rockfish Sebastes nebulosus Copper Rockfish Sebastes caurinus Darkblotched Rockfish Sebastes crameri Dusky Rockfish Sebastes ciliatus Greenstriped Rockfish Sebastes elongatus Harlequin Rockfish Sebastes variegatus Northern Rockfish Sebastes polyspinis Pacific Ocean Perch Sebastes alutus Puget Sound Rockfish Sebastes emphaeus Pygmy Rockfish Sebastes wilsoni Quillback Rockfish Sebastes maliger Redbanded Rockfish Sebastes babcocki Redstripe Rockfish Sebastes proriger Rosethorn Rockfish Sebastes helvomaculatus Rougheye Rockfish Sebastes aleutianus Sharpchin Rockfish Sebastes zacentrus Shortbelly Rockfish Sebastes jordani Shortraker Rockfish Sebastes borealis Silvergray Rockfish Sebastes brevispinis Splitnose Rockfish Sebastes diploproa Stripetail Rockfish Sebastes saxicola Tiger Rockfish Sebastes nigrocinctus Vermilion Rockfish Sebastes miniatus Widow Rockfish Sebastes entomelas Yelloweye Rockfish Sebastes ruberrimus Yellowmouth Rockfish Sebastes reedi Yellowtail Rockfish Sebastes flavidus Longspine thornyhead Sebastolobus altivelis Shortspine thornyhead Sebastolobus alascanus

Mackerel

Chub Mackerel Scomber japonicus Pacific Mackerel Trachurus symmetricus

Pacific Herring Clupea harengus pallasi Green Sturgeon Acipenser medirostris White Sturgeon Acipenser transmontanus Wolf-eels Anarrhichthys ocellatus Basking Shark Cetorhinus maximus Tope (Soupfin) Shark Galeorhinus galeus Bluntnose Sixgill Shark Hexanchus griseus

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

HALIBUT Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FL 1 2017

HALIBUT Licence 2017 Date Issued: 09 Jun 2017

Licensed for: Commercial Fishing Expiry Date: 20 Feb 2018

Licence Holder:
FIN: 29255
GITXAALA NATION
PO BOX 149
KITKATLA BC
V0V 1C0

s.19(1)

Designated Vessel:
VRN 23642
DOT 346976
Vessel DIANNE LEA
Vessel OAL 11.04 Meters
Gross Tonnage 27.11 Cubic Meters
Net Tonnage 18.42 Cubic Meters

Reported Vessel Owner:
FIN: [redacted]
CLYDE DAVID MOODY
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: HALIBUT

Gear: HOOK AND LINE

Version Date: 01-May-2017

CONDITIONS OF 2017 COMMUNAL PRAWN AND SHRIMP TRAP LICENCE (300 TRAPS)

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the prawn and shrimp trap fishery obtain a copy of the current Prawn and Shrimp by Trap - Integrated Fisheries Management Plan. The Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for prawns and shrimp.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Communications Service Provider (CSP)" means the company used to transmit data from the Vessel Monitoring System (VMS) unit on board the licensed vessel to the DFO Vessel Monitoring Operations Centre.

"International Mobile Station Equipment Identifier (IMEI)" means the unique identifying number assigned to mobile telecommunications devices by their manufacturer.

"Department (DFO)" means the Department of Fisheries and Oceans.

"landing" means the transfer of fish from the licensed vessel to land.

"prawn and shrimp trap gear" means traps and attached lines and buoys; it does not include holding cages which are set on buoys and lines separate from traps.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"Fishery Operating System (FOS)" means the Department's database into which all specified fishing information shall be entered.

"service provider" means a private sector company or individual authorized by the Department to enter information into a database located on a Department of Fisheries and Oceans internet site designated for this purpose, for the purpose of assisting licence holders and vessel masters in meeting these conditions of licence with regards to reporting of information.

"set and haul validation number" means the unique number issued by a service provider at the time the licence holder establishes a set-haul data collection agreement.

"single haul" means hauling trap gear to the surface of the water only once per day.

"string" means a single unit of prawn fishing gear consisting of buoys, buoy lines, groundline and traps.

"vessel master" means the individual embarked on the vessel and responsible for the operation of the vessel and the fishing activities carried out under authority of this licence.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Designated fishers:

(a) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer; and (b) designations are personal and non-transferable.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified as set out in section 26 of the Fishery (General) Regulations.

(2) Fishing gear shall be identified as set out in sections 27 and 29 of the Fishery (General) Regulations.

4. Species of fish permitted to be taken:

(1) Prawn (Pandalus platyceros) and other shrimp (Pandalus and Pandalopsis spp.).

(2) Octopus (Enteroctopus dofleini/Octopus dofleini) caught incidentally during the prawn and shrimp trap fishery may be retained, except in those areas closed for octopus retention.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

5. Minimum size:

(1) The minimum size limit for whole prawn is 33 mm carapace length measured from the most posterior part of the eye orbit to the posterior mid-dorsal margin of the carapace.

(2) The minimum size limit for tailed prawn is 22 mm telson length, measured along the mid dorsal line of the telson from the anterior margin to the posterior margin. The telson is the central piece of the tail "fan".

6. Waters in which fishing is permitted to be carried out:

(1) Fishing is permitted in all Subareas, except for Subareas 4-10 and 4-11, in those areas and during those times when vessels licensed under a Category W licence issued pursuant to the Pacific Fishery Regulations, 1993, are permitted to fish.

7. The type of fishing gear permitted to be used:

(1) Trap gear is permitted to be used. Traps shall include the following trap escapement modifications except in Subareas 20-6 and 20-7:

(a) Web or Soft Mesh Traps: (i) Web or soft mesh traps shall be covered with a single layer of mesh. The mesh size shall measure a minimum of 38.1 mm and provide an opening such that a 19 mm diameter round peg will readily pass through the mesh opening on the vertical sides of the trap without stretching or altering the shape of the mesh opening. (ii) All mesh used in the trap, including the tunnels, shall conform to this minimum size. The openings of the mesh shall not be obstructed except for any obstruction resulting from the frame of the trap. (iii) Web and soft mesh traps shall contain an opening equal to or exceeding 30 cm in length. The opening shall be within 15 cm of the bottom of the trap and parallel with the bottom frame. The opening shall be laced, sewn, or otherwise secured by a single strand of no greater than #30 untreated cotton twine. The cotton twine shall be knotted at each end only. The twine shall not be tied or looped around the frame of the trap.

(b) Wire and Hard Mesh Traps: (i) Wire and hard mesh traps shall have four opposing tunnels constructed of an unobstructed rigid square mesh material having a minimum dimension (after dip coating) that will allow the passage of a 22.2 mm square peg through the mesh without altering the shape of the mesh opening. The lower side of each tunnel shall extend to the bottom edge of the trap and shall be at least one-half the length of the trap side; or (ii) If the tunnels are not modified as described above, the bottom and two opposing sides shall be constructed of an unobstructed square mesh material that will allow the passage of a 19 mm square peg through the mesh without altering the shape of the mesh opening; or (iii) The bottom and all sides shall be constructed of an unobstructed square mesh material that will allow the passage of a 22.2 mm square peg through the mesh without altering the shape of the mesh opening. (iv) Wire and hard mesh traps shall have a biodegradable ("rot") panel. The rot panel shall consist of a section in a trap side wall that has been laced, sewn, or otherwise secured by a single strand of no

This report may contain data rated up to Protected A. Do not release this data to external parties

greater than #30 untreated cotton twine, such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted opening. The opening shall exceed a square 11cm by 11cm.

8. The size of fishing gear permitted to be used:

The trap volume is determined by measuring the outside dimensions of the trap and includes the tunnel volume. The maximum trap size permitted in all Subareas is as follows:

(1) Web or soft mesh traps shall have a volume no greater than 170 litres.

(2) Wire or hard mesh traps shall have a volume no greater than 100 litres, except those traps constructed with a mesh in the bottom and all sides that will allow a 22.2 mm square peg to pass through, which shall have a volume no greater than 170 litres.

9. The quantity of fishing gear permitted to be used:

(1) Subject to subsections 9(2) and 9(3), a maximum of 300 traps set on a maximum of six groundlines may be fished under authority of this licence.

(2) Of the 300 traps, a maximum of 150 traps set on a maximum of three groundlines may be fished in the following areas:

(a) Subareas 28-1 to 28-5 and 28-11 to 28-14 (Howe Sound and Indian Arm); (b) Subareas 16-5 to 16-8 (Salmon and Sechelt Inlets); (c) Subareas 19-7 to 19-12 (Saanich Inlet); and (d) Subareas 23-1 to 23-3 (Alberni Inlet).

(3) Of the 300 traps, a maximum of 50 traps may be fished under the authority of this licence in Subareas 20-6 and 20-7 (Sooke Harbour and Sooke Basin). In Subareas 20-6 and 20-7 only, each trap may be individually buoyed.

10. Buoys, buoy lines and groundlines:

(1) Subject to subsection 10(7), prawn and shrimp trap gear shall be marked at both ends of the groundline by: (a) a red or orange buoy with a minimum circumference of 127 cm; or (b) a 10 cm x 122 cm white PVC pipe weighted at one end and painted orange at the other.

(2) Subject to subsection 10(7), in addition to the vessel registration number (VRN), the letters "PRN" shall be printed on each buoy or PVC pipe and be not less than 75 mm in height and in a colour that contrasts with their background.

(3) Buoys or PVC pipe labelled with "PRN", as set out in subsections 10(1) and 10(2), shall only be attached to groundlines that have prawn and shrimp traps attached.

(4) Where holding cages are hung on separate buoys, the buoys shall be marked with vessel name, VRN, and the word "CAGE".

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) The maximum permitted groundline length is 1100 m.

(6) All buoy lines, trap lines and groundlines shall be non-floating so that the lines remain below the surface of the water in order to minimize navigational hazards.

(7) Coonstripe Shrimp traps set individually in the Sooke shrimp fishery in Subareas 20-6 and 20-7 may be marked with a single bullet shaped buoy. The letter "W" shall be printed on each buoy in addition to the VRN and both shall be not less than 75 mm in height and in a colour that contrasts with their background.

11. Marking of traps with tags:

(1) All traps fished under the authority of this licence shall be marked with a tag that meets the requirements of the Department.

(2) Replacement trap gear may be carried on board the vessel provided that the trap is untagged and has no snaps or other means of directly attaching the trap to a groundline.

(3) Only those tags that have been reported and registered to this licence in the Fishery Operating System (FOS) shall be attached to traps.

(4) Each tag shall be attached to the trap so that the tag number is visible without the necessity of opening the trap.

(5) Old tags shall be removed and destroyed.

12. Manner in which gear is permitted to be used:

(1) Setting and hauling of prawn and shrimp gear is permitted only between 07:00 h and 19:00 h.

(2) Hauling of prawn and shrimp trap gear including lines, buoys and holding cages attached to traps is permitted only once per day. This is referred to as single haul.

13. Avoidance of entanglement in fishing gear:

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

(a) are conducted under licences issued under the Fisheries Act; and (b) that may incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A
Do not release this data to external parties.

released in a manner that causes them the least harm.

14. Sorting of Catch:

(1) Immediately after each trap is pulled on board the vessel the contents of that trap shall be sorted.

(2) Undersize prawns and by-catch other than those species for which the vessel has a licence shall be returned to the water immediately and in the manner that causes the least harm.

(3) All prawns carrying eggs externally on the underside of the tail shall be returned to the water immediately and in the manner that causes the least harm.

(4) Eggs shall not be removed from prawns carrying eggs.

15. Catch prohibited on board the licensed vessel while fishing:

(1) No prawns or shrimp that are not permitted to be retained under the authority of this licence shall be on board the licensed vessel.

16. Records - trap tags:

(1) The licence holder shall arrange to have trap tag number information entered into the FOS not later than 24 hours after being issued the tags. The following information shall be provided: (a) VRN; (b) the tag numbers; (c) the tag colours; (d) the date the tags were issued; and (e) the name of the person who issued the tags.

17. Records - Harvest Log: (see explanatory note after Section 21)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department in accordance with the timing set out in subsection 17(8). The content and format of the log (paper and electronic) shall meet the requirements as defined by Fisheries and Oceans Canada Aquatic Resources Research and Assessment Division's Shellfish Data Unit.

(2) Data shall be entered separately into the harvest log for each individual string of traps.

(3) The latitude and longitude and time of haul shall be entered into the harvest log not later than 30 minutes (one half hour) after the hauling of a string of gear. This shall occur before hauling the next string of gear. The time of haul shall be recorded in the dedicated "Time of Haul" column.

(4) All remaining information for each day's harvest operations shall be recorded in the harvest log not later than midnight of that day.

(5) The harvest and fishing location information recorded in the harvest log shall be complete and accurate.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

(6) The harvest log shall be kept on board the licensed vessel.

(7) The harvest log shall be produced for examination on demand of a fishery officer or a fishery guardian.

(8) The licence holder shall ensure the completed log pages (original copy) and electronic copy of the log are forwarded not later than 28 days following the end of each month in which fishing occurred to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo BC V9T 6N7

Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the fishing season, the licence holder shall submit a nil report. One page from the harvest log identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log and signed by the licence holder constitutes a nil report.

18. Requirement to hail out:

(1) The vessel master shall arrange to have fishing activity reports (hails) entered into the FOS between 08:00 h and 16:00 h Monday to Friday, not on statutory holidays, prior to starting to fish. The following information shall be reported:

(a) vessel name and VRN; (b) the date and time the report was made; (c) the name of the person who provided the information; (d) the name of the person who received the hail information; (e) Subareas to be fished; (f) time and date fishing will begin; (g) set and haul validation number; and (h) the hail validation number issued by the service provider to the vessel.

19. Vessel Monitoring System:

(1) The licence holder shall have a DFO-approved vessel monitoring system (VMS) unit installed on the vessel authorized to fish under this licence. The VMS unit's antenna shall be mounted such that there is an unobstructed signal transmission/reception at all times. A list of DFO-approved VMS units can be found at http://www.nfl.dfo-mpo.gc.ca/e0011108 or by contacting DFO by telephone Toll Free at 1 (888) 772-8225. (a) The approved VMS unit shall provide data to the DFO Vessel Monitoring Operations Centre.

(b) For each VMS unit installation, replacement, transfer, or change to the licence holder, a completed National Vessel Monitoring System (VMS) Form (available from DFO at http://www.nfl.dfo-mpo.gc.ca/e0010178) shall be forwarded by facsimile to 1 (709) 772-5787. (c) At the beginning of the fishing season, the form for each VMS unit installation, replacement, transfer, or change to the licence holder shall be forwarded not less than two business days before commencing fishing.

(d) The licence holder and vessel master shall ensure the system is fully

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

operational, turned on and in use from the time the vessel leaves port for the first fishing trip until it returns to port and all of the fish on board the vessel is offloaded after the last fishing trip.

(e) The licence holder or vessel master shall ensure that the VMS unit on the vessel reports the following information automatically to DFO every 15 minutes: (i) Communication Service Provider (CSP) identifier for the VMS unit; (ii) geographic position (latitude/longitude) of the vessel; and (iii) date and time corresponding to the aforementioned position. (f) Should any or all of this VMS unit equipment become inoperative, is turned off, or malfunction in any way, the licence holder or vessel master shall, immediately (next business day if after hours) notify DFO of any such malfunction by telephone at 1-866-930-4000 Monday to Friday 8:00 a.m. to 4:00 p.m. and provide the following information: (i) vessel master's name; (ii) vessel name and VRN; (iii) date and time of sailing; (iv) port of landing; and (v) telephone number where the vessel master can be reached.

(g) The licence holder or vessel master shall ensure that a DFO-approved VMS unit is activated within 72 hours of the initial malfunction of the original VMS unit on board the licensed vessel. A replacement VMS unit may be obtained by phoning 1-866-930-4000 and providing the following information: (i) vessel master's name; (ii) vessel name and VRN; (iii) telephone number where the vessel master can be reached.

(h) After 72 hours following a malfunction, if a functioning VMS unit is not activated aboard the vessel, the licence holder or vessel master shall cease fishing and may only resume fishing once a functional VMS unit is turned on and fully operational or when the licence holder or vessel master has received approval from DFO. (i) Where a VMS unit is used on the vessel during any fishing trip, no person shall: (i) alter or tamper with the VMS unit or its operation; (ii) destroy, dispose of or remove the VMS unit or its associated electronic records or storage media; (iii) emit, or cause to be emitted, any electronic or electric signal that renders the equipment or system inoperative or inaccurate; (iv) interfere or block any signals required by the VMS unit to gather, record, or transmit information; or (v) turn off the VMS unit from the time the vessel leaves port for the first fishing trip until it returns to port and all of the fish on board the vessel is offloaded after the last fishing trip. (j) In the event of a VMS unit failure where a vessel carries two or more approved VMS units on board, it is the responsibility of the licence holder or vessel master to immediately notify DFO that a secondary unit is being activated and subsequently ensure it is fully operational, turned on and in use before resuming fishing.

20. Information reports from sea:

(1) The vessel master shall arrange to have information about fishing operations and spawner index information reported to the Department or a service provider as required.

(2) Fishing Operations At-sea Report A Fishing Operations At-sea Report shall be

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

made by the service provider at least once between May 1 and June 30 while the vessel is engaged in fishing, and entered into the FOS not later than 7 days following the collection of the information. A minimum of 45 traps shall be hauled from the water and examined for the purposes of completing the information report. Fishing Operations At-sea Reports shall include the following:

(a) vessel name and VRN; (b) vessel master's name; (c) name of the service provider and person who collected the information; (d) date the information was collected; (e) the Subarea in which the inspection took place; (f) time of commencement and completion of the collection of the information; (g) confirmation of a logbook on board; (h) confirmation that logbook entries are up to date; (i) the current hail verification number; (j) the number of unused traps on board (on deck) that were observed; (k) the number of traps that were hauled from the water and examined; (l) the latitude and longitude of the first trap hauled and examined; (m) the latitude and longitude of the last trap hauled and examined; (n) confirmation that all hauled traps have a trap tag attached; (o) the numbers seen on the tags attached to the traps; (p) confirmation of appropriate trap mesh size; (q) confirmation that all buoys are labelled with the VRN; (r) the total number of octopus caught by the traps which were hauled; and (s) an indication of how many octopus were released.

(3)Set and Haul Data The following set and haul data shall be provided to the service provider during fishing operations: (a) Vessel name; (b) VRN; (c) Activity: set or haul (d) GPS source: GPS device or manual entry; (e) Vessel GPS location (latitude and longitude); (f) String GPS location (latitude and longitude); (g) Subarea of string location; (h) Communication Service Provider Number; (i) UTC date and time (yyyy-mm-dd, HH:MM:SS); (j) Speed (knots); (k) Heading; and (l) International Mobile Station Equipment Identifier (IMEI).

(4) Set and haul data shall be transmitted to the service provider not later than five (5) minutes following the setting or retrieval of each string of gear.

(5) A DFO-approved VMS unit which integrates the set and haul programming shall automatically provide vessel location data every 15 minutes, and the vessel master shall enter the set and haul data of a given set or haul activity using the facilities of the VMS unit.

(6) The vessel master using a DFO-approved VMS unit which does not integrate the set and haul programming, shall provide the information set out in subsection 20(3) by either a) sending the information by electronic mail to prawnsethaul@jothomas.com; or b) phoning 1-866-930-4000 and providing the information verbally. The Communication Service Provider Number and IMEI are not required for verbal reports.

(7) Spawner Index Data (a) Each vessel that fishes between May 1 and June 30 shall provide data as set out in subsection 20(7)(b) to the Department from 6 spawner index samples. (b) Each spawner index sample shall consist of a sample of one complete string of gear which has been set for a minimum of 12 hours, with a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

minimum of every fourth trap contributing to the sample. A minimum of 12 traps shall be sampled from each string of gear sampled for spawner index. The following information shall be reported:

(i) for each string of gear: (A) vessel name and VRN; (B) date of sampling; (C) set number; (D) sampler's name; (E) latitude and longitude of sample; (F) Subarea; (G) local geographic area name; (H) vessel master's name; (I) years of experience of the vessel master in that fishing location; (J) the number of days that the vessel has been fishing in that location prior to the spawner index sample; (K) maximum and minimum trap depth for the sample; (L) set and haul time of string which is being sampled; (M) all rockfish caught by species and count; and (N) soak duration in hours.

(ii) for each trap sampled from the string: (A) trap type in accordance with the Department's trap type codes; (B) bait type in accordance with the Department's bait type codes; (C) a sample "usability" code as provided by the Department to indicate the presence of octopus in the trap or other conditions that would render the data from that trap unusable; and (D) the numbers of prawns caught for each of the 6 sex classes.

(iii) for the total of all samples from the string: (A) the number of traps sampled from that string; and (B) any other applicable comments regarding the usability of information from that string.

21. Fish Slips:

(1) A complete and accurate written report of all fish and shellfish caught and retained under the authority of this licence shall be submitted by the vessel master on a fish slip.

(2) The record shall contain the following information: (a) buyer's name, address and telephone number; (b) harvester's name and address; (c) processing plant name; (d) landing date; (e) vessel name and VRN; (f) gear used to harvest the fish; (g) Area(s) where fishing occurred and days spent fishing in each Area; (h) the individual species of each fish sold or offloaded; (i) the description of the product or landed form of each species sold or offloaded; (j) the number of fish (pieces) of each species sold or offloaded; (k) the weight of each species sold or offloaded; (l) the price paid for each species sold; and (m) the total value of each species sold or offloaded.

(3) A report shall be made even if the fish or shellfish are used for bait, personal consumption or disposed of otherwise.

(4) The report shall be mailed not later than seven days after the offloading and sent to:

Fisheries and Oceans Canada Regional Data Services Unit Suite 200-401 Burrard Street Vancouver BC V6C 3S4

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Fish slips may be downloaded and printed at http://www.dfo-mpo.gc.ca/fm-gp/sdc-cps/fishslips-carnets/index-eng.htm.

Fish slip books may also be ordered from the printer at user cost at http://www.dfo-mpo.gc.ca/fm-gp/sdc-cps/fishslips-carnets/index-eng.htm. Phone (604) 666-4654 for more information.

Explanatory Note:

Harvest logs meeting the requirements of the Shellfish Data Unit are available from service companies who, for a fee, will provide the logbook and coding and keypunch services.

Fish harvesters who do not use the harvest log, coding and keypunch services provided by a service company shall contact the Shellfish Data Unit at (250) 756-7306 or (250) 756-7022 in order to obtain the information necessary to fulfil these requirements.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A
Do not release this data to external parties.

monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties.

when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

PRAWN AND SHRIMP BY TRAP Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FW 47 2017

PRAWN AND SHRIMP BY TRAP Licence 2017 Date Issued: 02 May 2017

Licensed for: Commercial Fishing Expiry Date: 31 Dec 2017

Licence Holder:
FIN: 124113
NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:
VRN 30679
DOT 820972
Vessel ZOMBY WOOF
Vessel OAL 10.60 Meters
Gross Tonnage 25.47 Cubic Meters
Net Tonnage 19.81 Cubic Meters

Reported Vessel Owner:
FIN: 104978
MCNEILL FISHING LTD
515 5TH AVENUE WEST
PRINCE RUPERT BC
V8J 1T8

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Quota: 500 Traps

Species: PRAWN

Gear: TRAP

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2017 - 18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON DECEMBER 31, 2017. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON JUNE 30, 2017.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 02 May 2017

Licence Serial No.: 433749

Version Date: 01-May-2017

CONDITIONS OF 2017 COMMUNAL PRAWN AND SHRIMP TRAP LICENCE (500 TRAPS)

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the prawn and shrimp trap fishery obtain a copy of the current Prawn and Shrimp by Trap - Integrated Fisheries Management Plan. The Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for prawns and shrimp.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Communications Service Provider (CSP)" means the company used to transmit data from the Vessel Monitoring System (VMS) unit on board the licensed vessel to the DFO Vessel Monitoring Operations Centre.

"International Mobile Station Equipment Identifier (IMEI)" means the unique identifying number assigned to mobile telecommunications devices by their manufacturer.

"Department (DFO)" means the Department of Fisheries and Oceans.

"landing" means the transfer of fish from the licensed vessel to land.

"prawn and shrimp trap gear" means traps and attached lines and buoys; it does not include holding cages which are set on buoys and lines separate from traps.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Fishery Operating System (FOS)" means the Department's database into which all specified fishing information shall be entered.

"service provider" means a private sector company or individual authorized by the Department to enter information into a database located on a Department of Fisheries and Oceans internet site designated for this purpose, for the purpose of assisting licence holders and vessel masters in meeting these conditions of licence with regards to reporting of information.

"set and haul validation number" means the unique number issued by a service provider at the time the licence holder establishes a set-haul data collection agreement.

"single haul" means hauling trap gear to the surface of the water only once per day.

"string" means a single unit of prawn fishing gear consisting of buoys, buoy lines, groundline and traps.

"vessel master" means the individual embarked on the vessel and responsible for the operation of the vessel and the fishing activities carried out under authority of this licence.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Designated fishers:

(a) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer; and (b) designations are personal and non-transferable.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified as set out in section 26 of the Fishery (General) Regulations.

(2) Fishing gear shall be identified as set out in sections 27 and 29 of the Fishery (General) Regulations.

4. Species of fish permitted to be taken:

(1) Prawn (Pandalus platyceros) and other shrimp (Pandalus and Pandalopsis spp.).

(2) Octopus (Enteroctopus dofleini/Octopus dofleini) caught incidentally during the prawn and shrimp trap fishery may be retained, except in those areas closed for octopus retention.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

5. Minimum size:

(1) The minimum size limit for whole prawn is 33 mm carapace length measured from the most posterior part of the eye orbit to the posterior mid-dorsal margin of the carapace.

(2) The minimum size limit for tailed prawn is 22 mm telson length, measured along the mid dorsal line of the telson from the anterior margin to the posterior margin. The telson is the central piece of the tail "fan".

6. Waters in which fishing is permitted to be carried out:

(1) Fishing is permitted in all Subareas, except for Subareas 4-10 and 4-11, in those areas and during those times when vessels licensed under Category W licence issued pursuant to the Pacific Fishery Regulations, 1993, are permitted to fish.

7. The type of fishing gear permitted to be used:

(1) Trap gear is permitted to be used. Traps shall include the following trap escapement modifications except in Subareas 20-6 and 20-7:

(a) Web or Soft Mesh Traps: (i) Web or soft mesh traps shall be covered with a single layer of mesh. The mesh size shall measure a minimum of 38.1 mm and provide an opening such that a 19 mm diameter round peg will readily pass through the mesh opening on the vertical sides of the trap without stretching or altering the shape of the mesh opening. (ii) All mesh used in the trap, including the tunnels, shall conform to this minimum size. The openings of the mesh shall not be obstructed except for any obstruction resulting from the frame of the trap. (iii) Web and soft mesh traps shall contain an opening equal to or exceeding 30 cm in length. The opening shall be within 15 cm of the bottom of the trap and parallel with the bottom frame. The opening shall be laced, sewn, or otherwise secured by a single strand of no greater than #30 untreated cotton twine. The cotton twine shall be knotted at each end only. The twine shall not be tied or looped around the frame of the trap.

(b) Solid Sided Traps and Bucket Traps: (i) Solid sided traps shall be harnessed so that they are lifted from an end or side opposite a tunnel or mesh escapement panel. (ii) All tunnel entrances shall be constructed with mesh in such a manner so that a 19 mm diameter round peg will readily pass through the mesh opening without stretching or altering the shape of the mesh opening. (iii) The tunnels shall extend to within 25.4 mm of the outside edge of the trap. If only one tunnel is used, the opposite end shall be covered with mesh that allows a 19 mm round peg to readily pass through the mesh opening without stretching or altering the shape of the mesh opening. (iv) If the tunnels and web mesh are not modified as described above, the trap shall have 4 slots, a minimum of 16 mm wide for the entire length of the trap, at the top and bottom edge of each side. (v) Solid sided and bucket traps shall have a biodegradable ("rot") panel. The rot panel shall consist of a section in a trap side wall that has been laced, sewn, or otherwise secured by a single strand of no greater than #30 untreated cotton twine, such that the entire panel remains under

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

tension when the panel is intact but on deterioration or parting produces an unrestricted opening. The opening shall exceed a square 11cm by 11cm.

(c) Wire and Hard Mesh Traps: (i) Wire and hard mesh traps shall have four opposing tunnels constructed of an unobstructed rigid square mesh material having a minimum dimension (after dip coating) that will allow the passage of a 22.2 mm square peg through the mesh without altering the shape of the mesh opening. The lower side of each tunnel shall extend to the bottom edge of the trap and shall be at least one-half the length of the trap side; or (ii) If the tunnels are not modified as described above, the bottom and two opposing sides shall be constructed of an unobstructed square mesh material that will allow the passage of a 19 mm square peg through the mesh without altering the shape of the mesh opening; or (iii) The bottom and all sides shall be constructed of an unobstructed square mesh material that will allow the passage of a 22.2 mm square peg through the mesh without altering the shape of the mesh opening. (iv) Wire and hard mesh traps shall have a biodegradable ("rot") panel. The rot panel shall consist of a section in a trap side wall that has been laced, sewn, or otherwise secured by a single strand of no greater than #30 untreated cotton twine, such that the entire panel remains under tension when the panel is intact but on deterioration or parting produces an unrestricted opening. The opening shall exceed a square 11cm by 11cm.

8. The size of fishing gear permitted to be used:

The trap volume is determined by measuring the outside dimensions of the trap and includes the tunnel volume. The maximum trap size permitted in all Subareas is as follows:

(1) Web or soft mesh traps shall have a volume no greater than 170 litres.

(2) Wire or hard mesh traps shall have a volume no greater than 100 litres, except those traps constructed with a mesh in the bottom and all sides that will allow a 22.2 mm square peg to pass through, which shall have a volume no greater than 170 litres.

9. The quantity of fishing gear permitted to be used:

(1) Subject to subsections 9(2) and 9(3), a maximum of 500 traps set on a maximum of ten groundlines may be fished under authority of this licence.

(2) Of the 500 traps, a maximum of 250 traps set on a maximum of five groundlines may be fished in the following areas:

(a) Subareas 28-1 to 28-5 and 28-11 to 28-14 (Howe Sound and Indian Arm); (b) Subareas 16-5 to 16-8 (Salmon and Sechelt Inlets); (c) Subareas 19-7 to 19-12 (Saanich Inlet); and (d) Subareas 23-1 to 23-3 (Alberni Inlet).

(3) Of the 500 traps, a maximum of 50 traps may be fished under the authority of this licence in Subareas 20-6 and 20-7 (Sooke Harbour and Sooke Basin). In

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Subareas 20-6 and 20-7 only, each trap may be individually buoyed.

10. Buoys, buoy lines and groundlines:

(1) Subject to subsection 10(6), prawn and shrimp trap gear shall be marked at both ends of the groundline by: (a) a red or orange buoy with a minimum circumference of 127 cm; or (b) a 10 cm x 122 cm white PVC pipe weighted at one end and painted orange at the other.

(2) Subject to subsection 10(7), in addition to the vessel registration number (VRN), the letters "PRN" shall be printed on each buoy or PVC pipe and be not less than 75 mm in height and in a colour that contrasts with their background.

(3) Buoys or PVC pipe labelled with "PRN", as set out in subsections 10(1) and 10(2), shall only be attached to groundlines that have prawn and shrimp traps attached.

(4) Holding cages hung on separate buoys shall be marked with vessel name, VRN, and the word "CAGE".

(5) The maximum permitted groundline length is 1100 m.

(6) All buoy lines, trap lines and groundlines shall be non-floating so that the lines remain below the surface of the water in order to minimize navigational hazards.

(7) Coonstripe Shrimp traps set individually in the Sooke shrimp fishery in Subareas 20-6 and 20-7 may be marked with a single bullet shaped buoy. The letter "W" shall be printed on each buoy in addition to the VRN and both shall be not less than 75 mm in height and in a colour that contrasts with their background.

11. Marking of traps with tags:

(1) All traps fished under the authority of this licence shall be marked with a tag that meets the requirements of the Department.

(2) Replacement trap gear may be carried on board the vessel provided that the trap is untagged and has no snaps or other means of directly attaching the trap to a groundline.

(3) Only those tags that have been reported and registered to this licence in the Fishery Operating System (FOS) shall be attached to traps.

(4) Each tag shall be attached to the trap so that the tag number is visible without the necessity of opening the trap.

(5) Old tags shall be removed and destroyed.

12. Manner in which gear is permitted to be used:

(1) Setting and hauling of prawn and shrimp gear is permitted only between 07:00 h and 19:00 h.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) Hauling of prawn and shrimp trap gear including lines, buoys and holding cages attached to traps is permitted only once per day. This is referred to as single haul.

13. Avoidance of entanglement in fishing gear:

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

(a) are conducted under licences issued under the Fisheries Act; and (b) that may incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

14. Sorting of Catch:

(1) Immediately after each trap is pulled on board the vessel the contents of that trap shall be sorted.

(2) Undersize prawns and by-catch other than those species for which the vessel has a licence shall be returned to the water immediately and in the manner that causes the least harm.

(3) All prawns carrying eggs externally on the underside of the tail shall be returned to the water immediately and in the manner that causes the least harm.

(4) Eggs shall not be removed from prawns carrying eggs.

15. Catch prohibited on board the licensed vessel while fishing:

(1) No prawns or shrimp that are not permitted to be retained under the authority of this licence shall be on board the licensed vessel.

16. Records - trap tags:

(1) The licence holder shall arrange to have trap tag number information entered into the FOS no later than 24 hours after being issued the tags. The following information shall be provided: (a) VRN; (b) the tag numbers; (c) the tag colours; (d) the date the tags were issued; and (e) the name of the person who issued the tags.

17. Records - Harvest Log: (see explanatory note after Section 21)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

accordance with the timing set out in subsection 14(8). The content and format of the log (paper and electronic) shall meet the requirements as defined by Fisheries and Oceans Canada Aquatic Resources Research and Assessment Division's Shellfish Data Unit.

(2) Data shall be entered separately into the harvest log for each individual string of traps.

(3) The latitude and longitude and time of haul shall be entered into the harvest log not later than 30 minutes (one half hour) after the hauling of a string of gear. This shall occur before hauling the next string of gear. The time of haul shall be recorded in the dedicated "Time of Haul" column.

(4) All remaining information for each day's harvest operations shall be recorded in the harvest log not later than midnight of that day.

(5) The harvest and fishing location information recorded in the harvest log shall be complete and accurate.

(6) The harvest log shall be kept on board the licensed vessel.

(7) The harvest log shall be produced for examination on demand of a fishery officer or a fishery guardian.

(8) The licence holder shall ensure the completed log pages (original copy) and electronic copy of the log are forwarded not later than 28 days following the end of each month in which fishing occurred to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo BC V9T 6N7

Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the fishing season, the licence holder shall submit a nil report. One page from the harvest log identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log and signed by the licence holder constitutes a nil report.

18. Requirement to hail out:

(1) The vessel master shall arrange to have fishing activity reports (hails) entered into the FOS prior to starting to fish. The following information shall be reported: (a) vessel name and VRN; (b) the date and time the report was made; (c) the name of the person who provided the information; (d) the name of the person who received the hail information; (e) Subareas to be fished; (f) time and date fishing will begin; (g) set and haul validation number; and (h) the hail validation number issued by the service provider to the vessel.

19. Vessel Monitoring System:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(1) The licence holder shall have a DFO-approved vessel monitoring system (VMS) unit installed on the vessel authorized to fish under this licence. The VMS unit's antenna shall be mounted such that there is an unobstructed signal transmission/reception at all times. A list of DFO-approved VMS units can be found at http://www.nfl.dfo-mpo.gc.ca/e0011108 or by contacting DFO by telephone Toll Free at 1 (888) 772-8225. (a) The approved VMS unit shall provide data to the DFO Vessel Monitoring Operations Centre.

(b) For each VMS unit installation, replacement, transfer, or change to the licence holder, a completed National Vessel Monitoring System (VMS) Form (available from DFO at http://www.nfl.dfo-mpo.gc.ca/e0010178) shall be forwarded by facsimile to 1 (709) 772-5787. (c) At the beginning of the fishing season, the form for each VMS unit installation, replacement, transfer, or change to the licence holder shall be forwarded not less than two business days before commencing fishing.

(d) The licence holder and vessel master shall ensure the system is fully operational, turned on and in use from the time the vessel leaves port for the first fishing trip until it returns to port and all of the fish on board the vessel is offloaded after the last fishing trip.

(e) The licence holder or vessel master shall ensure that the VMS unit on the vessel reports the following information automatically to DFO every 15 minutes: (i) Communication Service Provider (CSP) identifier for the VMS unit; (ii) geographic position (latitude/longitude) of the vessel; and (iii) date and time corresponding to the aforementioned position. (f) Should any or all of this VMS unit equipment become inoperative, is turned off, or malfunction in any way, the licence holder or vessel master shall, immediately (next business day if after hours) notify DFO of any such malfunction by telephone at 1-866-930-4000 Monday to Friday 8:00 a.m. to 4:00 p.m. and provide the following information: (i) vessel master's name; (ii) vessel name and VRN; (iii) date and time of sailing; (iv) port of landing; and (v) telephone number where the vessel master can be reached.

(g) The licence holder or vessel master shall ensure that a DFO-approved VMS unit is activated within 72 hours of the initial malfunction of the original VMS unit on board the licensed vessel. A replacement VMS unit may be obtained by phoning 1-866-930-4000 and providing the following information: (i) vessel master's name; (ii) vessel name and VRN; (iii) telephone number where the vessel master can be reached.

(h) After 72 hours following a malfunction, if a functioning VMS unit is not activated aboard the vessel, the licence holder or vessel master shall cease fishing and may only resume fishing once a functional VMS unit is turned on and fully operational or when the licence holder or vessel master has received approval from DFO. (i) Where a VMS unit is used on the vessel during any fishing trip, no person shall: (i) alter or tamper with the VMS unit or its operation; (ii) destroy, dispose of or remove the VMS unit or its associated electronic records or storage media; (iii) emit, or

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

cause to be emitted, any electronic or electric signal that renders the equipment or system inoperative or inaccurate; (iv) interfere or block any signals required by the VMS unit to gather, record, or transmit information; or (v) turn off the VMS unit from the time the vessel leaves port for the first fishing trip until it returns to port and all of the fish on board the vessel is offloaded after the last fishing trip. (j) In the event of a VMS unit failure where a vessel carries two or more approved VMS units on board, it is the responsibility of the licence holder or vessel master to immediately notify DFO that a secondary unit is being activated and subsequently ensure it is fully operational, turned on and in use before resuming fishing.

20. Information reports from sea:

(1) The vessel master shall arrange to have information about fishing operations and spawner index information reported to the Department or a service provider as required.

(2) Fishing Operations At-sea Report A Fishing Operations At-sea Report shall be made by the service provider at least once between May 1 and June 30 while the vessel is engaged in fishing, and entered into the FOS not later than 7 days following the collection of the information. A minimum of 45 traps shall be hauled from the water and examined for the purposes of completing the information report. Fishing Operations At-sea Reports shall include the following:

(a) vessel name and VRN; (b) vessel master's name; (c) name of the service provider and person who collected the information; (d) date the information was collected; (e) the Subarea in which the inspection took place; (f) time of commencement and completion of the collection of the information; (g) confirmation of a logbook on board; (h) confirmation that logbook entries are up to date; (i) the current hail verification number; (j) the number of unused traps on board (on deck) that were observed; (k) the number of traps that were hauled from the water and examined; (l) the latitude and longitude of the first trap hauled and examined; (m) the latitude and longitude of the last trap hauled and examined; (n) confirmation that all hauled traps have a trap tag attached; (o) the numbers seen on the tags attached to the traps; (p) confirmation of appropriate trap mesh size; (q) confirmation that all buoys are labelled with the VRN; (r) the total number of octopus caught by the traps which were hauled; and (s) an indication of how many octopus were released.

(3)Set and Haul Data The following set and haul data shall be provided to the service provider during fishing operations: (a) Vessel name; (b) VRN; (c) Activity: set or haul (d) GPS source: GPS device or manual entry; (e) Vessel GPS location (latitude and longitude); (f) String GPS location (latitude and longitude); (g) Subarea of string location; (h) Communication Service Provider Number; (i) UTC date and time (yyyy-mm-dd, HH:MM:SS); (j) Speed (knots); (k) Heading; and (l) International Mobile Station Equipment Identifier (IMEI).

(4) Set and haul data shall be transmitted to the service provider not later than five (5) minutes following the setting or retrieval of each string of gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

(5) A DFO-approved VMS unit which integrates the set and haul programming shall automatically provide vessel location data every 15 minutes, and the vessel master shall enter the set and haul data of a given set or haul activity using the facilities of the VMS unit.

(6) The vessel master using a DFO-approved VMS unit which does not integrate the set and haul programming, shall provide the information set out in subsection 20(3) by either a) sending the information by electronic mail to prawnsethaul@jothomas.com; or b) phoning 1-866-930-4000 and providing the information verbally. The Communication Service Provider Number and IMEI are not required for verbal reports.

(7) Spawner Index Data (a) Each vessel that fishes between May 1 and June 30 shall provide data as set out in subsection 20(7)(b) to the Department from 10 spawner index samples. (b) Each spawner index sample shall consist of a sample of one complete string of gear which has been set for a minimum of 12 hours, with a minimum of every fourth trap contributing to the sample. A minimum of 12 traps shall be sampled from each string of gear sampled for spawner index. The following information shall be reported:

(i) for each string of gear: (A) vessel name and VRN; (B) date of sampling; (C) set number; (D) sampler's name; (E) latitude and longitude of sample; (F) Subarea; (G) local geographic area name; (H) vessel master's name; (I) years of experience of the vessel master in that fishing location; (J) the number of days that the vessel has been fishing in that location prior to the spawner index sample; (K) maximum and minimum trap depth for the sample; (L) set and haul time of string which is being sampled; (M) all rockfish caught by species and count; and (N) soak duration in hours.

(ii) for each trap sampled from the string: (A) trap type in accordance with the Department's trap type codes; (B) bait type in accordance with the Department's bait type codes; (C) a sample "usability" code as provided by the Department to indicate the presence of octopus in the trap or other conditions that would render the data from that trap unusable; and (D) the numbers of prawns caught for each of the 6 sex classes.

(iii) for the total of all samples from the string: (A) the number of traps sampled from that string; and (B) any other applicable comments regarding the usability of information from that string.

21. Fish Slips:

(1) A complete and accurate written report of all fish and shellfish caught and retained under the authority of this licence shall be submitted by the vessel master on a fish slip.

(2) The record shall contain the following information: (a) buyer's name, address

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

and telephone number; (b) harvester's name and address; (c) processing plant name; (d) landing date; (e) vessel name and VRN; (f) gear used to harvest the fish; (g) Area(s) where fishing occurred and days spent fishing in each Area; (h) the individual species of each fish sold or offloaded; (i) the description of the product or landed form of each species sold or offloaded; (j) the number of fish (pieces) of each species sold or offloaded; (k) the weight of each species sold or offloaded; (l) the price paid for each species sold; and (m) the total value of each species sold or offloaded.

(3) A report shall be made even if the fish or shellfish are used for bait, personal consumption or disposed of otherwise.

(4) The report shall be mailed not later than seven days after the offloading and sent to:

Fisheries and Oceans Canada Regional Data Services Unit Suite 200-401 Burrard Street Vancouver BC V6C 3S4

Fish slips may be downloaded and printed at http://www.dfo-mpo.gc.ca/fm-gp/sdc-cps/fishslips-carnets/index-eng.htm. Fish slip books may also be ordered from the printer at user cost at http://www.dfo-mpo.gc.ca/fm-gp/sdc-cps/fishslips-carnets/index-eng.htm. Phone (604) 666-4654 for more information.

Explanatory Note:

Harvest logs meeting the requirements of the Shellfish Data Unit are available from service companies who, for a fee, will provide the logbook and coding and keypunch services.

Fish harvesters who do not use the harvest log, coding and keypunch services provided by a service company shall contact the Shellfish Data Unit at (250) 756-7306 or (250) 756-7022 in order to obtain the information necessary to fulfil these requirements.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties

closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

APPENDIX I

Aurora Rockfish Sebastes aurora Bank Rockfish Sebastes rufus Black Rockfish Sebastes melanops Blackgill Sebastes melanostomus Blue Rockfish Sebastes mystinus Bocaccio Sebastes paucispinis Brown Rockfish Sebastes auriculatus Chilipepper Rockfish Sebastes goodei Darkblotched Rockfish Sebastes crameri

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

PRAWN AND SHRIMP BY TRAP Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FW 12 2017

PRAWN AND SHRIMP BY TRAP Licence 2017 Date Issued: 02 May 2017

Licensed for: Commercial Fishing Expiry Date: 31 Dec 2017

Licence Holder:
FIN: 124113
NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:
VRN 23176
DOT 312288
Vessel LO-ISLE
Vessel OAL 11.89 Meters
Gross Tonnage 30.47 Cubic Meters
Net Tonnage 20.71 Cubic Meters

Reported Vessel Owner:
FIN: 114931
GRIM ESTATES LTD.
201 - 1512 YEW STREET
VANCOUVER BC
V6K 3E4

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Quota: 0 Traps

Species: PRAWN

Gear: TRAP

Option: SCHEDULE II FISHING ONLY

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2017 - 18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON DECEMBER 31, 2017. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON JUNE 30, 2017.

THIS LICENCE DOES NOT AUTHORIZE FISHING FOR PRAWNS, SHRIMP OR OCTOPUS

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Date Printed: 02 May 2017

Licence Serial No.: 433725

Printed from the PacFish Search System by User "GEBREHIWOTAK" on October 26, 2018, 4 09 PM

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Version Date: 01-May-2017

CONDITIONS OF 2017 COMMUNAL PRAWN AND SHRIMP TRAP LICENCE (ZERO TRAPS)

Authority

The Department of Fisheries and Oceans has authority to set licensing conditions under subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the Regulations made thereunder, in addition to these conditions.

For information on management of the prawn and shrimp trap fishery obtain a copy of the current Prawn and Shrimp by Trap - Integrated Fisheries Management Plan. The Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

This licence has a zero trap allocation and does not authorize fishing for prawns and shrimp or for octopus by means of trap gear.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

Document Released Under the Access to
This report may contain data rated up to Protected A
Do not release this data to external parties.
de la Loi sur l'accès à l'information.

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

Document Released Under the Access to
This report may contain data rated up to Protected A. Do not release this data to external parties.
de la Loi sur l'accès à l'information.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b)

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in

This report may contain data rated up to Protected A
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

RED SEA URCHIN Licence 2016

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FZC 17 2016

RED SEA URCHIN Licence 2016 Date Issued: 23 May 2017

Licensed for: Commercial Fishing Expiry Date: 31 Jul 2017

Licence Holder:

FIN: 124113

NORTH COAST-SKEENA FIRST NATIONS STEWARDSHIP SOCIETY
309 2ND AVENUE WEST
SUITE 363
PRINCE RUPERT BC
V8J 3T1

Designated Vessel:

VRN 27097
DOT 800176
Vessel SKEENA MAID
Vessel OAL 10.82 Meters
Gross Tonnage 37.19 Cubic Meters
Net Tonnage 19.70 Cubic Meters

Reported Vessel Owner:

FIN: 104978
MCNEILL FISHING LTD
515 5TH AVENUE WEST
PRINCE RUPERT BC
V8J 1T8

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Quota: 86,197.000 Pounds

Licence Area: RED SEA URCHIN AREA N

Waters in which fishing is permitted: Areas 1 through 10, 101, 105, 106, 109 & 142

Species: RED SEA URCHIN

Gear: DIVE

Change of Ownership Recorded

Date Printed: 23 May 2017

Licence Serial No.: 434471

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Do not release this data to external parties.

Version Date: 05-Aug-2016

CONDITIONS OF 2016/2017 COMMUNAL RED SEA URCHIN LICENCE

Licence Period: August 1, 2016 to July 31, 2017 Revised August 5, 2016

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the Red Sea Urchin fishery obtain a copy of the current Red Sea Urchin - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act and regulations or these conditions, the Fisheries Act and regulations and these conditions prevail.

PART 1

Application

This Part applies to fishing for Red Sea Urchin. Sections 3, 4, 6 and 7 of Part 1 also apply to fisheries activities in Part 2.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a mesh pick bag, a mesh transport bag, a plastic tote, or a cage used for the gathering, handling or transportation of Red Sea Urchin.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Department" means the Department of Fisheries and Oceans.

"discarded" means not placing the Red Sea Urchin in a container or removing a Red Sea Urchin from a container and not validating that Red Sea Urchin.

"fishing trip" means the time between leaving port to commence commercial Red Sea Urchin fishing and the return to a port or offloading of catch that results in a discontinuation of fishing for 24 hours or longer.

"Hail-out Report" means the report made to a designated Red Sea Urchin service provider prior to embarking on a fishing trip.

"Hail-in Report" means the report made to a designated Red Sea Urchin service provider prior to landing Red Sea Urchin or after a fishing trip.

"harvested" means removing, by any means, Red Sea Urchin from the substrate of the ocean floor.

"landed" or "landing" means the transfer of Red Sea Urchin from a vessel in water to land.

"observer" means an individual who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"Quota Area" means those areas enumerated and described in Appendix 8 of the current Red Sea Urchin - Integrated Fisheries Management Plan.

"tranship" means the transfer of Red Sea Urchin from a vessel to another vessel.

"validated" means Red Sea Urchin have been weighed by an observer and the weight entered into the Red Sea Urchin Validation & Harvest Log (see sections 13 and 15) or an alternative log approved by the Department.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species of fish permitted to be taken:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

Red Sea Urchin (Strongylocentrotus franciscanus)

2. Licence Expiry Date:

This licence expires on July 31, 2017.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fishers:

Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

5. Quantities permitted to be taken:

(1) The maximum quantity of Red Sea Urchin authorized to be taken under this licence shall not exceed the limit on the current Red Sea Urchin licence.

6. Waters in which fishing is permitted and the period during which fishing is permitted to be carried out:

(a) Area of fishing is as set out in this licence.

(b) Fishing for Red Sea Urchin is permitted during those times when persons fishing under authority of a Category ZC licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for Red Sea Urchin in that area and during that time.

7. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) Fishing gear shall be identified in in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

8. Fishing gear permitted to be used:

Hand picking by divers only. Suction devices are not permitted to be used.

9. Fishing Multiple Quota Areas

All Red Sea Urchin caught in a Quota Area shall be landed or transhipped prior to the commencement of fishing in a new Quota Area.

10. The type, size and marking of containers to hold or transport Red Sea Urchin and the marking of such containers:

(1) All Red Sea Urchin delivered to designated landing ports or transhipped from the licensed vessel to another vessel licensed for the transportation of fish shall be placed in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number of the vessel used to harvest that product.

(2) All harvested Red Sea Urchin that are contained in "pick bags" or any other type of container and left unattended in the water shall be labelled. The label shall be waterproof and marked with the vessel name and vessel registration number of the vessel used to harvest that product. Floats attached to containers left unattended in the water shall be marked with the vessel registration number.

11. Transhipment:

Red Sea Urchin may be transhipped from the licensed vessel to another vessel licensed for the transportation of fish provided the vessel master complies with the following conditions:

(1) all Red Sea Urchin are in containers and tagged as per section 10; (2) the number of containers are recorded in the log; (3) the "packer weight" (determined by subtracting the weight of the containers from the weight of the product) is recorded in the log; (4) a copy of the log accompanies the product to the designated port; and (5) the product is landed at a designated port and validated by an observer.

12. Locations permitted for the landing of Red Sea Urchin:

This report may contain data rated up to Protected A
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Red Sea Urchin shall be landed at one of the following ports:

(1) North Coast: Queen Charlotte City, Masset, Prince Rupert, Port Edward, Klemtu, Bella Bella, or Port Hardy.

(2) South Coast: Port Hardy, Port McNeill, Kelsey Bay, Campbell River, Nanaimo, Ladysmith, Sidney, Sooke, Victoria, Ucluelet, Tofino, Steveston or Vancouver.

This condition applies to both the licensed vessel and, if the vessel master chooses to tranship his catch to another vessel, to the vessel receiving the Red Sea Urchin.

13. Validation: (See Explanatory Note after section 17)

(1) All Red Sea Urchin harvested or removed from the sea bed floor under the authority of this licence shall be validated at the point and time the fish are landed.

(2) Prior to validation of Red Sea Urchin no person shall: (a) smash the shells or slit the membranes of the Red Sea Urchin to drain the waters; or (b) dump, throw overboard, or otherwise discard Red Sea Urchin which have been harvested and retained in accordance with the Fisheries Act and the regulations made thereunder.

(3) Subject to subsection 13(3)(a), all weights shall be determined using a scale approved by Industry Canada.

(a) Registered participants in the live-market validation pilot program shall validate their catch by undrained weight or by volume in the manner set out in the Alternate Validation Pilot Program Protocol sheet available to registrants from the resource manager.

(4) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide the observer with a hard copy of the Validation & Harvest Logbook upon completion of each validation.

(5) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide to the observer at the point of landing, access to the vessel's fish holds,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

freezers and other fish storage areas at any time during the landing.

14. Oral Reports:

(1) Hail-out Report Not less than 24 hours before a fishing trip, the vessel master shall make a Hail-out Report by contacting the designated Red Sea Urchin service provider at (800) 775-5505 and report the following information: (a) vessel name, vessel master's name and vessel registration number; (b) species to be fished (i.e. Red Sea Urchin); (c) Subarea(s) to be fished; (d) anticipated time of arrival at the fishing location; and (e) anticipated time that fishing will begin.

(2) Upon failure to arrive at fishing location within 24 hours of time stated under subsection 14(1)(d), the vessel master shall report the following information to the designated Red Sea Urchin service provider: (a) vessel name and vessel registration number; and (b) details of change in fishing plans.

(3) At least 24 hours prior to moving to a new Quota Area, the vessel master shall report the following information to the designated Red Sea Urchin Provider: (a) vessel name, vessel master's name and vessel registration number; (b) species to be fished (i.e. Red Sea Urchin); (c) Subarea(s) to be fished; (d) anticipated time of arrival at the fishing location; and (e) anticipated time that fishing will begin.

(4) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report by contacting the Red Sea Urchin service provider to indicate that no fishing occurred within 24 hours of the time stated under subsection 14(1)(e).

(5) Hail-in Report: (a) Where the vessel is not landing Red Sea Urchin (i.e. Red Sea Urchin has been transhipped at sea): Not more than 24 hours after a fishing trip, the vessel master shall make a Hail-in Report by contacting the designated Red Sea Urchin service provider at (800) 775-5505 to report the following information: (i) vessel name, vessel master's name and vessel registration number; (ii) species fished (i.e. Red Sea Urchin); (iii) Subarea(s) fished; and (iv) time that fishing stopped.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(b) Where the vessel is landing Red Sea Urchin ashore: At least 24 hours prior to landing Red Sea Urchin, the vessel master shall make a Hail-in Report by contacting the designated Red Sea Urchin service provider at (800) 775-5505 to report the following information: (i) vessel name, vessel master's name and vessel registration number; (ii) species to be landed (i.e. Red Sea Urchin); (iii) name of the designated port and location therein where the catch shall be landed; (iv) anticipated time of landing; (v) name of fish processor or buyer that is buying or transporting the catch; and (vi) if applicable, the method of transporting the catch to a fish processor.

15. Harvest Logs and Chart Data: (See Explanatory Note after section 17)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department. The content and format of this log (paper and electronic) shall meet the requirements as defined by the Shellfish Data Unit for the current licence year.

(2) The harvest and fishing location information recorded in the log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the log not later than midnight of that day.

(4) The log shall be kept on board the licensed vessel.

(5) The log shall be produced for examination on demand of a fishery officer, fishery guardian or an observer.

(6) The vessel master shall provide a chart record for each day's harvest operations, indicating the locations fished, to the service provider contracted by the Pacific Urchin Harvesters Association, within one month of the harvesting having occurred. (a) The chart shall be marked with: (i) the vessel registration number; (ii) the licence tab number; and (iii) the validation I.D. numbers.

The validation I.D. number is the unique page number assigned to each validation page of the Red Sea Urchin Validation and Harvest Log.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

(b) Each harvest site shall be clearly marked on the chart with dive number, validation I.D. number and the dates that fishing activity occurred at each site. The dive numbers on the chart record must correspond to the dive numbers in the log.

(c) The information for each day's harvest operations shall be recorded on the chart record not later than midnight of that day and provided to the service provider within one month of that day's harvest operations.

(7) The vessel master shall make provisions to have chart information referred to in subsection 15(6) electronically captured into Geographic Information System (GIS) software that meets the requirements as defined by the Shellfish Data Unit for the current licence year.

(8) The completed log pages (business copy) and electronic copy of the log shall be available within 28 days following the end of each month in which fishing occurred, to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station Hammond Bay Road Nanaimo BC V9T 6N7

Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the current fishing season, the licence holder shall submit a nil report. One page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log and signed by the licence holder constitutes a nil report.

16. Fish Slips:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish are used for bait, personal consumption or disposed of otherwise.

(3) The report shall be mailed not later than seven days after the offloading and sent to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Branch, FM Data Unit Suite 200 - 401 Burrard Street Vancouver B.C. V6C 3S4

Fish slips may be downloaded and printed at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Fish slip books may also be ordered from the printer at user cost at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Phone (604) 666-2716 for more information.

17. Workers' Compensation Board Requirements

All Red Sea Urchin divers shall be in possession of a Workers' Compensation Board Seafood Harvesting Diving Certificate.

Explanatory Note - Harvest Log, Chart Data and Validation: The Red Sea Urchin Validation & Harvest Log issued by the service provider contracted by the Pacific Urchin Harvesters' Association is approved for both form and content by the Shellfish Data Unit. This service provider will provide the logbook and coding, data entry, electronic chart data capture and validation services.

Version Date: 06-Jul-2017

CONDITIONS OF 2017/2018 COMMUNAL RED SEA URCHIN LICENCE

Licence Period: August 1, 2017 to July 31, 2018

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the Red Sea Urchin fishery obtain a copy of the current Red Sea Urchin - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act and regulations or these conditions, the Fisheries Act and regulations and these conditions prevail.

PART 1

Application

This Part applies to fishing for Red Sea Urchin. Sections 3, 4, 6 and 7 of Part 1 also apply to fisheries activities in Part 2.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"container" means a mesh pick bag, a mesh transport bag, a plastic tote, or a cage used for the gathering, handling or transportation of Red Sea Urchin.

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"Department" means the Department of Fisheries and Oceans.

"discarded" means not placing the Red Sea Urchin in a container or removing a Red Sea Urchin from a container and not validating that Red Sea Urchin.

"fishing trip" means the time between leaving port to commence commercial Red Sea Urchin fishing and the return to a port or offloading of catch that results in a discontinuation of fishing for 24 hours or longer.

"Hail-out Report" means the report made to a designated Red Sea Urchin service provider prior to embarking on a fishing trip.

"Hail-in Report" means the report made to a designated Red Sea Urchin service provider prior to landing Red Sea Urchin or after a fishing trip.

"harvested" means removing, by any means, Red Sea Urchin from the substrate of the ocean floor.

"landed" or "landing" means the transfer of Red Sea Urchin from a vessel in water to land.

"observer" means an individual who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"Quota Area" means those areas enumerated and described in Appendix 8 of the current Red Sea Urchin - Integrated Fisheries Management Plan.

"tranship" means the transfer of Red Sea Urchin from a vessel to another vessel.

"validated" means Red Sea Urchin have been weighed by an observer and the weight entered into the Red Sea Urchin Validation & Harvest Log (see sections 13 and 15) or an alternative log approved by the Department.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species of fish permitted to be taken:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties

Red Sea Urchin (Strongylocentrotus franciscanus)

2. Licence Expiry Date:

This licence expires on July 31, 2018.

3. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

4. Designated fishers:

Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

5. Quantities permitted to be taken:

(1) The maximum quantity of Red Sea Urchin authorized to be taken under this licence shall not exceed the limit on the current Red Sea Urchin licence.

6. Minimum size limit:

The minimum size of Red Sea Urchin that may be taken is 90 mm in shell diameter, measured between the spines, through the greatest diameter of the shell.

7. Waters in which fishing is permitted and the period during which fishing is permitted to be carried out:

(a) Area of fishing is as set out in this licence.

(b) Fishing for Red Sea Urchin is permitted during those times when persons fishing under authority of a Category ZC licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for Red Sea Urchin in that area and during that time.

8. Identification of fishing vessel and gear:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) Fishing gear shall be identified in in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

9. Fishing gear permitted to be used:

Hand picking by divers only. Suction devices are not permitted to be used.

10. Fishing Multiple Quota Areas

All Red Sea Urchin caught in a Quota Area shall be landed or transhipped prior to the commencement of fishing in a new Quota Area.

11. The type, size and marking of containers to hold or transport Red Sea Urchin and the marking of such containers:

(1) All Red Sea Urchin delivered to designated landing ports or transhipped from the licensed vessel to another vessel licensed for the transportation of fish shall be placed in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number of the vessel used to harvest that product.

(2) All harvested Red Sea Urchin that are contained in "pick bags" or any other type of container and left unattended in the water shall be labelled. The label shall be waterproof and marked with the vessel name and vessel registration number of the vessel used to harvest that product. Floats attached to containers left unattended in the water shall be marked with the vessel registration number.

12. Transhipment:

Red Sea Urchin may be transhipped from the licensed vessel to another vessel licensed for the transportation of fish provided the vessel master complies with the following conditions:

(1) all Red Sea Urchin are in containers and tagged as per section 11; (2) the number of containers are recorded in the log; (3) the "packer weight" (determined by subtracting the weight of the containers from the weight

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties

of the product) is recorded in the log; (4) a copy of the log accompanies the product to the designated port; and (5) the product is landed at a designated port and validated by an observer.

13. Locations permitted for the landing of Red Sea Urchin:

Red Sea Urchin shall be landed at one of the following ports:

(1) North Coast: Queen Charlotte City, Masset, Prince Rupert, Port Edward, Klemtu, Bella Bella, or Port Hardy.

(2) South Coast: Port Hardy, Port McNeill, Kelsey Bay, Campbell River, Sidney, Sooke, Victoria, Ucluelet, Steveston or Vancouver.

This condition applies to both the licensed vessel and, if the vessel master chooses to tranship his catch to another vessel, to the vessel receiving the Red Sea Urchin.

14. Validation: (See Explanatory Note after section 18)

(1) All Red Sea Urchin harvested or removed from the sea bed floor under the authority of this licence shall be validated at the point and time the fish are landed.

(2) Prior to validation of Red Sea Urchin no person shall: (a) smash the shells or slit the membranes of the Red Sea Urchin to drain the waters; or (b) dump, throw overboard, or otherwise discard Red Sea Urchin which have been harvested and retained in accordance with the Fisheries Act and the regulations made thereunder.

(3) Subject to subsection 14(3)(a), all weights shall be determined using a scale approved by Industry Canada.

(a) Registered participants in the live-market validation pilot program shall validate their catch by undrained weight or by volume in the manner set out in the Alternate Validation Pilot Program Protocol sheet available to registrants from the resource manager.

(4) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide the observer with a hard copy of the Validation & Harvest Logbook upon

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

completion of each validation.

(5) The vessel master of the licensed vessel or, if the catch is transhipped to another vessel, the vessel master of that vessel shall provide to the observer at the point of landing, access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

15. Oral Reports:

(1) Hail-out Report Not less than 24 hours before a fishing trip, the vessel master shall make a Hail-out Report by contacting the designated Red Sea Urchin service provider at (800) 775-5505 and report the following information: (a) vessel name, vessel master's name and vessel registration number; (b) species to be fished (i.e. Red Sea Urchin); (c) Subarea(s) to be fished; (d) anticipated time of arrival at the fishing location; and (e) anticipated time that fishing will begin.

(2) Upon failure to arrive at fishing location within 24 hours of time stated under subsection 14(1)(d), the vessel master shall report the following information to the designated Red Sea Urchin service provider: (a) vessel name and vessel registration number; and (b) details of change in fishing plans.

(3) At least 24 hours prior to moving to a new Quota Area, the vessel master shall report the following information to the designated Red Sea Urchin Provider: (a) vessel name, vessel master's name and vessel registration number; (b) species to be fished (i.e. Red Sea Urchin); (c) Subarea(s) to be fished; (d) anticipated time of arrival at the fishing location; and (e) anticipated time that fishing will begin.

(4) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report by contacting the Red Sea Urchin service provider to indicate that no fishing occurred within 24 hours of the time stated under subsection 14(1)(e).

(5) Hail-in Report: (a) Where the vessel is not landing Red Sea Urchin (i.e. Red Sea Urchin has been transhipped at sea): Not more than 24 hours after a fishing trip, the vessel master shall make a Hail-in Report by contacting the designated Red Sea Urchin service provider at (800)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

775-5505 to report the following information: (i) vessel name, vessel master's name and vessel registration number; (ii) species fished (i.e. Red Sea Urchin); (iii) Subarea(s) fished; and (iv) time that fishing stopped.

(b) Where the vessel is landing Red Sea Urchin ashore: At least 24 hours prior to landing Red Sea Urchin, the vessel master shall make a Hail-in Report by contacting the designated Red Sea Urchin service provider at (800) 775-5505 to report the following information: (i) vessel name, vessel master's name and vessel registration number; (ii) species to be landed (i.e. Red Sea Urchin); (iii) name of the designated port and location therein where the catch shall be landed; (iv) anticipated time of landing; (v) name of fish processor or buyer that is buying or transporting the catch; and (vi) if applicable, the method of transporting the catch to a fish processor.

16. Harvest Logs and Chart Data: (See Explanatory Note after section 18)

(1) The vessel master shall maintain a log of all harvest operations and provide this information in both hard (paper) copy and electronic copy to the Department. The content and format of this log (paper and electronic) shall meet the requirements as defined by the Shellfish Data Unit for the current licence year.

(2) The harvest and fishing location information recorded in the log shall be complete and accurate.

(3) The information for each day's harvest operations shall be recorded in the log not later than midnight of that day.

(4) The log shall be kept on board the licensed vessel.

(5) The log shall be produced for examination on demand of a fishery officer, fishery guardian or an observer.

(6) The vessel master shall provide a chart record for each day's harvest operations, indicating the locations fished, to the service provider contracted by the Pacific Urchin Harvesters Association, within one month of the harvesting having occurred. (a) The chart shall be marked

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A
Do not release this data to external parties.

with: (i) the vessel registration number; (ii) the licence tab number; and (iii) the validation I.D. numbers.

The validation I.D. number is the unique page number assigned to each validation page of the Red Sea Urchin Validation and Harvest Log.

(b) Each harvest site shall be clearly marked on the chart with dive number, validation I.D. number and the dates that fishing activity occurred at each site. The dive numbers on the chart record must correspond to the dive numbers in the log.

(c) The information for each day's harvest operations shall be recorded on the chart record not later than midnight of that day and provided to the service provider within one month of that day's harvest operations.

(7) The vessel master shall make provisions to have chart information referred to in subsection 16(6) electronically captured into Geographic Information System (GIS) software that meets the requirements as defined by the Shellfish Data Unit for the current licence year.

(8) The completed log pages (business copy) and electronic copy of the log shall be available within 28 days following the end of each month in which fishing occurred, to:

Fisheries and Oceans Canada Shellfish Data Unit Pacific Biological Station Hammond Bay Road Nanaimo BC V9T 6N7

Tel: (250) 756-7022 or (250) 756-7306

(9) In the event that a licence holder does not fish during the current fishing season, the licence holder shall submit a nil report. One page from the harvest logbook identifying the vessel, licence tab number and the year with 'nil' entered in the body of the log and signed by the licence holder constitutes a nil report.

17. Fish Slips:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under the authority of this licence.

(2) A report shall be made even if the fish are used for bait, personal

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

consumption or disposed of otherwise.

(3) The report shall be mailed not later than seven days after the offloading and sent to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit Suite 200 - 401 Burrard Street Vancouver B.C. V6C 3S4

Fish slips may be downloaded and printed at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Fish slip books may also be ordered from the printer at user cost at http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html. Phone (604) 666-2716 for more information.

18. Workers' Compensation Board Requirements

All Red Sea Urchin divers shall be in possession of a Workers' Compensation Board Seafood Harvesting Diving Certificate.

Explanatory Note - Harvest Log, Chart Data and Validation: The Red Sea Urchin Validation & Harvest Log issued by the service provider contracted by the Pacific Urchin Harvesters' Association is approved for both form and content by the Shellfish Data Unit. This service provider will provide the logbook and coding, data entry, electronic chart data capture and validation services.

Version Date: 15-Feb-2017

CONDITIONS OF 2017/2018 COMMUNAL OUTSIDE ROCKFISH HOOK AND LINE LICENCE Licence Period: February 21, 2017 to February 20, 2018 [February 15, 2017]

Authority

The Department of Fisheries and Oceans has authority to set licensing conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the outside rockfish hook and line fishery obtain a copy of the current Groundfish Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the Fisheries Act, the regulations or these conditions, the Act, the regulations and these conditions prevail.

PART 1

Application

This Part applies to fishing for those species of fish set out in section 1 of this Part, by hook and line gear.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at sea observer to uniquely identify a groundfish fishing trip upon which a designated at sea observer has been embarked.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

This report may contain data rated up to Protected A
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 15 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-out Report" means the report made to the designated groundfish hail service provider prior to embarking on a fishing trip. (See section 12).

"Hail-in Report" means the report made to the designated groundfish hail service provider prior to landing fish. (See section 16).

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part.

"quota applicable rockfish" means Yelloweye, Quillback, Copper, China, Tiger, Canary, Silvergrey, Shortraker, Redbanded, Rougheye Rockfish and Shortspine Thornyhead.

"Quota Status Verification Number (QSVN)" means the unique number certifying that a vessel is not in an overage position for any species per groundfish management area.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A. Do not release this data to external parties

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species and quantities of fish that are permitted to be taken (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) The licensed vessel is permitted to catch and retain those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item.

Column I Column II Column III Species GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight) (2) Other rockfish (as set out in Appendix 1): The combined quantity of other rockfish landed from one fishing trip shall not exceed 5,000 pounds (2,268 kg) (round weight).

(3) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of quota applicable rockfish (round weight) is landed; or

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(ii) 100 pounds (45 kg) plus 1 percent of the amount of quota applicable rockfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. (4) Black Rockfish: The quantity of Black Rockfish landed from any one fishing trip shall not exceed 1000 pounds (454 kg) (round weight).

Note: The quantities of Bocaccio and Black Rockfish landed form part of the combined quantity of other rockfish.

(5) Skate, other than Big Skate and Longnose Skate: There is no limit to the amount of skate, other than Big Skate and Longnose Skate, that can be landed from any one fishing trip.

(6) Pacific Cod: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight).

(7) Greenling: The quantity of Greenling landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight).

(8) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(9) Sole and flounder: There is no limit to the amount of sole and flounder that can be landed from any one fishing trip.

(10) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a Lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in with the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in 27 and 29 of the Fishery (General) Regulations.

6. The waters in which fishing is permitted to be carried out:

(1) Subject to subsection 6(2), fishing under authority of this licence is permitted during those times when persons fishing under authority of a Category ZN (Outside) licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish, in that area and during that time.

(2) Subject to subsection 6(1), and subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, fishing under the authority of this licence is permitted within Groundfish Management Areas 3C, 3D, 5A, 5B, 5C, 5D, and 5E.

7. Fishing gear permitted to be used:

Hook and line gear.

8. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 8(4) all halibut shall either be landed: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where are frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

9. Release of rockfish:

No rockfish shall be released to sea.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

10. Transport requirements:

(1) All fish taken under authority of this licence shall be transported by the vessel designated to fish this licence either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

11. Fish Pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence may be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken under authority of this licence shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any vessel other than the vessel designated to fish this licence.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

12. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 12(1)) The person identified as the vessel master in subsection 12(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master, who must be the caller making the report; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to his or her service provider indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

13. At-sea monitoring:

When fishing under the authority of this licence, at-sea monitoring coverage of all fishing activity is required at all times by means of: (1) a designated groundfish at-sea observer carried on board the vessel; or (2) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 15.

14. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 14(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence: (a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; and (iii) name of the designated groundfish at-sea observer. (b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea. (c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operating System (FOS) within seven (7) days of completion of the fishing trip. (d) As an alternative to carrying a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used, as described in section 15.

15. Electronic Monitoring (EM) System:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for fishing deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor (where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras. (6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(7) The licence holder or vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

16. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 16(1)).

(1) Not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in subsection 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Fishing Licence.

(2) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

17. The location and times at which landing of fish from the vessel is permitted:

(1) Subject to subsections 17(2), 17(3) and 17(4), all fishing under authority of this licence shall cease at 23:59 h February 20, 2018, and all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsections 17(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsections 17(4), no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA closes to fishing for a species and fish of that species taken in the closed area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

18. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

19. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(7), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing.

(a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance.

(b) Where the measures in subsection 19(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a designated groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl, Schedule II - Other species or Inside Hook and Line Rockfish Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, Schedule II - Other species, or Inside Hook and Line Rockfish Licence shall be landed prior to the vessel fishing under the authority of this licence.

20. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 20(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing: (a) All fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut:

Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

21. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced five m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyors tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) vessels less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) vessels 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) vessels more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) vessels more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master fishing vessels that have no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 23(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

described in subsections 23(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 23(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Prohibition of Shark Finning

(1) No person shall remove and retain the fins of any Spiny Dogfish without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties

Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1

This report may contain data rated up to Protected A.
Do not release this data to external parties.
Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b)

Document Released Under the Access to Information Act / Renseignements divulgués en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed, 1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties

Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A
Do not release this data to external parties

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A
Do not release this data to external parties.

observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties

3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A
Do not release this data to external parties

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

ROE HERRING GILL NET Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FH 92 2017

ROE HERRING GILL NET Licence 2017 Date Issued: 22 Feb 2017

Licensed for: Commercial Fishing Expiry Date: 31 Dec 2017

Licence Holder:

FIN: 44445

LAX KW'ALAAMS INDIAN BAND
206 SHASHAAK ST
LAX KW'ALAAMS BC
V0V 1H0

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Quota: 352.779 Short Tons For Licence Group POOL 305

Licence Area: HERRING GILL NET PRINCE RUPERT

Waters in which fishing is permitted: Areas 3, 4 and 5 **s.19(1)**

Species: ROE HERRING

Gear: GILL NET

Licence Group Name: POOL 305

s.19(1)

Once catch targets and gear allocations are identified for the Central Coast roe herring fishery, the quota allocated to this licence will be equivalent to 0.0827815% of any Central Coast gillnet fishery quota, as provided by fishery notice.

Participation in the Central Coast area roe herring fishery will be on the basis of Pools as formed in the PRD or SOG areas, as noted above in this licence.

CONDITIONS OF 2017 COMMUNAL ROE HERRING GILL NET LICENCE

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the Roe Herring fishery obtain a copy of the current Commercial Fishing Plan for Roe Herring, made pursuant to the Pacific Region Integrated Fisheries Management Plan for Pacific Herring. The Commercial Fishing Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for Roe Herring.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"fishing grounds" means those waters in the immediate vicinity of fishing activity authorized under this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the current Roe Herring gill net fishery in that area.

"landed" or "landing" means the transfer of herring from water to land.

"licence holder" means all of the parties listed in this licence.

"Pool Captain" means the individual who has been identified by the licence holder as the person who communicates with the fishery manager for the licenced pool in which the licence is issued.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel master or vessel operator", means the individual responsible for the fishing activities under authority of this licence.

"validated" means Roe Herring have been weighed by an observer and the weight entered into the current Roe Herring Gillnet Pool Fishery Validation Record.

"vessel registration number(VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species of fish permitted to be caught:

Roe Herring (Clupea pallasi)

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fish harvesters:

Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request of any fishery officer or fishery guardian.

Document Released Under the Access to Information Act / Document divulgué en vertu

Designations are personal and non-transferable.

4. The period during which fishing is permitted to be carried out:

Fishing is permitted for Roe Herring by gill net in the area set out in this licence during those times when persons fishing under authority of a Category H licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993, are authorized to fish for Roe Herring, with a gill net, in that area and during that time.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified as set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified as set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Gear permitted to be used:

(1) Gill nets shall not exceed (a) a maximum length of 135 m; (b) a maximum depth of 100 meshes; and (c) a maximum mesh size of 64 mm.

Note that the maximum mesh size of 64 mm does not apply in respect of a gill net that contains a single portion of netting that is not more than 2 m in depth and that has a mesh size of at least 150 mm.

(2) No gill nets other than those which meet these specifications are permitted to be on board the fishing vessel.

(3) No person shall leave a herring gill net in the water for more than 12 hours without removing and retaining all of the herring from it.

(4) No person shall leave any anchors, buoys or lines in the water during any closed time.

7. Marking of gear:

(1) A buoy floating on the surface of the water shall be attached to each end of every gill net that is not attached to the vessel.

(2) The buoys shall be at least 125 cm in circumference.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

(3) All buoys attached to the gill net shall be of the same colour.

(4) A net float marked with the licence year and gillnet licence number shall be attached to a buoy that is attached to one end of the gill net.

(5) The net float referred to in 7(4) shall be marked in solid block Arabic numerals and letters: (a) without ornamentation; (b) not less than 25 mm in height and 7 mm in width; and (c) in a colour that contrasts with their background.

8. Vessel permitted to be used:

Any vessel is permitted to be used provided that the vessel is registered or licensed in Canada under the Canada Shipping Act, 2001, the vessel is marked accordingly and the vessel meets all inspection requirements under that Act.

9. Quantity of fish permitted to be taken:

The maximum quantity of Roe Herring authorized to be taken under this licence by the licence holder is the landed weight set out under "Quota" in this licence. The landed weight shall be determined at the port of landing.

The Pool captain has been identified as the person who may communicate with the fishery manager for the licensed pool and is responsible for documenting fishing locations, the number of nets fishing, estimated catch, and the list of packing vessels for the pool; however the vessel master is responsible for not catching fish exceeding the weight of fish set out in the quota for the licence.

10. All Roe Herring transhipped from this licensed vessel to another vessel for transport shall be weighed on a scale approved by Industry Canada prior to being placed into the receiving vessel.

11. Oral Reports:

Prior to the removal from the fishing grounds of Roe Herring caught under the authority of this licence, the vessel master shall notify the fishery manager of the following information:

(a) vessel name, vessel master's name and vessel registration number of

Document Released Under the Access to Information Act / Document divulgué en vertu

any vessel transporting the Roe Herring; (b) the weight of the Roe Herring, as determined under section 10; (c) the packing capacity of the vessel or vessels transporting the catch; (d) the name of the company, fish processor or buyer that is buying or transporting the catch; and (e) the estimated time of arrival and the landing port for both the licensed vessel and for any vessels transporting Roe Herring caught by this vessel.

12. Locations permitted for the landing of Roe Herring:

Port Edward Metro Vancouver French Creek Prince Rupert Quadra Island

13. Sorting of Roe Herring:

(1) All Roe Herring caught under authority of this licence shall be landed and validated.

(2) No person shall sort, by any means, Roe Herring caught under the authority of this licence prior to landing and validating the fish.

14. Validation by an observer:

Direct offloads from a catcher vessel require prior approval from the fishery manager. In the event that a catcher vessel is provided approval to directly offload catch from the vessel, the following conditions apply:

(1) No Roe Herring shall be landed unless the vessel master has hailed in, received a confirmation number and an observer is present to approve the commencement of landing.

(2) To hail in and receive a confirmation number the vessel master shall telephone 1-866-930-4000 and provide the following information:

(a) vessel name, vessel master's name and vessel registration number (if registered) of the vessel landing the Roe Herring; (b) name of the port and specific location where the Roe Herring will be landed; (c) location where and date when Roe Herring was caught; (d) name of company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; (e) anticipated time of arrival at the landing port; and (f) a listing of the gill net licence pool numbers under the authority of which the

Document Released Under the Access to Information Act / Document divulgué en vertu

fish were caught and the accurate weight of Roe Herring received from each pool. (g) If a vessel does not have a vessel registration number as per 14(2)(a) then the vessel's Department of Transport (D.O.T.)number shall be provided.

(3) All Roe Herring caught under this licence shall be validated at the point and time of landing by an observer and this weight shall be the landed weight.

(4) All herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(5) All fish on board the vessel shall be landed at the same time and location. Once offloading has started, the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(6) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(7) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

TRANSPORTING FISH PERMITTED. SEE PART 2 OF LICENCE CONDITIONS.

Once catch targets and gear allocations are identified for the Central Coast roe herring fishery, the quota allocated to this licence will be equivalent to 0.4405286% of any Central Coast seine fishery quota, as provided by fishery notice.

Participation in the Central Coast area roe herring fishery will be on the basis of Pools as formed in the PRD or SOG areas, as noted above in this

CONDITIONS OF 2017 COMMUNAL ROE HERRING SEINE LICENCE

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the Roe Herring seine fishery obtain a copy of the current Commercial Fishing Plan for Roe Herring, made pursuant to the Pacific Region Integrated Fisheries Management Plan for Pacific Herring. The Commercial Fishing Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for Roe Herring.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"fishing grounds" means those waters in the immediate vicinity of fishing activity authorized under this licence.

"fishery manager" means the individuals who have been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individuals responsible for management of the current Roe Herring fishery in that area.

"landed" or "landing" means the transfer of Roe Herring from water to land.

"observer" means a person who has been designated as an observer by the Regional Director General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"Pool Captain" means the individual who has been identified by the licence holder as the person who communicates with the fishery manager for the licensed pool in which the licence is issued.

"validated" means Roe Herring have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species of fish permitted to be taken:

Roe Herring (Clupea pallasi)

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fish harvesters:

Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

4. The period during which fishing is permitted to be carried out:

Fishing is permitted for Roe Herring by seine net in the area set out in this licence during those times when persons fishing under authority of a Category H licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for Roe Herring, with a seine net, in that area and during that time.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified as set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified as set out in sections 27 and 29 of the Fishery (General) Regulations.

6. Type, size and quantity of fishing gear permitted to be used:

One purse seine net with: (a) a maximum length of 411.48 m (225 fathoms); and (b) a minimum mesh size of 25 mm.

7. Oral Reports:

(1) Prior to leaving the fishing grounds, the vessel master shall notify the fishery manager of the following information:

(a) vessel name, vessel master's name and vessel registration number; (b) the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

estimated weight in tons of any Roe Herring on board the vessel; (c) the estimated weight in tons of any Roe Herring on board any vessel packing or transporting Roe Herring caught by the vessel; (d) the packing capacity of the vessel or vessels transporting the catch; (e) the name of the company, fish processor or buyer that is buying or transporting the catch; and (f) the estimated time of arrival and the landing port for both the licensed vessel and for any vessels transporting Roe Herring caught by this vessel.

8. At-sea monitoring

(1) When required to do so by a representative of the Department, at-sea monitoring by a designated observer will be required while carrying out fishing operations under authority of this licence.

(2) Arrangements for at-sea observer services shall be made by telephoning J.O. Thomas and Associates, Ltd. at 1-866-930-4000. Observer service calls to J.O. Thomas shall be made Monday to Friday, not on statutory holidays, between 0800 h and 1600 h, not less than 48 hours in advance of the intended time of departing port.

9. Fishing and Related Activity Records

(1) The vessel master shall not set the seine net unless approval for that vessel to set in that area and that time is obtained from a representative of the Department. Approval is not required if the vessel is carrying an at-sea observer.

(2) Fishing activity and catch records. When a vessel has been required by a representative of the Department to carry an at sea observer on board, the vessel master shall collect and record on the vessel set log record the following information at sea while fishing under the authority of this licence: (a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN; (iv) name of the designated herring at-sea observer; (v) hail out number obtained from the service provider; and (vi) estimated tons of herring in location.

(b) For each set made: (i) the set number, date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes, for each set; (ii) geographic description of location of set; (iii) estimated tons in catch; (iv) estimated tons put onboard; (v) if a sample was collected; (vi) if catch is shared on grounds; (vii) the total estimated catch shared; (viii)the name(s) of the receiving vessel(s); (ix) marine mammals killed; (x) other bycatch species present; and (xi) if set released, reason for release.

(3) The original vessel set log record shall be submitted to J.O. Thomas and Associates no later than ten days following the date the fish were landed. The vessel set log record may be submitted to an observer in person or may be mailed, provided it is received by the date specified.

10. Locations permitted for the landing of Roe Herring:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

Port Edward Metro Vancouver French Creek Prince Rupert Quadra Island

11. Release of Roe Herring:

(1) All herring caught under the authority of this licence shall be landed and weighed.

(2) Where the vessel master tests the herring caught by the seine net for roe content and determines that the herring are not of the quality desired, and if approval has been obtained from a representative of the Department, all the herring which have been captured may be released from the net.

(3) No person shall sort, by any means, Roe Herring caught under the authority of this licence, prior to landing and validating the fish.

(4)Once the pumping of herring from the seine net has commenced, all herring from that set shall be retained, unless the set must be released due to vessel safety concerns.

12. Quantity of fish permitted to be taken:

(1) The maximum quantity of Roe Herring authorized to be taken under this licence by the licence holder shall not exceed the landed weight set out under "Quota" in this licence. The landed weight shall be determined at the point of landing.

(2) The Pool captain shall communicate with the fishery manager on behalf of the licensed pool and is responsible for documenting fishing locations, the number of nets fishing, estimated catch, and the list of packing vessels for the pool.

(3) The vessel master is responsible to ensure that no fish are caught exceeding the weight of fish set out in the quota for the licence.

13. Validation by an observer:

(1) No Roe Herring shall be landed unless the vessel master has hailed in, received a confirmation number and an observer is present to approve the commencement of landing.

(2) To hail in and receive a confirmation number, the vessel master shall telephone 1-866-930-4000 and provide the following information:

(a) vessel name, vessel master's name and vessel registration number of the vessel landing the Roe Herring; (b) name of the port and specific location where the Roe Herring will be landed; (c) location where and time when Roe Herring was caught; (d) name of company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; (e) anticipated time of arrival at the landing port; and (f) estimated weight in tons of the Roe Herring on board the vessel.

(3) All Roe Herring caught under this licence shall be validated by an observer at the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

point and time of landing and this weight shall be the landed weight.

(4) All herring shall be weighed using a scale approved by Industry Canada.

(5) All fish on board the vessel shall be landed at the same time and location. Once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(6) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(7) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

COMMUNAL PART 2 [February 15, 2017]

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Part 1

This Part applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Part 2

This Part applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; (l) number of pieces landed for each species by grade and method of dressing of fish; (m) price paid per pound, by species; and (n) total catch value of all species.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html -

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Part 3

This Part applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Part 4

This Part applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

Licence Serial No.: 425922

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Version Date: 16-Feb-2016

CONDITIONS OF 2016/2017 COMMUNAL SABLEFISH LICENCE

Licence Period: February 21, 2016 to February 20, 2017

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the sablefish fishery obtain a copy of the current Groundfish Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the plan and the Fisheries Act and regulations or these conditions, the Act and regulations and these conditions prevail.

PART 1

Application

This Part applies to fishing for those species of fish set out in section 1 of this Part.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

embarked.

"Communal Fishing Licence" means a licence issued under the Aboriginal Communal Fishing Licences Regulations that authorizes an aboriginal organization to fish groundfish for food, social and ceremonial purposes.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight and species of groundfish caught and retained.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-7, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11).

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15).

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part.

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per Groundfish Management Area.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species and quantities of fish that are permitted to be taken (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) The licensed vessel is permitted to catch and retain those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item.

Column I Column II Column III Species GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight)

Do not release this data to external parties.

Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight) (2) Rockfish: (a) Other rockfish (as set out in Appendix 1): The combined quantity of other rockfish landed from any one fishing trip shall not exceed 5,000 pounds (2,268 kg) (round weight).

(b) Bocaccio: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of sablefish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of sablefish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish (as set out in Appendix 1).

(c) Bocaccio: Notwithstanding subsection 1(2)(b), when the vessel master fishes under authority of a halibut licence and sablefish licence simultaneously, the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of halibut (fresh, dressed head-off weight) and sablefish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of halibut (fresh, dressed head-off weight) and sablefish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total.

Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish (as set out in Appendix 1).

(3) Pacific Cod: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight).

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) Sole, Flounder, and Skate (excluding Big Skate and Longnose Skate): There is no limit to the amount of sole, flounder, and skate (excluding Big Skate and Longnose Skate) that can be landed from any one fishing trip.

(5) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(6) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than

(a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or

(b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than

(a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. The waters in which fishing is permitted and the period during which fishing is permitted to be carried out:

(1)Subject to subsections 6(2) and 6(3), fishing under authority of this licence is permitted during those times when persons fishing under authority of a Category K licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish, in that area and during that time.

(2) Subject to subsection 6(3), and subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, fishing under the authority of this licence is permitted within Groundfish Management Areas 3C, 3D, 5A, 5B, 5C, 5D, and 5E.

(3) When hailed out on a directed sablefish fishery under the authority of this licence, fishing is permitted only in Areas: 1, 2, 101, 108 to 111, 121, 123 to 127, 130, 142, Subarea 102-3 and that portion of Subarea 102-2 that lies south of a line from 52 degrees 10.00 minutes north latitude and 130 degrees 57.395 minutes west longitude to 52 degrees 27.020 minutes north latitude and 130 degrees 16.621 minutes west longitude, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

7. Fishing gear permitted to be used and the manner in which it may be used:

(1) Hook and line gear, and trap gear are permitted to be used. Traps shall include the following:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(a) Escape Holes: All traps shall have at least two separate openings in the side wall, excluding the tunnels, such that an 8.89 cm (3.5 in) diameter round peg will readily pass through each of the openings without stretching or altering the shape of the opening.

(b) Rot Panels: All traps shall have a rot panel. The rot panel consists of a section in a trap side wall that has been laced, sewn or otherwise secured by a single length of untreated natural fibre not larger than 2 mm in diameter and that, on deterioration or parting, produces in the side wall an opening with four sides, each of which is at least 20 cm in length.

(2) 4-day limit: No person shall set a trap and leave the trap in the water for more than 4 consecutive days without lifting the trap from the water and removing all of the fish from it.

8. Release of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury. Halibut caught by longline gear shall be released by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2)Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

9. Release of rockfish:

No rockfish shall be released to sea.

10. Transport requirements:

(1) All fish taken under authority of this licence shall be transported to land by the vessel named in this licence.

(2) The vessel fishing under the authority of this licence shall not have on board any fish that have been landed and validated.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

designated groundfish hail service provider (as described in subsection 11(1)). The person identified as the vessel master in subsection 7(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 22, will occur.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3)(a) Subject to subsection 11(3)(b) the vessel master shall hail-out for one directed groundfish fishery only. (b) The vessel master may fish under authority of a halibut licence and sablefish licence simultaneously after obtaining two hail-out numbers to fish both licences from the designated groundfish hail service provider or the designated groundfish electronic hail service provider.

(4) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to his or her service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

When fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (1) a designated groundfish at-sea observer carried on board the vessel; or (2) the use of a functioning electronic monitoring (EM) system on board the vessel as described in section 14.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

13. Fishing and Related Activity Records:

(1) Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence: (a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; and (iii) name of the designated groundfish at-sea observer. (b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch in pieces, by species released back to sea. (c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip. (d) As an alternative to carrying a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 10-30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all fishing gear being retrieved from the water and all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or vessel master shall arrange to have the service

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 15(1)).

(1) Subject to subsection 15(2), and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in subsection 22, an estimate in pounds by species of fish that was caught under the authority of the Communal Fishing Licence.

(2) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught.

16. The location and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3), and 16(4) all fishing under authority of this licence shall cease at 23:59 h February 20, 2017, and all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2017.

(2) Subject to subsections 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2016. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2016.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Subject to subsection 16(4), no lingcod shall be retained after 23:59 h local time, November 14, 2016. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2016.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect.

(5) All fish caught under the authority of this licence shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Bellingham, WA Blaine, WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Method permitted for landing of fish from the vessel and verification of the weight of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

dockside observer.

(3) Subject to subsections 13(4) and 18(7), the licensed vessel may make one (1) partial landing of species other than halibut during each fishing trip. To conduct a partial offload: (a) the vessel master shall hail in as set out in subsection 11; (b) the partial landing shall be monitored as set out in subsection 13(1); (c) the vessel master shall provide completed logbook pages to the designated groundfish dockside observer at the time of the partial landing; and (d) the vessel master shall provide all sensor and video data at the time of the partial landing.

(4) Subject to subsection 18(7), all halibut taken under the authority of this licence during a fishing trip shall be landed at the time of the final landing. (5) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(6) The vessel master shall provide the groundfish dockside observer with access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing and at the conclusion of the landing.

(7) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(8) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Schedule II - Other Species, Groundfish Trawl or Rockfish Hook and Line Licence.

(9) All fish taken under the authority of a Schedule II - Other Species, Groundfish Trawl or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

18. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

observer.

19. Methods by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by a designated groundfish dockside observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; (c) all containers shall be accurately weighed; and (d) a sample of no less than fifteen percent (15%) of each type of container shall be taken, as directed by an observer. The sample containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head-off weight.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(9) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh, dressed head-off halibut:

Fresh, dressed head-off with ice and slime 0.98 Fresh, dressed head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed head-off with glaze 0.97 Frozen, dressed head-on with glaze 0.87 Frozen, round with glaze 0.74

(10) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed,1.54 Fresh: dressed, head-off-tailed, 1.49

Other flounders and soles: Frozen: dressed, head-on 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off, 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(11) Sablefish to be stored for later processing and/or transport to a different location(s) shall be kept in containers marked, immediately after verification of weight by the observer, with the following information:

(a) Sablefish Licence number; (b) landing number; (c) container number; (d) landing date; (e) product weight in pounds; (f) vessel name; (g) landing port; (h) observer's name; and (i) the buyer's name.

20. Records that the vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Log shall be obtained from a designated groundfish dockside observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence (c) The vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, the completed yellow copies in the Integrated Groundfish Fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) The completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) The licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(3) Fish Slips

(a) An accurate written report shall be provided on a fish slip of all fish landed under the authority of this licence. (b) The vessel master shall ensure that fish slips are submitted not later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604)666-2716.

21. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

coloured streamers spaced five m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyors tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 21(2) and 21(3), vessel masters fishing:

(a) vessels less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear;

(b) vessels 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear;

(c) vessels more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and

(d) vessels more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master fishing vessels that have no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 21(1) at all times when setting longline gear except:

(a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or

(b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and

(c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that:

(a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, vessel masters shall:

(a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

18. Dual Fishing

The following definitions apply to this section:

"dual fishing" means fishing for and retaining groundfish under the authority of this licence and a Communal Fishing Licence during the same fishing trip.

"dual fishing designation" means designation by an aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an aboriginal organization confirming designation to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

fish under a Communal Fishing Licence.

"unique identification number" means a unique number the aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the aboriginal organization's Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the aboriginal organization; (b) the full name of the vessel designated by the aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating aboriginal organization's Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the aboriginal organization's Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the aboriginal organization has assigned to the dual fishing designation certificate; and

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information

(i) the Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number the aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea boarding occurs.

(7) At the request of the aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the aboriginal organization that issued the dual

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi

fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of a Communal Fishing Licence shall occur only in the waters, or area, where the designating aboriginal organization's Communal Fishing Licence authorizes fishing.

(12) Before the fish caught pursuant to the Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the aboriginal organization who was advised of the landing 18(12)(a) were made and provides it to a Fishery Officer upon request.

(13) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the Communal Fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

Licence during the fishing trip to the aboriginal organization that issued the dual fishing designation certificate.

(14) All fish caught under the authority of the Communal Fishing Licence are for the food, social and ceremonial purposes of the aboriginal organization which holds the licence. The vessel master or any person designated to fish under the Communal Fishing Licence shall not sell trade or barter any fish caught pursuant to the Communal Fishing Licence.

23. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

24. Shark Finning Prohibition

No person shall remove and retain the fins of any Spiny Dogfish without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 2 [February 9, 2016] Application

This Part applies to fishing for those species listed in s.1.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to subsection 39(1) of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 9 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department of Fisheries and Oceans database into which all catch data must be entered.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 10)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 6)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department of Fisheries and Oceans and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 1 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Release of halibut:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 6(1). The person identified as the vessel master in subsection 6(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master, who must be the caller making the report; (d) name of the directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 18, will occur. If that is the case, the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate shall be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsection 6(1).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 7(2), when fishing under authority of this licence at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system onboard the vessel, as described in section 9.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 8(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea. (c) The

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip. (d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 9.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 10(1)). (1) Subject to subsection 10(2) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a)

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 18, an estimate in poundage by species of fish that was caught under the authority of the Communal Fishing Licence.

(2) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 11(2), 11(3) and 11(4), all fish caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2017.

(2) Subject to subsection 11(4), no halibut shall be retained after 12:00 h local time, November 7, 2016. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2016.

(3) Subject to subsection 11(4), no lingcod shall be retained after 23:59 h local time, November 14, 2016. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2016.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" Fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log no later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) The vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a fishery officer, a DFO employee or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) The completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) The licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall submit the fish slips not later than seven (7) days after landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(4) Fish slips shall be submitted by the vessel master to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel .

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 17(2) and 17(3), the vessel master fishing:

(a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear;

(c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and

(d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 17(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing for all species

The following definitions apply to this section:

"Communal Fishing Licence" means a licence issued under the Aboriginal Communal Fishing Licences Regulations that authorizes an aboriginal

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

organization to fish groundfish for food, social and ceremonial purposes.

"dual fishing" means fishing for and retaining groundfish under the authority of this licence and a Communal Fishing Licence during the same fishing trip.

"dual fishing designation" means designation by an aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an aboriginal organization confirming designation to fish under a Communal Fishing Licence.

"unique identification number" means a unique number the aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the aboriginal organization's Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the aboriginal organization; (b) the full name of the vessel designated by the aboriginal organization; (c) the amount of groundfish by species that the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating aboriginal organization's Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the aboriginal organization's Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the aboriginal organization has assigned to the dual fishing designation certificate; and (i) the Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 23(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 23(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the aboriginal organization that issued the dual fishing designation certificate and the unique identification number the aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea boarding occurs.

(7) At the request of the aboriginal organization that issued the dual

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

fishing designation certificate, fish taken under the authority of the Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of a Communal Fishing Licence shall occur only in the waters, or area, where the designating aboriginal organization's Communal Fishing Licence authorizes fishing.

(12) Before the fish caught pursuant to the Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the aboriginal

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the aboriginal organization who was advised of the landing 18(12)(a) were made and provides it to a Fishery Officer upon request.

(13) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the Communal Fishing Licence during the fishing trip to the aboriginal organization that issued the dual fishing designation certificate.

(14) All fish caught under the authority of the Communal Fishing Licence are for the food, social and ceremonial purposes of the aboriginal organization which holds the licence. The vessel master or any person designated to fish under the Communal Fishing Licence shall not sell trade or barter any fish caught pursuant to the Communal Fishing Licence.

19. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

PART 3 [February 9, 2016]

Application

These conditions apply to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

2. Transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A. Do not release this data to external parties.

24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

3. Transporting Roe Herring:

Transporting of Roe Herring is authorized by this licence for the current

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring; (ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

SABLEFISH Licence 2017

For fisheries in Canadian fisheries waters in the Pacific Ocean

---

Licence FK 4 2017

SABLEFISH Licence 2017 Date Issued: 25 Oct 2017

Licensed for: Commercial Fishing Expiry Date: 20 Feb 2018

Licence Holder:

FIN: 100409

SECRETARIAT OF THE HAIDA NATION
504 NAANII ROAD
PO BOX 589
MASSET BC
V0T 1M0

s.19(1)

Designated Vessel:

VRN 29347
DOT 806964
Vessel IRON MAIDEN
Vessel OAL 12.37 Meters
Gross Tonnage 71.57 Cubic Meters
Net Tonnage 31.67 Cubic Meters

Reported Vessel Owner:

FIN: [redacted]
DARYL EUGENE EGAN
[redacted]

This licence is issued under the authority of the Fisheries Act and Subsection 4(1) of the Aboriginal Communal Fishing Licences Regulations and confers authority to fish under the conditions applicable to this licence, subject to provisions of the Fisheries Act and Regulations made thereunder. This licence does not authorize fishing until the current conditions of licence are attached.

Species: SABLEFISH

Gear: LONGLINE/TRAP

IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON FEBRUARY 20, 2018. IF DFO AND THE ABOVE NOTED LICENCE ELIGIBILITY HOLDER DO NOT ENTER INTO THE 2017-18 FISHERIES AGREEMENT OR A LETTER OF INTENT ON OR BEFORE JUNE 30, 2017, THIS LICENCE WILL EXPIRE ON JUNE 30, 2017.

OTHER SPECIES, INCLUDING GEAR AND QUOTAS, ARE SET OUT IN PART 2 OF LICENCE CONDITIONS.

TRANSPORTING FISH PERMITTED. SEE PART 3 OF LICENCE CONDITIONS.

Version Date: 15-Feb-2017

CONDITIONS OF 2017/2018 COMMUNAL SABLEFISH LICENCE Licence Period: February 21, 2017 to February 20, 2018

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fishers to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of the sablefish fishery obtain a copy of the current Groundfish Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the plan and the Fisheries Act and regulations or these conditions, the Act and regulations and these conditions prevail.

PART 1

Application

This Part applies to fishing for those species of fish set out in section 1 of this Part.

Definitions

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"date of landing" means the date of commencement of landing.

"Department (DFO)" means the Department of Fisheries and Oceans.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations, on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under a FSC Communal Fishing Licence.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to 5, 103 and 104 and Subareas 1-2 to 1-7, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11).

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15).

"Integrated Groundfish Fishing Log" means the electronic or paper log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part.

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per Groundfish Management Area.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species and quantities of fish that are permitted to be taken (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) The licensed vessel is permitted to catch and retain those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item.

Column I Column II Column III Species GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight) (2) Rockfish: (a) Other rockfish (as set out in Appendix 1): The combined quantity of other rockfish landed from any one fishing trip shall not exceed 5,000 pounds (2,268 kg) (round weight).

(b) Bocaccio: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of sablefish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of sablefish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish (as set out in

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Appendix 1).

(c) Bocaccio: Notwithstanding subsection 1(2)(b), when the vessel master fishes under authority of a halibut licence and sablefish licence simultaneously, the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of halibut (fresh, dressed head-off weight) and sablefish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of halibut (fresh, dressed head-off weight) and sablefish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total.

Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish (as set out in Appendix 1).

(3) Pacific Cod: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight).

(4) Sole, Flounder, and Skate (excluding Big Skate and Longnose Skate): There is no limit to the amount of sole, flounder, and skate (excluding Big Skate and Longnose Skate) that can be landed from any one fishing trip.

(5) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(6) The vessel master shall ensure that a current and valid licence amendment is on board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than

(a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or

(b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) No person shall catch and retain a sablefish that is less than

(a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than

(a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

6. The waters in which fishing is permitted and the period during which fishing is permitted to be carried out:

(1)Subject to subsections 6(2) and 6(3), fishing under authority of this licence is permitted during those times when persons fishing under authority of a Category K licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for groundfish, in that area and during that time.

(2) Subject to subsection 6(3), and subject to variation of the close times set out in the Pacific Fishery Regulations, 1993, fishing under the authority of this licence is permitted within Groundfish Management Areas 3C, 3D, 5A, 5B, 5C, 5D, and 5E.

(3) When hailed out on a directed sablefish fishery under the authority of this licence, fishing is permitted only in Areas: 1, 2, 101, 108 to 111, 121, 123 to 127, 130, 142, Subarea 102-3 and that portion of Subarea 102-2 that lies south of a line from 52 degrees 10.00 minutes north latitude and 130 degrees 57.395 minutes west longitude to 52 degrees 27.020 minutes north latitude and 130 degrees 16.621 minutes west longitude, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

7. Fishing gear permitted to be used and the manner in which it may be used:

(1) Hook and line gear, and trap gear are permitted to be used. Traps shall include the following:

(a) Escape Holes: All traps shall have at least two separate openings in the side wall, excluding the tunnels, such that an 8.89 cm (3.5 in) diameter round peg will readily pass through each of the openings without stretching or altering the shape of the opening.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(b) Rot Panels: All traps shall have a rot panel. The rot panel consists of a section in a trap side wall that has been laced, sewn or otherwise secured by a single length of untreated natural fibre not larger than 2 mm in diameter and that, on deterioration or parting, produces in the side wall an opening with four sides, each of which is at least 20 cm in length.

(2) 4-day limit: No person shall set a trap and leave the trap in the water for more than 4 consecutive days without lifting the trap from the water and removing all of the fish from it.

8. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by: (a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 8(4) all halibut shall either be landed: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where are frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

9. Release of rockfish:

No rockfish shall be released to sea.

10. Transport requirements:

(1) All fish taken under authority of this licence shall be transported to land by the vessel named in this licence.

(2) The vessel fishing under the authority of this licence shall not have on board any fish that have been landed and validated.

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1)). The person identified as the vessel master in subsection 7(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

master; (d) name of directed groundfish fishery; (e) functionality test certificate number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 22, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3)(a) Subject to subsection 11(3)(b) the vessel master shall hail-out for one directed groundfish fishery only. (b) The vessel master may fish under authority of a halibut licence and sablefish licence simultaneously after obtaining two hail-out numbers to fish both licences from the designated groundfish hail service provider or the designated groundfish electronic hail service provider.

(4) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to his or her service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

When fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (1) a designated groundfish at-sea observer carried on board the vessel; or (2) the use of a functioning electronic monitoring (EM) system on board the vessel as described in section 14.

13. Fishing and Related Activity Records:

(1) Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence: (a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; and (iii) name of the designated groundfish at-sea observer. (b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch in pieces, by species released back to sea. (c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip. (d) As an alternative to carrying a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic monitoring (EM) system:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter insert time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view; (c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 10-30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all fishing gear being retrieved from the water and all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or vessel master shall arrange to have the service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report:

Prior to cancelling or completing a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 15(1)).

(1) Subject to subsection 15(2), and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in subsection 22, an estimate in pounds by species of fish that was caught under the authority of the Communal Fishing Licence.

(2) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught.

16. The location and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3), and 16(4) all fishing under authority of this licence shall cease at 23:59 h February 20, 2018, and all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsections 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4), no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect.

(5) All fish caught under the authority of this licence shall be landed at one of the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Bellingham, WA Blaine, WA

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Method permitted for landing of fish from the vessel and verification of the weight of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer.

(3) Subject to subsections 17(4) and 22(7), the licensed vessel may make one (1) partial landing of species other than halibut during each fishing trip. To conduct a partial offload: (a) the vessel master shall hail in as set out in subsection 11; (b) the partial landing shall be monitored as set out in subsection 13(1); (c) the vessel master shall provide completed logbook pages to the designated groundfish dockside observer at the time of the partial landing; and (d) the vessel master shall provide all sensor and video data at the time of the partial landing.

(4) Subject to subsection 22(7), all halibut taken under the authority of this licence during a fishing trip shall be landed at the time of the final landing. (5) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(6) The vessel master shall provide the groundfish dockside observer with access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing and at the conclusion of the landing.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(7) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(8) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Schedule II - Other Species, Groundfish Trawl or Rockfish Hook and Line Licence.

(9) All fish taken under the authority of a Schedule II - Other Species, Groundfish Trawl or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

18. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

19. Methods by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by a designated groundfish dockside observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; (c) all containers shall be accurately weighed; and (d) a sample of no less than fifteen percent (15%) of each type of container shall be taken, as directed by an observer. The sample containers shall be emptied and the contents sorted where necessary and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head-off weight.

(9) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh, dressed head-off halibut:

Fresh, dressed head-off with ice and slime 0.98 Fresh, dressed head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed head-off with glaze 0.97 Frozen, dressed head-on with glaze 0.87 Frozen, round with glaze 0.74

(10) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed,1.54 Fresh: dressed, head-off-tailed, 1.49

Other flounders and soles: Frozen: dressed, head-on 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off, 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(11) Sablefish to be stored for later processing and/or transport to a different location(s) shall be kept in containers marked, immediately after verification of weight by the observer, with the following information:

(a) Sablefish Licence number; (b) landing number; (c) container number; (d) landing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

date; (e) product weight in pounds; (f) vessel name; (g) landing port; (h) observer's name; and (i) the buyer's name.

20. Records that the vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Log shall be obtained from a designated groundfish dockside observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence (c) Where a paper Integrated Groundfish Fishing Log is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(3) Fish Slips

(a) An accurate written report shall be provided on a fish slip of all fish landed under the authority of this licence. (b) The vessel master shall ensure that fish slips are submitted not later than seven days after landing. Slips shall be mailed to:

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, B.C. V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the Fisheries Management Data Unit message line at (604)666-2716.

21. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced five m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyors tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 21(2) and 21(3), vessel masters fishing:

(a) vessels less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear;

(b) vessels 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear;

(c) vessels more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and

(d) vessels more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) The vessel master fishing vessels that have no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 21(1) at all times when setting longline gear except:

(a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or

(b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and

(c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that:

(a) the streamers are in the air at least 30 m beyond the point at which the groundline enters the water; and (b) towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, vessel masters shall:

(a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

22. Dual Fishing

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 22(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 22(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 22(14)(a) and provide it

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

23. Species at Risk

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

24. Shark Finning Prohibition

No person shall remove and retain the fins of any Spiny Dogfish without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 2 [February 15, 2017]

This Part applies to fishing for groundfish under the authority of this licence.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"at-sea observer file number" means a number provided by the employer of a designated groundfish at-sea observer to uniquely identify a groundfish fishing trip upon which a designated at-sea observer has been embarked.

"designated groundfish at-sea observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor groundfish fishing activities, examine and measure fishing gear and to conduct related activities while at sea.

"designated groundfish at-sea observer service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated groundfish electronic hail service provider" means Electric Edge Systems Group Inc. of Victoria, B.C.

"designated groundfish hail service provider" means Archipelago Marine Research Ltd. of Victoria, B.C.

"designated observer" means a corporation designated pursuant to section 39.1 of the Fishery (General) Regulations to provide individuals designated as observers to monitor the landing of fish and the verification of weight, pieces and species of fish caught and retained.

"designated groundfish dockside observer" means an individual designated pursuant to section 39 of the Fishery (General) Regulations to monitor the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

"dual fishing" means fishing for and retaining groundfish, under the authority of this commercial licence and an Aboriginal organization's FSC communal fishing licence issued under Section 4 of the Aboriginal Communal Fishing Licences Regulations,

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

on the same fishing trip.

"dual fishing designation" means designation by an Aboriginal organization as required under the Aboriginal Communal Fishing Licences Regulations, expressly authorizing a vessel and individuals to fish under authority of the FSC Communal Fishing Licence.

"dual fishing designation certificate" means a properly completed document issued by an Aboriginal organization confirming designation to fish under an FSC Communal Fishing Licence.

"electronic hail (e-hail) program" means an electronic-based hail program that meets the minimum specifications set out in subsection 11(3) of these conditions.

"electronic monitoring (EM) system" means an electronic-based monitoring system that meets the minimum specifications set out in section 14 of these conditions.

"fish pen" means an underwater enclosure, attached to the shore of the land or to the seabed, designed to hold live fish.

"Fishery Operations System (FOS)" means the Department's database into which all catch data shall be entered.

"food, social and ceremonial fish" or "FSC" means fish caught under the authority of a licence issued under the Aboriginal Communal Fishing Licences Regulations for the food, social and ceremonial needs of the Aboriginal organization that holds the licence.

"FSC Communal Fishing Licence" is a licence issued under the Aboriginal Communal Fishing Licences Regulations for the harvest of fish for an Aboriginal organization's FSC use, and does not permit sale.

"Fisher Identification Number (FIN)" means a unique identification number issued by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"Functionality Test Certificate Number (FTCN)" means the unique number certifying that an EM system has been installed and is fully functional.

"Groundfish Management Area(s) (GMA)" means the waters enumerated below, comprised of the Areas and Subareas as set out: "3C": Areas 21, 23, 24, 121 and 123 and Subareas 124-1 to 124-3 and 125-6, combined; "3D": Areas 25, 26 and 126 and Subareas 27-2 to 27-11, 124-4, 125-1 to 125-5, 127-1 and 127-2, combined; "4B": Areas 13 to 20, 28 and 29 and Subareas 12-1 to 12-13 and 12-15 to 12-48, combined; "5A": Areas 11 and 111 and Subareas 12-14, 27-1, 127-3, 127-4 and 130-1, combined; "5B": Areas 7 to 10 and 108 to 110 and Subareas 102-3, 107-2, 107-3, 130-2 and that portion of Subarea 130-3 that lies south of the parallel passing through 51 degrees 56 minutes north latitude, combined; "5C": Areas 6 and 106 and Subareas 2-1 to 2-19, 102-2, 105-2 and 107-1, combined; "5D": Areas 3 to

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

5, 103 and 104 and Subareas 1-2 to 1-5, 101-4 to 101-10, 102-1 and 105-1, combined; and "5E": Area 142 and Subareas 1-1, 2-31 to 2-100 and 101-1 to 101-3 and that portion of Subarea 130-3 that lies north of the parallel passing through 51 degrees 56 minutes north latitude, combined.

"Hail-in Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to landing fish. (See section 15)

"Hail-out Report" means the report made to the designated groundfish hail service provider or the designated groundfish electronic hail service provider prior to embarking on a fishing trip. (See section 11)

"Integrated Groundfish Fishing Log" means the log that meets the requirements of the Department and serves as the official catch record for a vessel for any given groundfish trip.

"Integrated Groundfish Validation Record" means the official catch record provided by the designated groundfish dockside observer for a vessel for any given groundfish trip.

"landed" means having offloaded catch onto land.

"landing" means the offloading of the catch onto land.

"other rockfish" means the species listed in Appendix 1 to this Part

"Quota Status Verification Number (QSVN)" means the unique number assigned by a groundfish dockside observer and recorded in the Integrated Groundfish Validation Log certifying that a vessel is not in an overage position for any species per groundfish management area group.

"unique identification number" means a unique number the Aboriginal organization must assign to a dual fishing designation certificate to differentiate it from any other dual fishing designation certificates it may issue.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Species, gear and quantities of fish that are permitted (all species are as referred to in Schedule I of the Pacific Fishery Regulations, 1993):

(1) When hailed out on a directed Spiny Dogfish (by hook and line gear) trip, the licensed vessel is permitted to catch and retain the following by hook and line gear:

(a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) Big Skate (Raja binoculata) 3C,3D 0 (round weight) Big Skate (Raja binoculata) 5A,5B 0 (round weight) Big Skate (Raja binoculata) 5C,5D,5E 0 (round weight) Longnose Skate (Raja rhina) 3C,3D 0 (round weight) Longnose Skate (Raja rhina) 5A,5B 0 (round weight) Longnose Skate (Raja rhina) 5C,5D,5E 0 (round weight)

(b) Lingcod by hook and line gear, other than longline gear: The quantity of lingcod caught in Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 400 pounds (181 kg) (round weight). (c) Skate by hook and line gear: The quantity of skate caught in Areas 13 to 20, 28 and 29, and Subareas 12-1 to 12-13, 12-15 to 12-48 and landed from any one fishing trip shall not exceed 6,000 pounds (2,722 kg) (round weight). (d) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (e) Other rockfish (as set out in Appendix 1) by hook and line gear: The combined quantity of other rockfish landed from one fishing trip shall not exceed the greater of 500 pounds (227 kg) or 2 percent of Spiny Dogfish landed per trip (round weight). (f) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of Spiny Dogfish (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of Spiny Dogfish (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (g) Sole and flounder species by hook and line gear.

(2) When hailed out on a directed lingcod trip (by hook and line gear, other than longline gear), the licensed vessel is permitted to catch and retain the following by

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

hook and line gear, other than longline gear: (a) Those species of fish listed in Column I of the Table to this section in the Species/Groundfish Management Area Groups set out in Column II up to the maximum quantity set out in Column III of that item:

Column I Column II Column III Species Species /GMA Group Quantity in Pounds

Pacific Halibut Coastwide 0 (fresh, dressed head-off) Sablefish Coastwide 0 (round weight) Spiny Dogfish 3C,3D,5A,5B,5C,5D,5E 0 (round weight) Spiny Dogfish 4B 0 (round weight) Lingcod 3C 0 (round weight) Lingcod 3D 0 (round weight) Lingcod 5A,5B 0 (round weight) Lingcod 5C,5D,5E 0 (round weight) Canary Rockfish 3C,3D 0 (round weight) Canary Rockfish 5A,5B 0 (round weight) Canary Rockfish 5C,5D 0 (round weight) Canary Rockfish 5E 0 (round weight) Silvergray Rockfish 3C,3D 0 (round weight) Silvergray Rockfish 5A,5B 0 (round weight) Silvergray Rockfish 5C,5D 0 (round weight) Silvergray Rockfish 5E 0 (round weight) Yelloweye Rockfish 3C,3D,5A 0 (round weight) Yelloweye Rockfish 5B 0 (round weight) Yelloweye Rockfish 5C,5D 0 (round weight) Yelloweye Rockfish 5E 0 (round weight) Yelloweye Rockfish 4B 0 (round weight) Quillback Rockfish 3C,3D,5A 0 (round weight) Quillback Rockfish 5B 0 (round weight) Quillback Rockfish 5C,5D 0 (round weight) Quillback Rockfish 5E 0 (round weight) Quillback Rockfish 4B 0 (round weight) Copper/China/Tiger Rockfish 3C,3D,5A 0 (round weight) Copper/China/Tiger Rockfish 5B 0 (round weight) Copper/China/Tiger Rockfish 5C,5D 0 (round weight) Copper/China/Tiger Rockfish 5E 0 (round weight) Copper/China/Tiger Rockfish 4B 0 (round weight) Redbanded Rockfish Coastwide 0 (round weight) Rougheye Rockfish Coastwide 0 (round weight) Shortraker Rockfish Coastwide 0 (round weight) Shortspine Thornyhead Coastwide 0 (round weight) (b) The retention of skate by hook and line gear is not permitted. (c) Pacific Cod by hook and line gear: The quantity of Pacific Cod landed from any one fishing trip shall not exceed 500 pounds (227 kg) (round weight). (d) Other rockfish (as set out in Appendix 1) by hook and line gear: (i) Subject to subsection 1(2)(d)(ii), the combined quantity of other rockfish landed from one fishing trip shall not exceed 500 pounds (227 kg) (round weight); (ii) When landing greater than 10,000 pounds (4,536 kg) of lingcod, the combined quantity of other rockfish landed from one fishing trip shall not exceed 750 pounds (340 kg) (round weight). (e) Bocaccio by hook and line gear: the quantity of Bocaccio (round weight) landed from any one fishing trip shall not exceed: (i) 100 pounds (45 kg), where 10,000 pounds (4,536 kg) or less of lingcod (round weight) is landed; or (ii) 100 pounds (45kg) plus 1 percent of the amount of lingcod (round weight) landed in excess of 10,000 pounds (4,536 kg) to a maximum of 600 pounds (272 kg) of Bocaccio in total. Note: The quantity of Bocaccio landed forms part of the combined quantity of other rockfish. (f) Sole and flounder species by hook and line gear.

(3) Octopus caught incidentally may be used for bait and shall be recorded in the Integrated Groundfish Fishing Log but cannot be landed.

(4) The vessel master shall ensure that a current and valid licence amendment is on

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

board the vessel while fishing.

2. Disposition of fish:

Fish caught under authority of this licence may be sold, traded or bartered.

3. Designated fishers:

(1) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

(2) Designations are personal and non-transferable.

4. Size of fish permitted to be taken:

(1) No person shall catch and retain a halibut that is less than (a) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (b) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(2) No person shall catch and retain a sablefish that is less than (a) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (b) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(3) No person shall catch and retain a lingcod that is less than (a) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (b) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

5. Fishing is permitted for those species of fish listed in section 1 of Part 2 of these conditions in those waters, with that gear and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific Fishery Regulations, 1993 are authorized to fish for those species, with that gear, in those waters and during that time.

6. Identification of fishing vessel and gear:

(1) The designated vessel shall be identified in the manner set out in section 26 of the Fishery (General) Regulations.

(2) All fishing gear shall be identified in the manner set out in sections 27 and 29 of the Fishery (General) Regulations.

7. Handling of halibut:

(1) All undersized halibut shall be released to the sea with a minimum of injury by:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(a) hook straightening; (b) cutting the ganglion near the hook; or (c) carefully removing the hook by twisting it from the halibut with a gaff.

(2) Undersized halibut brought on board the vessel to determine if the minimum size limit of the halibut is met shall be returned to the sea with a minimum of injury.

(3) Subject to subsection 7(4) all halibut shall be landed either: (a) fresh, dressed head-on; or (b) fresh, round head-on.

(4) Where frozen at sea, halibut shall either be landed: (a) dressed head-on; (b) dressed head-off; (c) round head-on; or (d) round head-off.

8. Release of rockfish

No rockfish shall be released to sea

9. Transport requirements:

(1) All fish taken under the authority of this licence, shall be transported by the licensed vessel either directly to land or temporarily to a fish pen and then to land.

(2) No vessel other than the vessel designated to fish under this licence shall be used to transport fish taken under the authority of this licence.

(3) Any fish that have been transported to a fish pen by the licensed vessel shall be transported to land by the same vessel when the fish are removed from the fish pen. This applies whether the fish are alive or dead.

(4) The vessel fishing under the authority of this licence shall not have on board fish that have been landed and validated.

10. Fish pens:

(1) All fish enclosed in a fish pen shall be from one vessel only.

(2) No fish taken under the authority of this licence shall be stored in a fish pen unless the fish pen is marked with the vessel name and the vessel registration number of the vessel designated to fish this licence.

(3) Fish pens shall be marked as follows: (a) all letters and numbers shall be a minimum of 10 cm in height and 5 cm in width; (b) all letters and numbers shall be black and painted or affixed to a white background; and (c) the vessel name and vessel registration number shall be attached to the top surface of the fish pen.

(4) No fish taken by the licensed vessel shall be stored in a fish pen that is marked with the vessel name or vessel registration number of any other vessel.

(5) The licensed vessel shall not remove fish from a fish pen marked with any number other than the vessel registration number of the vessel designated to fish this licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

11. Requirement for Hail-out Report:

Prior to the commencement of a trip, the vessel master shall report to the designated groundfish hail service provider (as described in subsection 11(1). The person identified as the vessel master in subsection 11(1)(c) shall be considered to be the vessel master responsible for all fishing, vessel handling and reporting activities for the duration of the fishing trip.

(1) Hail-out Report to the designated Groundfish hail service provider: Not less than 24 hours prior to leaving port, the vessel master shall make a Hail-out Report and obtain a hail-out number by contacting the designated groundfish hail service provider at 1-877-819-1888 (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) name and Fisher Identification Number (FIN) of the vessel master; (d) name of directed groundfish fishery; (e) Functionality Test Certificate Number (FTCN) or at-sea observer file number; (f) Quota Status Verification Number (QSVN); (g) date of departure; (h) name of departure port; (i) anticipated date, port and location of landing; and (j) whether dual fishing, as described in section 23, will occur. If that is the case, the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number of the dual fishing designation certificate must be stated to the service provider.

(2) The vessel master shall record the hail-out number in the Integrated Groundfish Fishing Log.

(3) The vessel master shall hail-out for one directed groundfish fishery only.

(4) Salmon troll vessels intending to land lingcod while fishing for salmon under this Part shall make a groundfish Hail-out Report as set out in subsections 11(1) or 11(2).

(5) Cancellation of fishing trip: Should the vessel master decide not to fish after having made a Hail-out Report, the vessel master shall make a Hail-in Report to the designated groundfish hail service provider to indicate that no fishing occurred. The cancelled trip Hail-in Report shall be made not later than three days after making the Hail-out Report.

12. At-sea monitoring:

(1) Subject to subsection 12(2), when fishing under authority of this licence, at-sea monitoring of all fishing activity is required at all times by means of either: (a) a designated groundfish at-sea observer carried on board the vessel; or (b) the use of a functioning electronic monitoring (EM) system on board the vessel, as described in section 14.

(2) At-sea monitoring of all fishing activity under this licence is not required when less than 500 pounds (227 kg) of lingcod are caught and retained while fishing for salmon by troll gear.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

13. Fishing and Related Activity Records:

(1) Fishing activity and catch records. Subject to subsection 13(1)(d), the vessel master shall arrange to have a designated groundfish at-sea observer collect and record the following catch information at sea while fishing under the authority of this licence:

(a) For each fishing trip: (i) vessel name and VRN; (ii) vessel master's name; (iii) vessel master's FIN , and (iv) name of the designated groundfish at-sea observer.

(b) For each string of fishing gear set: (i) the set date, time, and location described as latitude and longitude in degrees, minutes and seconds or degrees minutes and tenths of minutes of each string of gear set; (ii) the haul date, time and location of each string of gear hauled; (iii) the number of hooks on each string of gear set and hauled; (iv) the type of bait used; (v) the type of hook used; (vi) the total catch in pieces retained by species; and (vii) the total catch by species released back to sea.

(c) The licence holder or vessel master shall arrange for catch records to be entered into the Departmental Fishery Operations System (FOS) within seven (7) days of completion of the fishing trip.

(d) As an alternative to arranging a designated groundfish at-sea observer, an electronic monitoring (EM) system may be used as described in section 14.

14. Electronic Monitoring (EM) system:

(1) The vessel master shall ensure that a vessel using EM in place of a designated groundfish at-sea observer shall have an EM system that meets the following minimum specifications and component requirements: (a) a video and sensor data-logging engine (control box), equipped with external display lights to verify correct power supply and be connected to a monitor and keyboard, allowing the vessel master to view real time recording of EM imagery, enter time-stamped event markers into the sensor record, and conduct system checks to test system performance; (b) operating software to record imagery during fishing events for analysis; (c) peripheral sensor devices suitable for a fishing-deck work environment, including GPS; (d) an electronic hydraulic pressure transducer (where applicable); (e) a winch rotation sensor(where applicable); (f) a minimum of two closed circuit television cameras configured to provide a clear view of the catch retrieval process; and (g) the GPS, hydraulic and winch sensor data shall be logged to a data file at a frequency of once per ten seconds, continuously throughout the fishing trip.

(2) Video images captured by the EM system shall meet the following minimum specifications: (a) image files shall be viewable on Windows Media Player; if a non-standard Windows Media Player Codec is used, it shall be provided to Archipelago Marine Research Ltd. for image analysis; (b) minimum resolution of 640 X 480 dpi and the ability to vary lens choice to ensure an appropriate field of view;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(c) imagery shall have a burned-in caption showing vessel identifier, date, time and location; (d) image files shall capture 100 percent of each catch retrieval event, including a 30 minute run-on after each event; (e) image frame rates shall be not less than 5 frames per second for catch retrieval imagery; and (f) image quality shall be sufficient to allow clear identification of the species listed in Appendix 1.

(3) Where an EM system is in use on a vessel, the vessel master shall ensure all components of the EM system are fully operational and in use during the entire fishing trip from the time the vessel leaves port until the vessel arrives at port to commence the validation of their catch. The EM system shall be continuously powered and not turned off at any time.

(4) If any or all of the EM system equipment becomes inoperative or malfunctions in any way, the vessel master shall immediately contact the provider of the EM system. The vessel master shall work with the provider of the EM system to determine if the EM system can be repaired at sea. If the EM system cannot be repaired at sea, the vessel master shall stop fishing by hauling gear and hailing in as soon as possible.

(5) Where an EM system is in use on a vessel, the vessel master shall ensure that all catch, whether retained or released, is handled within view of the EM system's closed circuit television cameras in a manner that allows for species identification with the closed circuit television cameras.

(6) The vessel master shall, within 24 hours of the offload event, provide to the EM system service provider all sensor and video data from the EM system for that trip.

(7) The licence holder or the vessel master shall arrange to have the EM system service provider conduct a comparison of the EM sensor and video data with the Integrated Groundfish Fishing Log and the Integrated Groundfish Validation Record and then enter the data into the Fishery Operations System.

(8) At the request of the Department, the licence holder or vessel master shall arrange to have the EM system service provider provide all or any portion of the EM sensor and imagery data to the Department.

15. Requirement for Hail-in Report: Prior to cancelling or completing a trip, the vessel master shall report to either the designated groundfish hail service provider (as described in subsection 15(1)) or the designated groundfish electronic hail service provider (as described in subsection 15(2)). (1) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the designated groundfish hail service provider by contacting 1-877-819-1888 (24 hours per day; seven days per week): (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in poundage by species of fish that was caught under the authority of the Communal Groundfish licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(2) Subject to subsection 15(3) and not less than 24 hours prior to landing fish, the vessel master shall report the following information to the by contacting the designated groundfish electronic hail service provider via the electronic hail software supplied by the service provider (24 hours per day; seven days per week) and reporting the following information: (a) vessel name; (b) vessel registration number; (c) date, time, port and location of landing of the fish; (d) estimated round weight in pounds of each species taken; and (e) if conducting a dual fishing trip as set out in section 23, an estimate in pounds by species of fish that was caught under the authority of the Communal Groundfish licence.

(3) When a Hail-in Report is filed three or more days after a Hail-out Report, and when no fish have been caught, the vessel master shall file a Hail-in Report indicating that no fish were caught. The vessel master shall ensure the fish hold is inspected by a designated groundfish dockside observer to verify that no fish have been caught.

16. Locations and times at which landing of fish is permitted:

(1) Subject to subsections 16(2), 16(3) and 16(4), all species caught and retained under the authority of this licence shall be landed no later than 23:59 h local time February 27, 2018.

(2) Subject to subsection 16(4), no halibut shall be retained after 12:00 h local time, November 7, 2017. All halibut caught and retained under the authority of this licence shall be landed prior to 12:00 h local time November 14, 2017.

(3) Subject to subsection 16(4) no lingcod shall be retained after 23:59 h local time, November 14, 2017. All lingcod caught and retained under the authority of this licence shall be landed prior to 23:59 h local time November 21, 2017.

(4) When an Area, Subarea or GMA is closed to fishing for a species and fish of that species taken in that area are on board the vessel, all fish on board the vessel shall be landed not later than three days after the species closure takes effect. This includes all fish that have been temporarily stored in a fish pen.

(5) All fish shall be landed at one of the following locations:

In Canada:

Ahousat Greater Victoria Prince Rupert Alert Bay Kelsey Bay Quadra Island Beaver Cove Kyuquot Queen Charlotte City Bella Bella Ladysmith Sayward Bella Coola Lund Shearwater Campbell River Masset Sidney Chemainus Metro Vancouver Skidegate Coal Harbour Nanaimo Sointula Comox Port Alberni Sooke Courtenay Port Edward Tofino Cowichan Bay Port Hardy Ucluelet Fair Harbour Port McNeil Winter Harbour French Creek Port Renfrew Zeballos Gold River Powell River

In the United States:

Blaine WA Bellingham WA

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(6) All fish shall be landed at a fish buying station licensed under the Fisheries Act (Province of British Columbia), except: (a) fish sold directly to the public under authority of a fisher's vending licence issued under the Fisheries Act (Province of British Columbia); and (b) fish landed in the United States.

17. Tagging of fish:

The vessel master shall ensure all halibut caught under the authority of this licence are tagged upon validation by a groundfish dockside observer.

18. Method permitted for landing of fish from the vessel or fish pen and verification of weight and species of fish caught and retained:

(1) The landing of any fish of any species is not permitted unless a designated groundfish dockside observer employed by a designated observer is present to authorize the commencement of weight verification.

(2) The weight of all fish shall be verified by a designated groundfish dockside observer employed by a designated observer.

(3) Subject to subsection 23(5), when any fish taken under the authority of this licence are landed, all fish on board the vessel and all fish that were temporarily stored in a fish pen shall be landed at the same time.

(4) The vessel master shall provide to the observer, a fishery officer or fishery guardian attending the landing, safe access to the vessel, the vessel's fish holds, freezers and other fish storage areas, including any fish pens, at any time during the landing and at the conclusion of the landing. (a) Where the observer, fishery officer or fishery guardian is required to climb or descend 1.2 m or more, the vessel master shall provide a gangway, ladder or other means of traversing the distance. (b) Where the measures in subsection 18(4)(a) are not available, the vessel master shall proceed under instruction of the observer to the nearest practicable location where the observer may safely enter and exit the vessel.

(5) Once landing has commenced, the vessel shall not leave the landing site unless permission has been received to do so from a groundfish dockside observer.

(6) When a Hail-in Report is filed three or more days after a Hail-out Report, and when that Hail-in Report indicates that no fish have been caught, the vessel master shall ensure that a designated groundfish dockside observer will be present at the time of arrival and at the location indicated in the Hail-in Report and the vessel master shall ensure the fish hold is inspected to verify that no fish have been caught.

(7) All fish taken under the authority of this licence shall be landed prior to the vessel fishing under the authority of a Sablefish, Halibut, Groundfish Trawl or Rockfish Hook and Line Licence.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(8) All fish taken under the authority of a Sablefish, Halibut, Groundfish Trawl, or Rockfish Hook and Line Licence shall be landed prior to the vessel fishing under the authority of this licence.

19. Method by which the weight of the fish is to be determined:

(1) At the time and place of landing, all fish shall be sorted, counted by piece and weighed by individual species.

(2) Notwithstanding subsection 19(1), if the landed weight is greater than 2,500 pounds (1,134 kg) of a species, with the exception of halibut and lingcod, a sub-sample of not less than 225 specimens shall be counted by piece and weighed, as directed by an observer.

(3) If fish are to be placed into totes or other containers at the time of landing, each tote or container shall be weighed with ice, liners, etc. and labelled with the tote weight prior to use.

(4) Totes or other containers that have been weighed and labelled before the landing are subject to weight verification at any time by a designated groundfish dockside observer.

(5) Where fish are placed in containers prior to landing and are frozen at sea: (a) each container shall contain only one species; (b) each container shall be clearly marked as to the species contained therein; and (c) all fish shall be counted and weighed by individual species.

(6) Where fish are kept alive prior to landing, all fish shall be sorted and weighed by individual species.

(7) All fish shall be weighed on a scale approved, in the case of fish landed in Canada, by Industry Canada, and in the case of fish landed in the United States, by the State of Washington Weights and Measures.

(8) All fish weights shall be determined on the basis of round weights by deducting the weight of the container and converting the product weight to a round weight or, in the case of halibut, to a fresh, dressed head off weight.

(9) The following conversion factors shall be used to convert product weight to round weight for all groundfish species except halibut:

All groundfish (round): Frozen: round, 4 percent glaze allowance, 0.96 Fresh: round, 2 percent ice/slime allowance, 0.98

"Live" fish: Fresh: 3 percent shrinkage allowance, 0.97

Arrowtooth Flounder: Frozen: dressed, head-on, 1.16 Fresh: dressed, head-on, 1.14 Frozen: dressed, head-off, 1.43 Fresh: dressed, head-off, 1.39 Frozen: dressed, head-off-tailed, 1.54 Fresh: dressed, head-off-tailed,1.49

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Other flounders and soles: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.22 Frozen: dressed, head-off, 1.60 Fresh: dressed, head-off, 1.64

Lingcod: Frozen: Japanese cut, 1.60 Fresh: Japanese cut, 1.64 Frozen: Western cut, 1.33 Fresh: Western cut, 1.36 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Pacific Cod: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51 Frozen: Western cut, 1.26 Fresh: Western cut, 1.28 Frozen: dressed, head-on, 1.08 Fresh: dressed, head-on, 1.11

Rockfish: Frozen: Japanese cut, 1.54 Fresh: Japanese cut, 1.57 Frozen: dressed, head-off 1.48 Fresh: dressed, head-off, 1.51 Frozen: dressed, head-on, 1.13 Fresh: dressed, head-on, 1.16

Sablefish: Frozen: Japanese cut, 1.48 Fresh: Japanese cut, 1.51

Skate: Frozen: Flap/Wing, 2.32 Fresh: Flap/Wing, 2.45

Spiny Dogfish: Frozen: dressed, head-on, 1.20 Fresh: dressed, head-on, 1.25 Frozen: dressed, head-off, 1.75 Fresh: dressed, head-off, 1.82

(10) The following conversion factors shall be used to convert halibut product weight to an equivalent weight of fresh dressed head-off halibut: Fresh, dressed, head-off with ice and slime 0.98 Fresh, dressed, head-on with ice and slime 0.88 Fresh, round with ice and slime 0.75 Frozen, dressed, head-off with glaze 0.97 Frozen, dressed, head-on with glaze 0.87 Frozen, round with glaze 0.74

20. Records that a vessel master shall keep:

(1) Integrated Groundfish Validation Record: (a) An Integrated Groundfish Validation Record shall be obtained from a designated observer. (b) At the completion of each landing, a designated groundfish dockside observer shall enter information regarding the landing in the Integrated Groundfish Validation Record including the weight and species of fish landed. The vessel master shall sign and date each original validation record page as directed by the designated groundfish dockside observer. At a minimum, the vessel master shall ensure that both his correct signature and his correct printed full name are placed on the Validation Record along with his FIN. The completed yellow copy shall accompany landed fish in transit to the buyer.

(2) Integrated Groundfish Fishing Log (a) The vessel master shall keep a complete and accurate record of all fishing activity carried out under authority of this licence in the Integrated Groundfish Fishing Log. Integrated Groundfish Fishing Logs are available from the designated groundfish hail service provider. (b) The information shall be recorded in the Integrated Groundfish Fishing Log not later than 24 hours after midnight local time for each day fished and prior to the landing of any fish taken under authority of this licence. (c) Where a paper Integrated Groundfish Fishing Log

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

is used, the vessel master shall ensure that an Integrated Groundfish Fishing Log is obtained prior to fishing and that sufficient pages are available to cover any fishing trip. (d) The Integrated Groundfish Fishing Log shall be kept on board the vessel at all times and shall be made available for examination upon request of an observer, a DFO employee, a fishery officer or a representative of the International Pacific Halibut Commission. (e) Following the landing of halibut, and where a paper Integrated Groundfish Fishing Log is used, the completed yellow copies in the Integrated Groundfish Fishing Log shall remain in the Logbook until removed by an International Pacific Halibut Commission employee or mailed within seven (7) days of the vessel's final landing to:

International Pacific Halibut Commission 2320 West Commodore Way, Suite 300 Seattle, WA, United States 98199-1287

(f) Where a paper Integrated Groundfish Fishing Log is used, the completed white copies in the Integrated Groundfish Fishing Log shall be provided to the designated groundfish dockside observer, or shall be forwarded, within seven (7) days of each landing to:

Fisheries and Oceans Canada c/o: Archipelago Marine Research Ltd. 525 Head Street Victoria, B.C. V9A 5S1 (250) 383-4535

(g) Where a paper Integrated Groundfish Fishing Log is used, the licence holder shall retain the pink copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

(h) Where an electronic Integrated Groundfish Fishing Log is used, copies shall be provided to Fisheries and Oceans Canada (c/o Archipelago Marine Research Ltd.), and the International Pacific Halibut Commission within seven (7) days of each landing.

(i) Where an electronic Integrated Groundfish Fishing Log is used, the licence holder shall retain a copy of the completed Integrated Groundfish Fishing Log records for a minimum period of two years.

21. Fish Slips - all species:

(1) An accurate written report shall be provided on a fish slip of all fish caught and retained under authority of this licence.

(2) A report shall be made even if the fish landed are used for bait, personal consumption or disposed of otherwise and shall include all fish landed at Canadian ports.

(3) The vessel master shall ensure the fish slips are submitted not later than seven days after landing.

(4) Fish slips shall be submitted by the vessel master to:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Department of Fisheries and Oceans Fisheries Management Data Unit Suite 200 - 401 Burrard Street Vancouver, BC V6C 3S4

Fish slip books may be purchased directly from the printer, Proforma Business Forms, phone (604)596-6133. Alternately fish slips can be downloaded free of charge, from the DFO website. For more information, see the website http://www.pac.dfo-mpo.gc.ca/stats/fishslips-carnets/index-eng.html, or phone the FM Data Unit message line at (604)666-2716.

22. Avoidance of Seabirds:

The following definitions apply to this section:

"streamer line" ("tori line") means a line to which are attached brightly coloured streamers spaced 5 m apart. The line shall have a buoy at the terminal end. The streamers shall be of UV-protected plastic tubing, 3/8 inch polyester line or surveyor's tape, and shall extend to within 0.5 m of the water when the vessel is at setting speed.

"towed buoy" means a buoy towed abaft of the stern of the vessel.

"overall length" means the length of the vessel as set out in this licence.

(1) Subject to subsections 22(2) and 22(3), the vessel master fishing: (a) a vessel less than 9 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy either a single streamer line or a towed buoy when setting longline gear; (b) a vessel 9 m to 16.8 m in overall length fishing in Areas 1 to 29, 101 to 111, 121, 123 to 127, 130 and 142 shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; (c) a vessel more than 16.8 m in overall length fishing in Areas 1 to 29, shall deploy at least one streamer line and either a second streamer line or a towed buoy when setting longline gear; and (d) a vessel more than 16.8 m in overall length fishing in Areas 101 to 111, 121, 123 to 127, 130 and 142 shall deploy paired streamer lines when setting longline gear.

(2) The vessel master of a fishing vessel that has no masts, poles or rigging shall deploy at least one towed buoy when setting longline gear.

(3) The vessel master shall deploy gear described in subsection 22(1) at all times when setting longline gear except: (a) during the period between 30 minutes after sunset and 30 minutes before sunrise; or (b) when the current wind speeds, at the nearest marine weather station, are reported as greater than 35 knots; and (c) when current wind speeds, at the nearest marine weather station, are reported as between 25 and 35 knots the vessel master shall deploy only a single streamer line or for vessels less than 9 m, either a single streamer line or a single towed buoy.

(4) The vessel master shall ensure that streamer lines are deployed so that: (a) the streamers are in the air at least 30 m beyond the point at which the groundline

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

enters the water; and (b) are towed as close to the groundline as is practical under the prevailing conditions of wind and sea.

(5) The vessel master shall ensure that towed buoys are deployed so that the buoy is towed further astern than the point at which the groundline enters the water.

(6) When setting longline gear, the vessel master shall: (a) use baited hooks that sink to the bottom as soon as they are put in the water, e.g. use sinking groundlines, thawed bait, additional weight on the groundline; (b) discharge old bait and offal so as not to attract seabirds to the longline gear; and (c) use bait fish that do not retain air in their swim bladders or puncture the swim bladder.

(7) All birds caught shall be recorded by species in the Integrated Groundfish Fishing Log.

(8) Birds shall be released in the least harmful manner.

23. Dual Fishing:

The vessel master shall not engage in dual fishing unless the following conditions are met:

(1) Before the commencement of the dual fishing trip, the licensed vessel and any person who may fish shall be designated by an Aboriginal organization, in accordance with the Aboriginal Communal Fishing Licences Regulations, to catch and retain groundfish under the authority of the Aboriginal organization's FSC Communal Fishing Licence. Proof of designation shall be a complete dual fishing designation certificate.

(2) Designations may be made to persons and vessels only; the dual fishing designation certificate may not be made to a corporation or trade name. Designations are personal and not transferable.

(3) The vessel master shall obtain the completed dual fishing designation certificate before hailing out for a dual fishing trip. The vessel master shall ensure that the dual fishing designation certificate sets out all of the following: (a) the full printed name of the person(s) designated by the Aboriginal organization; (b) the full name of the vessel designated by the Aboriginal organization; (c) the amount of groundfish by species that the vessel may land under the authority of the dual fishing designation certificate during the fishing trip; (d) the gear type that is authorized, which must be gear that is set out in the designating Aboriginal organization's FSC Communal Fishing Licence; (e) a detailed description of the waters, within the area set out in the Aboriginal organization's FSC Communal Fishing Licence, where fishing may be carried out under the dual fishing designation certificate; (f) the full name of the Aboriginal organization that issued the dual fishing designation certificate; (g) the length of time for which the designation under the dual fishing designation certificate is valid, including a start date and an end date when fishing may take place; (h) the

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

unique identification number the Aboriginal organization has assigned to the dual fishing designation certificate; and (i) the FSC Communal Fishing Licence number.

(4) Before the commencement of a dual fishing trip, the vessel master shall ensure the dual fishing designation certificate contains all the information described in subsections 18(3)(a)-(i).

(5) The vessel master shall not engage in dual fishing if any of the information described in subsections 18(3)(a)-(i) is not fully included in the dual fishing designation certificate.

(6) The vessel master shall: (a) report at the time of his or her commercial groundfish hail-out that the vessel will be dual fishing during the fishing trip, and state the name of the Aboriginal organization that issued the dual fishing designation certificate and the unique identification number the Aboriginal organization assigned to the dual fishing designation certificate; (b) report at the time of his or her commercial groundfish hail-in an accurate estimate of the weight by pound and species of the fish that was caught under authority of the FSC Communal Fishing Licence; (d) during the fishing trip record in the comments section and the retained column of the Integrated Groundfish Fishing Log the number of fish retained by species under the authority of the FSC Communal Fishing Licence by each set; and (e) carry the dual fishing designation certificate on board the vessel at all times during the dual fishing trip and produce it at the time of validation and whenever any at-sea inspection occurs.

(7) At the request of the Aboriginal organization that issued the dual fishing designation certificate, fish taken under the authority of the FSC Communal Fishing Licence may be landed at a different time and location from the fish caught under the authority of this licence if a fishery guardian, a fisheries representative designated by the Aboriginal organization or a designated groundfish dockside observer monitors the landing of groundfish and the verification of weight, pieces and species of groundfish caught and retained.

(8) The designated groundfish dockside observer, or the fishery guardian or fisheries representative, as the case may be, shall: (a) record landed catch information for each species, the dual fishing designation certificate number and the name of the Aboriginal organization that issued the dual fishing designation certificate; and (b) provide a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the FSC Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate to the Aboriginal organization that issued the dual fishing designation certificate and to the Groundfish Management Unit at 604-666-8525 (fax) within seven (7) days of the validation.

(9) Where fish taken under the authority of the FSC Communal Fishing Licence have been landed at a different time and location than the fish caught under the authority of this licence, the vessel master shall provide the designated commercial

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

groundfish dockside observer at the landing site of fish caught under the authority of this licence with the following information in respect of the FSC Communal Fishing Licence: a copy of the landed catch information by weight and piece, the vessel name, the vessel master's name, the Communal Fishing Licence number, and the unique identification number of the dual fishing designation certificate.

(10) The vessel master shall not catch and retain more groundfish by species than the amount set out in the dual fishing designation certificate.

(11) Fishing under the authority of an FSC Communal Fishing Licence shall occur only in the waters, or area, where the designating Aboriginal organization's FSC Communal Fishing Licence authorizes fishing.

(12) The vessel master shall not claim food, social, and ceremonial (FSC) fish in the Integrated Groundfish Fishing Log that was not caught in the waters within the area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(13) The vessel master and/or the individual(s) designated by the Aboriginal organization to FSC groundfish under their FSC Communal Fishing Licence shall not claim as FSC groundfish any groundfish caught and retained outside the FSC fishing area set out in the Aboriginal organization's FSC Communal Fishing Licence.

(14) Before the fish caught pursuant to the FSC Communal Fishing Licence is landed and validated the vessel master shall: (a) advise the Aboriginal organization that issued the dual fishing designation certificate of the place, time and estimated amount of fish to be landed; and (b) record the name of the representative of the Aboriginal organization who was advised of the landing per 18(14)(a) and provide it to a Fishery Officer upon request.

(15) Within seven (7) days of completion of the fishing trip the licence holder or vessel master shall: (a) ensure the information for catch landed under authority of the FSC Communal Fishing Licence is entered into the Departmental Fishery Operations System (FOS); and (b) send a copy of the landed catch information setting out the amount of groundfish by species the vessel caught under the authority of the FSC Communal Fishing Licence during the fishing trip to the Aboriginal organization that issued the dual fishing designation certificate.

(16) All fish caught under the authority of the FSC Communal Fishing Licence are for the food, social and ceremonial purposes of the Aboriginal organization which holds the licence. The vessel master or any person designated to fish under the FSC Communal Fishing Licence shall not sell trade or barter any fish caught under the authority of the FSC Communal Fishing Licence.

24. Species at Risk for all species

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that: (a) are conducted under licences

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

issued under the Fisheries Act; and (b) incidentally kill, harm, harass, capture or take Basking Shark (Cetorhinus maximus).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master shall ensure: (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark; (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

25. Shark Finning Prohibition:

No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed shall correspond to the number of carcasses landed.

COMMUNAL PART 3 [February 14, 2017]

Application

This Part applies to the transportation of fish other than fish caught by the licensed vessel.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Department" means the Department of Fisheries and Oceans.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

"landed" means having offloaded the catch onto land.

"landing" means the offloading of the catch onto land.

"observer" means a person who has been designated as an observer by the Regional Director-General for Pacific Region pursuant to section 39 of the Fishery (General) Regulations.

"vessel registration number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

Section 1

This Section applies to transporting all species of fish:

(1) The vessel master shall, immediately on request by a fishery officer, fishery guardian or representative of the Department, provide orally in person or by radio, or in writing, the following information:

(a) an accurate estimate of the amount of fish on board the vessel; (b) the vessel name and Vessel Registration Number (VRN) of the vessel or vessels that caught the fish; (c) the quantity of fish received from each vessel; (d) the location where fish were caught; (e) name of the designated port and location therein where the catch shall be landed; (f) anticipated time of landing; and (g) name of fish processor or buyer that is buying or transporting the catch.

Section 2

This Section applies to transporting salmon.

Definitions:

"fish slip" means the document used to record the information set out in subsection 3(2); a sales slip with the same information may serve as a fish slip.

"offloader" means the person present aboard the transferring vessel responsible for transfer of fish.

"receiving vessel" means a vessel receiving salmon not harvested by that vessel.

"tally person" means the person aboard the receiving vessel responsible for overseeing and verifying the transfer of fish.

"transfer" means a single act of moving fish from one vessel to another without the vessels separating.

"transferring vessel" means a vessel transferring salmon to any other vessel for transport.

1. Notification of participation:

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(1) Before departing to receive from fish from harvest vessels, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) vessel master's name; (d) vessel master's contact information (cellphone, satphone or radio contact) (e) expected location for receiving fish; (f) expected time of arrival; and (g) processor or buyer receiving fish from transport vessel.

(2) Before offloading fish, the vessel master or licence holder shall notify the DFO Fishery Manager listed in the Fishery Notice advising of the fishery opening and provide the following information: (a) vessel name; (b) vessel VRN; (c) location where fish were received; (d) approximate amount of fish received; (e) location where fish will be offloaded; (f) estimated time of offload; and (g) total number of transfers received

2. Identification of persons transferring fish: (1) Before beginning the transfer of fish, the tally person shall confirm that the transferring vessel is licensed to harvest in the fishery opening at hand.

(2) Before beginning the transfer of fish, the tally person shall confirm the identity of the person in charge of offloading fish from the transferring vessel.

3. Transfer Records:

(1) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall provide records, in the form commonly known as a fish slip or sales slip, of all fish transferred to this vessel under authority of this licence.

(2) A fish slip shall be completed for each transfer of salmon. Multiple transfers from the same vessel shall not be recorded on one fish slip.

(3) The vessel master shall ensure that each fish slip contains the following information: (a) receiving vessel name; (b) receiving vessel registration number; (c) full name of the receiving tally person; (d) transferring vessel name; (f) transferring vessel registration number; (g) name and Fisher Identification Number (FIN) of the offloader; (h) location of transfer in latitude and longitude; (i) date of transfer; (j) time of transfer; (k) landed weight of each species by grade and method of dressing reported separately in pounds; and (l) number of pieces landed for each species by grade and method of dressing of fish.

(4) The tally person shall ensure that the offloader's FIN is entered on the slip, and that their full name and signature are entered immediately following the transfer.

(5) The tally person shall print his or her full name and sign the fish slip immediately following the transfer.

(6) Information entered on the fish slip shall be complete and accurate.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

This report may contain data rated up to Protected A.
Do not release this data to external parties.

(7) The receiving vessel master or, where the vessel master is not the licence holder, the licence holder shall submit slips no later than seven days after offloading. Slips shall be mailed to:

Fisheries and Oceans Canada Fisheries and Aquaculture Management Branch, FM Data Unit 200-401 Burrard Street Vancouver BC V6C 3S4

4. Transfer Log (1) The vessel master shall maintain a single transfer log of all transfers made during the 2017 salmon fishing season. Transfer log pages can be downloaded from:

http://www.pac.dfo-mpo.gc.ca/fm-gp/licence-permis/licence-commercial-eng.html

(2) Each transfer shall be given a unique transfer number in the Transfer Log.

(3) Transfer numbers shall be issued sequentially through the salmon fishing season and entered in numerical order in the log.

(4) All entry lines shall be completed in numerical order in the Transfer Log and there shall be no lines left blank or empty between entries.

(5) Each page of the Transfer Log shall show the: (a) name of the licensed transport vessel (receiving vessel); (b) receiving vessel's VRN; (c) full name of the tally person; and (d) sequential page number.

(6) Where more than one tally person accepts transfers recorded on a single transfer log page, each tally person shall enter their full name and initial their entries on the log page.

(7) Each entry in the Transfer Log shall show the: (a) sequential transfer number; (b) transfer date; (c) location of the transfer in latitude and longitude; (d) name of the transferring vessel; (e) transferring vessel's VRN; (f) name and Fisher Identification Number (FIN) of the offloader for this transfer; (g) Area(s) fished; (h) date(s) fished; (i) sales slip or fish slip number recording the transfer; and (j) amount of each species of salmon transferred, in pieces and weight.

(8) The transfer log shall be kept on board the licensed vessel when the vessel is receiving fish at a fishery opening and when travelling to or from a fishery opening.

(9) The transfer log shall contain data pertaining to a single vessel only.

(10) The transfer log shall be produced for examination on demand of a fishery officer, a fishery guardian, observer or representative of the Department.

(11) All information entered in the transfer log shall be complete and accurate.

(12) All recording in the transfer log shall be in ink. If an error is made while completing an entry, the entry shall be crossed out and initialed by the vessel master.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

(13) Erasure of an entry in the transfer log is not permitted.

(14) If a transfer log in which transfer information has been recorded is lost or destroyed, and no complete records of that transfer information survive, the licence holder shall submit a notarized Statutory Declaration that the harvest log was lost or destroyed to the responsible Fishery Manager

(15) Where a licensed transport vessel is operated by someone other than the licence holder, the licence holder shall be responsible for the submission of the transfer log.

Section 3

This Section applies to transporting Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin, and Green Sea Urchin.

Definitions:

"container" means a mesh pick bag, mesh transport bag, tote, cage or other container used for the gathering, handling or transportation of shellfish.

"discarded" means not placing the shellfish in a container or removing a shellfish from a container and not validating that shellfish.

"harvested" means removing, by any means, shellfish from the substrate of the ocean floor.

"harvest log" means the validation and harvest log or a format approved by the Department of Fisheries and Oceans Shellfish Data Unit.

"shellfish" means Geoduck, Horse Clam, Sea Cucumber, Red Sea Urchin and Green Sea Urchin.

"tranship" means the transfer of shellfish from a vessel to another vessel.

"validated" means shellfish that have been weighed by an observer and the weight entered into the appropriate log.

(1) Oral Reports:

At least 24 hours prior to landing shellfish, the vessel master shall report the following information by notifying in person an observer or by calling 1 (800) 663-7152 prior to landing Geoduck or Horse Clam or 1 (800) 775-5505 prior to landing Sea Cucumber, Red Sea Urchin or Green Sea Urchin:

(a) vessel name and VRN; (b) species to be landed; (c) name of the designated port and location therein where the catch shall be landed; (d) anticipated time of landing; (e) name of fish processor or buyer that is buying or transporting the catch; and (f) if applicable, the method of transporting the catch to a fish processor.

(2) The type of container used to transport shellfish and the marking of such

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

containers: (a) Shellfish shall be transported to land in the container received from the catcher vessel.

(b) No shellfish shall be removed from one container and placed in another container once the containers have been transhipped from the catcher vessel to the transport vessel.

(c) No shellfish shall be dumped, thrown overboard or otherwise discarded from any container.

(d) All Geoduck or Horse Clam received from the catcher vessel shall be in containers which are tagged. The tags shall be waterproof and provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) Geoduck licence number (G Tab); (iii) harvest date; (iv) Geoduck Management Area (GMA), e.g. 24D01c; (v) Area and Subarea, e.g. 24-4; (vi) location of catch (bed code(s) where possible), e.g. 24-4-1(1); and (vii) common product name, i.e. Geoduck Clam or Horse Clam.

An example of a tag is illustrated in the current Geoduck and Horse Clam Integrated Fisheries Management Plan.

(e) All Sea Cucumber received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and shall provide the following information written in water resistant ink: (i) vessel name and VRN; (ii) licence tab number; (iii) harvest date; (iv) harvest Subarea; (v) location of catch; and (vi) common product name, i.e. Sea Cucumber.

(f) All Red Sea Urchin and Green Sea Urchin received from the catcher vessel shall be in containers which are labelled. The label shall be waterproof and marked with the vessel name and vessel registration number.

(g) The marking on containers, as required by the conditions of licence for the catcher vessel, shall not be removed, altered or obscured in any way.

(3) Validation and Harvest Log:

A copy of the validation and harvest log received from the master of the licensed catcher vessel shall accompany the shellfish to the designated port.

(4) Locations permitted for the landing of shellfish:

(a) Geoduck and Horse Clam shall be landed at one of the following ports: (i) For fisheries off the east coast of Vancouver Island: (A) Port Hardy Port McNeill Campbell River Heriot Bay Lund Westview Comox Deep Bay French Creek Nanaimo Ladysmith Chemainus Cowichan Bay Sidney (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(ii) For fisheries off the west coast of Vancouver Island: (A) Sooke Port Alberni

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

Ucluelet Tofino Gold River Zeballos Fair Harbour Winter Harbour Coal Harbour (B) Madeira Park may be used as a landing port if prior arrangements have been made with the service provider to ensure that an observer and scale are available.

(iii) For fisheries in waters north of Cape Caution: Port Hardy Prince Rupert Port Edward Bella Bella Masset Queen Charlotte City/Sandspit

(b) Sea Cucumber shall be landed at one of the following ports: (i) For fisheries in waters off the east coast of Vancouver Island: Port Hardy Campbell River Port McNeill Sechelt Herriot Bay Egmont Kelsey Bay Lund French Creek Powell River Pender Harbour Sidney Squirrel Cove on Cortes Island

(ii) For fisheries in waters off the west coast of Vancouver Island: Tofino.

(iii) For fisheries in waters north of Cape Caution: Prince Rupert Port Edward Queen Charlotte City Moresby Camp Klemtu Bella Bella Port Hardy

(c) Red Sea Urchin shall be landed at one of the following ports: (i) North Coast: Queen Charlotte City Masset Prince Rupert Port Edward Klemtu Bella Bella Port Hardy

(ii) South Coast: Port Hardy Coal Harbour Port McNeill Kelsey Bay Campbell River Nanaimo Sidney Sooke Victoria Ucluelet Tofino Vancouver

(d) Green Sea Urchin shall be landed at one of the following ports: (i) North Coast: Prince Rupert Port Edward (ii) South Coast: Port Hardy Port McNeill Kelsey Bay Telegraph Cove Campbell River Brown's Bay Sidney Sooke Victoria Vancouver

(5) Validation: (a) All shellfish shall be validated at the point and time the fish is landed. (b) All weights shall be determined using a scale approved by Industry Canada. (c) The vessel master shall provide the observer with a hard copy of the validation and harvest log upon completion of each validation. (d) The vessel master shall provide to the observer access to the vessel's fish holds, freezers and other fish storage areas at any time during the landing.

Section 4

This Section applies to transporting Roe Herring.

Transporting of Roe Herring is authorized by this licence for the current Roe Herring fishery only.

Definitions:

"container" means a bag, box, tray, tote, frozen block or anything that contains fish but not including a fish pen.

"fishery manager" means the individual who has been identified to the fleet on the fishing grounds during broadcasts on 78A VHF, as the individual responsible for management of the Roe Herring fishery in that area.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information

"validated" means roe herring that have been weighed by an observer and the weight entered into the current Roe Herring Seine Pool Fishery Validation Record or the current Roe Herring Gillnet Pool Fishery Validation Record.

(1) Weighing of Roe Herring:

(a) All Roe Herring shall be weighed using a scale which is accurate and has been approved by Industry Canada.

(b) All Roe Herring that was caught using gill net gear shall be weighed and recorded at the time it is transferred to this vessel.

(2) Sorting of Roe Herring:

(a) All Roe Herring received by this licensed vessel shall be landed and validated.

(b) No person shall sort, by any means, Roe Herring prior to landing and validating the fish.

(3) Notification of intent to leave the fishing grounds:

(a) Seine Gear: If the Roe Herring was caught using seine gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) the name of the vessel(s) that caught the fish; and (iii) the estimated weight of roe herring on board the transport vessel.

(b) Gill Net Gear: If the Roe Herring was caught using gill net gear, the vessel master of this licensed vessel shall advise the fishery manager prior to leaving the fishing grounds of the following information:

(i) vessel name and VRN; (ii) a listing of the gill net licence pool numbers under the authority of which the fish were caught; and (iii) the weight of roe herring received from each licence pool.

(4) Locations permitted for landing of Roe Herring:

Port Edward French Creek Prince Rupert Metro Vancouver Quadra Island

(5) Validation by an observer:

(a) No Roe Herring shall be landed unless the vessel has hailed-in, received a confirmation number and the landing has been approved by an observer.

(b) Prior to landing, the vessel master shall notify an observer by telephoning (866) 930-4000. To receive a confirmation number, the vessel master shall provide the following information:

(i) vessel name and vessel registration number of the vessel landing the roe herring;

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(ii) name of the port and specific location where the Roe Herring will be landed; (iii) location where, and date when, Roe Herring was caught; (iv) if the Roe Herring was caught using seine gear, the name of the vessel(s) which caught the fish and the estimated weight of Roe Herring on board the transport vessel; (v) if the Roe Herring was caught by gill net gear, a listing of the gillnet licence pool numbers under the authority of which the fish were caught and the weight of Roe Herring received from each licence pool; (vi) name of the company, fish processor or buyer that is receiving or buying the Roe Herring at the landing port; and (vii) anticipated time of arrival at the landing port.

(c) All Roe Herring transported under this licence shall be validated at the point and time of landing and this weight shall be the landed weight.

(d) All fish on board the vessel shall be landed at the same time and location and once offloading has started the vessel shall not leave the dock with herring on board unless written authorization to do so has been given by the observer.

(e) All fish weights shall be determined on the basis of net weights by deducting the weight of the container and ice. The containers shall be accurately weighed in the presence of an observer.

(f) The vessel master shall provide access to the vessel's fish holds, freezers and other fish storage areas, including any fish pens, to the observer verifying the landing at any time during the landing or at the conclusion of the landing.

CONDITIONS OF 2017/2017 COMMUNAL SALMON AREA C LICENCE Licence Period: April 1, 2017 to March 31, 2018 (GILL NET - NORTH COAST)

Authority

The Department of Fisheries and Oceans has authority to set licence conditions under section 5 of the Aboriginal Communal Fishing Licences Regulations and subsection 22(1) of the Fishery (General) Regulations for the proper management and control of fisheries and the conservation and protection of fish.

Persons fishing under authority of this licence may only do so in accordance with the conditions stated below.

Also, it is the responsibility of individual fish harvesters to be informed of, and comply with, the Fisheries Act and the regulations made thereunder, in addition to these conditions.

For information on management of salmon fisheries, obtain a copy of the current Northern BC Salmon - Integrated Fisheries Management Plan. The Management Plan is intended for general information purposes only. Where there is a discrepancy between the Plan and the regulations or conditions, the regulations and conditions prevail.

PART 1

Application

This Part applies to fishing for salmon.

Definitions

"Alaska Twist" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 4 or more filaments of equal diameter in each twine of the web and each of these filaments shall be a minimum of 0.20 mm in diameter.

"Area" and "Subarea" have the same meaning as in the Pacific Fishery Management Area Regulations, 2007.

"Catch Reporting Service Provider" means a company, organization or individual authorized by the Department to distribute harvest logs and to process certain in-season and post-season reports required by these conditions of licence.

"Cancel Trip Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Cancel Trip Report (see subsection 5(8)).

"Daily Catch Record" means the detailed record of catch retained and released associated with daily fishing activities required to be kept under these conditions of

Document Released Under the Access to Information Act / Document divulgué en vertu

licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Daily Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Daily Catch Report (see subsection 5(5)).

"day" means a calendar day, beginning at 00:01 h and ending at 23:59 h.

"Department" means the Department of Fisheries and Oceans.

"Designated landing site" means a location where the landing of salmon is permitted.

"Dockside Monitoring" means monitoring by an approved Landing Observer Service Provider, of all fish landed and any retained on board after landing, by species.

"Electronic Logbook" (E-Log) means a computer application approved by the Department that captures commercial catch and other fishery-related information in an electronic format. The computer application shall transmit this information into the Salmon Fishery Database using the data specifications set out by the Department.

"End Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an End Fishing Report (see subsection 5(10)).

"Fisher Identification Number (FIN)" means the unique identification number issued to fishers by the Department of Fisheries and Oceans for licensing and other fisheries management purposes.

"fishery opening" means a period during which fish may be caught under authority of this licence pursuant to the Pacific Fishery Regulations, 1993.

"fishing trip" means the time between leaving a port to commence commercial salmon fishing and the return to a port or the landing of catch that results in a discontinuation of fishing for one day or longer.

"gill net set time" means the period of time beginning with entry of the first portion of the web into the water and ending when the last portion of the web leaves the water.

"gill net soak time" means the period of time beginning when the gill net is fully extended for a fishing set and ending with the commencement of the retrieval of the gill net from the water.

"harvest log" means the record of fishing activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Hours Fished" means the number of hours spent in an area open to commercial fishing where the licensed vessel is engaged in any fishing activities, including but

Document Released Under the Access to Information Act / Document divulgué en vertu

not limited to, all activities related to setting, hauling, picking, cleaning, and transiting between sets. "landing" means the removal of fish from the licensed vessel, whether to a shore-based facility or to another vessel.

"Landing Observer" means an individual designated pursuant to subsection 39(1) of the Fishery (General) Regulations to monitor landings and verify the weight and number of each species of salmon landed as required by these conditions of licence.

"Landing Observer Service Provider" means a company designated pursuant to section 39.1 of the Fishery (General) Regulations to provide Landing Observers as required by these conditions of licence. Detailed information regarding the Landing Observer Service Provider will be released by Fishery Notice prior to the fishing season. For contact information for the authorized Salmon Landing Observer Service Provider for 2016, contact your fishery manager.

"Multi-strand" means a gill net that, in addition to meeting any specifications prescribed by the Fisheries Act and the regulations made thereunder, has 30 or more filaments of equal diameter in each twine of the web.

"observer" means a person designated by the Regional Director-General to carry out duties set out in subsection 39(2) of the Fishery (General) Regulations.

"Offload Catch Record" means the detailed record of catch offloaded associated with all offload activities required to be kept under these conditions of licence and applies to both hard copy (paper) versions and electronic (E-Log) versions unless otherwise specified.

"Offload Catch Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of an Offload Catch Report (see subsection 5(6)).

"Pause Fishing Report Confirmation Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Pause Fishing Report. (see subsection 5(7)).

"Salmon Fishery Database" means a restricted access computer database maintained by the Department, which stores information required by these conditions.

"Trip Identification Number" means the unique number provided by an authorized Catch Reporting Service Provider upon completion of a Start Fishing Report (see subsection 5(4)).

"Vessel Registration Number (VRN)" means the number assigned to a vessel by the Department at the time the vessel is registered as a fishing vessel.

1. Communal Conditions (1) Fish caught under authority of this licence may be sold, traded or bartered.

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi d'accès à l'information.
This report may contain data rated up to Protected A.
Do not release this data to external parties.

(2) Individuals fishing under authority of this licence shall carry proof of designation and shall provide proof of designation on request by any fishery officer or fishery guardian.

Designations are personal and non-transferable.

(3) Size of fish permitted to be taken: (a) No person shall catch and retain a Halibut that is less than (i) 81.3 cm in length, measured in a straight line from the tip of the lower jaw with the mouth closed and passing over the pectoral fin to the extreme end of the middle of the tail; or (ii) where the head has been removed, 61 cm in length, measured in a straight line from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail.

(b) No person shall catch and retain a Sablefish that is less than (i) 55 cm in length, measured from the tip of the nose to the fork of the tail; or (ii) where the head has been removed, 39 cm in length, measured from the origin of the first dorsal fin to the fork of the tail.

(c) No person shall catch and retain a lingcod that is less than (i) 65 cm in length, measured from the tip of the nose to the tip of the tail; or (ii) where the head has been removed, 50 cm in length measured along the shortest length of the body to the tip of the tail.

(4) Identification of fishing vessel and gear: (a) The designated vessel shall be identified in accordance with section 26 of the Fishery (General) Regulations. (b) All fishing gear shall be identified in accordance with sections 27 and 29 of the Fishery (General) Regulations.

2. Species and quantities of fish permitted to be taken:

(1) Species of fish: (a) Sockeye Salmon, Coho Salmon, Pink Salmon, Chum Salmon and Chinook Salmon, subject to variation of the close times set out in the Pacific Fishery Regulations, 1993.

(2) Catch prohibited on board the licensed vessel while fishing: (a) No salmon caught on a previous fishing trip shall be on board the licensed vessel while fishing. (b) No salmon of species that are not permitted to be retained under the authority of this licence at the time and area being fished shall be on board the licensed vessel. (c) No salmon of any species that have been caught and retained under the authority of another licence shall be on board the vessel while fishing. (d) Subsection 2(2)(b) does not apply to fish being held temporarily in revival tanks as required.

3. Waters in which and times when fishing is permitted:

Fishing is permitted in Areas 1 to 10 and Subarea 101-7 for a species of salmon by gill net gear, in those areas and during those times when persons fishing under authority of a Category C licence issued pursuant to section 19 of the Pacific

Document Released Under the Access to Information Act / Document divulgué en vertu de la Loi sur l'accès à l'information.

Fishery Regulations, 1993 are authorized to fish for that species of salmon with a type of vessel licensed for Salmon Area C, in that area and during that time.

4. The fishing gear permitted to be used and the manner in which it may be used:

(1) One salmon gill net. In addition to any specifications prescribed by the Fisheries Act and the Regulations made thereunder, gill nets shall meet the following specifications:

(a) all nets greater than 60 meshes in depth shall have at least every fifth cork a distinctive colour (not white); and

(b) Alaska twist or multi-strand or a combination of the two is permitted. If Alaska twist is used, then the hang ratio shall not exceed 2.5:1.

(2) In Subareas 4-4, 4-5, 4-8, 4-9, 4-12, 4-14, 4-15, 5-1 and 5-2 during the period August 1, 2016 to March 31, 2017 the following applies: (a) the maximum gill net set time is forty (40) minutes; (b) the maximum gill net soak time is twenty (20) minutes; and (c) the maximum gill net length is 187.5 m.

(3) The gill net shall be completely retrieved from the water upon completion of each set.

(4) While fishing for salmon, the licensed vessel shall be equipped with a revival tank, the purpose of which is to temporarily hold and revive injured, stressed or weak fish which the vessel is prohibited from retaining. Those salmon and steelhead that are injured, weak or appear dead shall be placed in the revival tank until revived to a vigorous condition or for at least one hour and then released back into the water from which they were caught in the manner that causes the least harm.

The revival tank shall:

(a) be constructed of non-transparent material; (b) either consist of a single compartment with minimum inside dimensions of 90 cm x 40 cm x 40 cm, or consist of two or more compartments each with minimum inside dimensions of 100 cm X 20 cm X 40 cm; (c) have a separate tight fitting lid for each compartment, made of non-transparent material; (d) have a separate inlet and outlet for each compartment; (e) have a separate release mechanism for each compartment that will allow revived fish to be released without being handled; (f) be in operation from 10 minutes prior to retrieval of the net and continue in operation at all times during retrieval of the net and while fish are being held in the tank; (g) at all times while in operation, be full of water that is continually exchanged with water drawn directly from overboard, at a minimum rate of 36 litres (7.9 Imp gal) per minute; (h) be kept clean and in operable condition; and (i) shall not be used for any purpose other than that outlined above.

5. Fishing Reports:

(1) The person identified as the vessel master in subsection 5(4)(c)(iv) shall be on board the fishing vessel and shall be considered to be the vessel master responsible

Document Released Under the Access to Information Act / Document divulgué en vertu

for all fishing, vessel handling and reporting activities, including fish slips, for the duration of the fishing trip.

(2) If a new vessel master assumes operation of the vessel during a fishing trip, a new start fishing report shall be made and a new Trip Identification number acquired, as set out in subsection 5(4)(c).

(3) Failure to provide all required information will be considered a failure to report and will be treated as a failure to comply with these conditions. (4) Start Fishing Report: (a) Prior to beginning fishing on a fishing trip and no earlier than one week prior to initiating fishing activity, the vessel master shall: (i) inactivate all previous Trip Identification Numbers applicable to this licence by completion of either End Trip Reports or Cancel Trip Reports; (ii) make a Start Fishing Report and obtain a new Trip Identification Number; and (iii) record the Trip Identification Number in the appropriate space or spaces in the harvest log.

(b) To make a Start Fishing Report and obtain a new Trip Identification Number, the vessel master shall ensure that all Pause Fishing, End Fishing, Cancel Fishing, Daily Catch Reports and Offload Catch Reports for all previous fishing trips have been completed.

(c) To obtain a Trip Identification Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number and page number; (ii) Salmon Licence Area; (iii) vessel master's name and vessel master's Fisher Identification Number; and (iv) intended date, time and Area fishing will begin.

(d) The vessel master with electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(e) The vessel master using an electronic harvest log shall enter their name for each start trip report and check the "I agree" box to the following statement: "You acknowledge that you are the Vessel Master as defined in the conditions of licence and as selected in this start Trip report ("Captain Name"). As the Vessel Master, you are responsible for all the data entered for this trip. If your name can not be selected you will need to contact the 2017 e-log service provider to update the e-log software before filing the Start Trip report."

(f) If the vessel master wishes to fish in a different Area than recorded in the Start Fishing Report, the vessel master shall submit: (i) a Cancel Trip Report if no fishing has occurred; or (ii) an End Fishing Trip Report if fishing has occurred; and (iii) a new Start Fishing Report for the new Area.

(5) Daily Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Daily Catch Report Confirmation Number for each Daily Catch Report; and (ii) record the Daily Catch Report Confirmation Number in the

Document Released Under the Access to Information Act / Document divulgué en vertu

appropriate space of the Daily Catch Report in the paper harvest log.

(b) The Daily Catch Report Confirmation Number shall be recorded on the Daily Catch Record page in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery opening is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, a Daily Catch Report is not required until 24 hours following the completion of the second opening; (iv) for fishery openings that last longer than seven (7) days, a Daily Catch Report shall be made within seven (7) days of fishing for each day of fishing. (For example, if the fishery commences on a Monday, a Daily Catch Report shall be made before the following Monday) and (v) for fishery openings in Areas 3, 4 and 5 where the vessel master lands to a shore-based designated landing site, the daily catch report shall be completed prior to landing.

(c) To obtain a Daily Catch Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; (v) for each date and Area fished: (A) date fished; (B) Area fished; (C) number of hours fished; (D) number of sets; (E) depth of net fished, in meshes; (F) Subarea(s) fished; (G) number of fish caught and retained by species or category as indicated on the Daily Catch Record page of the harvest log; (H) number of fish caught and released by species or category as indicated on the Daily Catch Record page of the harvest log; and (I) number of non-fish (i.e. turtles, birds and mammals) encountered by species.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(6) Offload Catch Reports: (a) Under the circumstances set out below, the vessel master shall: (i) obtain an Offload Catch Report Confirmation Number for each Offload that has occurred; (ii) record the Offload Catch Report Confirmation Number in the appropriate space of the Offload Catch Record page in the harvest log; and

(b) The Offload Catch Report Confirmation Number shall be recorded in the harvest log for each offload not later than 24 hours after an offload occurred.

(c) To obtain an Offload Catch Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) vessel master's name and vessel master's Fisher Identification Number; and (v) for each offload: (A) First date fished; (B) Last date fished; (C) Last Management Area fished; (D) Number of days fished;

Document Released Under the Access to Information Act / Document divulgué en vertu

(E) Date and time offloaded; (F) Business and port, or name and VRN of Packer offloaded to (or specify personal use); (G) Fish slip number or sales slip number; and (H) Number of fish landed by species or category as indicated on the Offload Catch Record page of the harvest log.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(7) Pause Fishing Report: (a) Under the circumstances set out below, the vessel master shall: (i) obtain a Pause Fishing Report Confirmation Number for each day of a fishing trip on which no fishing occurred; and (ii) record the Pause Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) Pause Fishing Report Confirmation Numbers shall be recorded in the harvest log: (i) not later than 24 hours following the completion of a fishery opening; (ii) if a fishery is extended, not later than 24 hours following the completion of the extension; (iii) if a new fishery is opened in an Area within 12 hours of the closure of the previous fishery in the same Area, not later than 24 hours following the completion of the second opening; and (iv) for fisheries that last longer than seven (7) days, not later than 24 hours after entering a port where telecommunications are available.

(c) To obtain a Pause Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number obtained when the Start Fishing Report was made; (v) date on which no fishing occurred; and (vi) Management Area in which the vessel master had intended to fish on that date.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message.

(8) Cancel Trip Report: (a) If no fishing occurs on a planned fishing trip for which a Trip Identification Number was obtained, the vessel master shall: (i) obtain a Cancel Trip Report Confirmation Number; and (ii) record the Cancel Trip Report Confirmation Number in the appropriate space in the harvest log.

(b) The Cancel Trip Report Confirmation Number shall be recorded in the harvest log no later than 72 hours following the time given on the Start Fishing Report as the intended time to start fishing.

(c) To obtain a Cancel Trip Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number;

Document Released Under the Access to Information Act / Document divulgué en vertu

(iii) Salmon Licence Area; and (iv) intended date, time and Area where fishing was to have begun.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (9) Interim Reports: (a) Upon demand by a fishery officer, fishery guardian or a representative of the Department, the vessel master shall immediately provide orally in person or by radio, or in writing, any or all of the following information that may be requested: (i) an accurate estimate of the amount of fish on board the vessel as well as fish caught and released; (ii) information concerning the location of catch, rate of catch and method of transporting of the catch; (iii) the name and location of the person or company buying the catch; and (iv) the trip identification number obtained from the Catch Reporting Service Provider.

(10) End Fishing Report: (a) Not later than 24 hours following the end of a fishing trip and prior to commencing a subsequent fishing trip, the vessel master shall: (i) make an End Fishing Report and obtain a unique End Fishing Report Confirmation Number for each Trip Identification Number; and (ii) record the End Fishing Report Confirmation Number in the appropriate space in the harvest log.

(b) The vessel master shall ensure that a unique End Fishing Report Confirmation Number for each Trip Identification Number is obtained if fishing occurred on the fishing trip and: (i)if fishing stopped for 24 hours or longer for landing to a plant or to another vessel; or (ii) if the fishery closed for 12 consecutive hours or longer; or (iii) if the vessel changes fishing areas; and (iv) prior to a subsequent trip.

(c) To obtain an End Fishing Report Confirmation Number, the vessel master using paper harvest logs shall provide the following information to the Catch Reporting Service Provider who will ensure the information is entered into the Salmon Fishery Database: (i) harvest log identification number; (ii) paper harvest log page number; (iii) Salmon Licence Area; (iv) Trip Identification Number from the most recent completed fishing trip; (v) last date, time and Area fished; and (vi) designated landing site where the fish were landed if landing occurred.

(d) The vessel master using electronic harvest logs shall submit this information, other than the harvest log page number, by digital transmission to the Salmon Fishery Database in a properly encoded electronic mail message. (11) Nil Reports (a) In the event that a licence is issued but not fished, the licence holder shall ensure that a Nil Report for the season is submitted by January 31, 2017.

(b) Submitting a Nil report: (i) If a harvest log was issued, the Nil Report form that was included in the harvest log shall be completed and returned with the harvest log to the Catch Reporting Service Provider. The Nil Report form shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder. (ii) If no catch reporting service arrangements were made, a letter shall be sent to the Department stating that the licence(s) were not

Document Released Under the Access to Information Act / Document divulgué en vertu

fished. The letter shall include the vessel name, vessel registration number and licence number(s), and it shall be signed by the licence holder, and be delivered to:

Fisheries and Oceans Canada Salmon Catch Monitoring Unit Pacific Biological Station 3190 Hammond Bay Road Nanaimo, B.C. V9T 6N7 Tel: (250) 756-7000

6. Harvest Log:

Unless otherwise specified below, this section applies to both the paper harvest log and electronic harvest log. (1) The vessel master shall maintain a harvest log of all harvest operations. The format of the harvest log shall meet the requirements set out by the Department. For further information, a sample of the paper harvest log page can be found in the current Northern BC Salmon Integrated Fisheries Management Plan.

(a) To obtain an approved paper harvest log, the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(b) To obtain an approved electronic harvest log (E-log), the vessel master shall contact the Catch Reporting Service Provider, prior to the first fishing trip of the season.

(2) If the paper harvest log contains more than one page, the pages shall be bound in such a manner that the removal of a page cannot be performed without leaving evidence of said removal.

(3) Each page of the paper harvest log shall be numbered sequentially.

(4) A carbon copy shall be made for each page of the paper harvest log.

(5) The vessel master shall ensure that the information recorded in the harvest log is complete and accurate.

(6) The vessel master using a paper harvest log shall print and sign their name and FIN beside each Daily Catch Record made in the paper harvest log. Vessel masters using electronic harvest logs shall select their name from the Captain Name list for each Start Fishing Report. (7) A separate daily catch record entry in the harvest log shall be made for each Area fished.

(8) Recording of harvest log data: (a) Daily Catch Records: (i) In all Areas, Daily catch information shall be recorded on the Daily Catch Record page in the log before any fish are landed.

(ii) A separate line on the Daily Catch Record page shall be used to record any additional catch harvested in the same calendar day following a landing.

(iii) If there are two separate fishery openings on one calendar day, harvest information from the first opening shall be recorded in the harvest log prior to the vessel participating in the second opening.

Document Released Under the Access to Information Act / Document divulgué en vertu

(iv) Daily Catch information shall be recorded on the Daily Catch Record page in the harvest log not later than 23:59 h of each day fished. If a fishery spans two calendar days then the harvest information shall be recorded before 23:59 h of the second day.
